Subtitling Jorge Díaz Cintas, Aline Remael, 2020-12-29 Subtitling: Concepts and Practices provides students, researchers and practitioners with a research-based introduction to the theory and practice of subtitling. The book, inspired by the highly successful Audiovisual Translation: Subtitling by the same authors, is a new publication reflecting the developments in practice and research that mark subtitling today, while considering the way ahead. It supplies the core concepts that will allow its users to acquaint themselves with the technical, linguistic and cultural features of this specific yet extremely diverse form of audiovisual translation and the many contexts in which it is deployed today. The book offers concrete subtitling strategies and contains a wealth of examples in numerous languages for dealing with specific translation problems. State-of-the art translation technologies and their impact on the profession are explored along with a discussion of the ways in which they cater for the socio-political, multicultural and multilingual challenges that audiovisual productions and their translations must meet today. A truly multimedia package, Subtitling: Concepts and Practices comes with a companion website which includes a wide range of exercises with answer keys, video clips, dialogue lists, a glossary of concepts and terminology used in the industry and much more. The Elements of Subtitles, Revised and Expanded Edition: A Practical Guide to the Art of Dialogue, Character, Context, Tone and Style in Subtitling D. Bannon, 2010 Good subtitles don't just transfer words from one language to another. They are as funny, scary, witty and compelling as the original. The Elements of Subtitles is a practical guide on how to get subtitling right. Translators working from any language into English will learn how to write vibrant dialogue, develop character profiles, find dramatic and comic equivalents, use dialect and slang, avoid common mistakes and understand tone, style and context in film. Filled with examples from screenplays across the globe, this is an indispensable reference on the nuts and bolts of creating accurate and exciting subtitles. Since its publication, The Elements of Subtitles has become a primary resource for film translation. Fully updated in a revised and expanded edition, The Elements of Subtitles is a must for anyone who wants to get into the world of translation, (Midwest Book Review) and The definitive guide for all working subtitle translators. The Semiotics of Subtitling Zoe De Linde, Neil Kay, 2016-04-08 Subtitling serves two purposes: to translate the dialogue of foreign language films for secondary audiences (interlingual) and to transform the soundtrack of television programmes into written captions for deaf and hard-of-hearing viewers (intralingual). While both practices have strong linguistic roots, often being compared to text translation and editing, this book reveals the complex influences arising from the audiovisual environment. Far from being simply a matter of linguistic equivalence, the authors show how the effectiveness of subtitles is crucially dependent upon the hidden semiotic relations between text and image; relations which affect the meaning of the visual-linguistic message and the way in which that message is ultimately received. Focusing primarily on intralingual subtitling, The Semiotics of Subtitling adopts a holistic approach, combining linguistic theory with empirical eye-movement analysis in order to explore the full depth of the medium and the reading behaviour of viewers.

Subtitling Norms for Television Jan Pedersen, 2011 In most subtitling countries, those lines at the bottom of the screen are the most read medium of all, for which reason they deserve all the academic attention they can get. This monograph represents a large-scale attempt to provide such attention, by exploring the norms of subtitling for television. It does so by empirically investigating a large corpus of television subtitles from Scandinavia,

one of the bastions of subtitling, along with other European data. The aim of the book is twofold: first, to provide an advanced and comprehensive model for investigating translation problems in the form of Extralinguistic Cultural References (ECRs). Second, to empirically explore current European television subtitling norms, and to look into future developments in this area. This book will be of interest to anyone interested in gaining access to state-of-the-art tools for translation analysis, or in learning more about the norms of subtitling, based on empirically reliable and current material.

Listening to Subtitles Anna Matamala,Pilar Orero,2010 This book is the first monographic study on subtitles for the deaf and hard of hearing from a multidisciplinary perspective, from engineering to philology. The book departs from studies, analyses, tests, validations, resulting data, and their application from the nation-wide research on accessibility and usability of subtitles carried out in Spain. Tests and further analysis were carried out paying attention to users' hearing profiles, the many formal features of subtitles - size, font, colour, position, etc. - , and the syntax of the subtitle. The book also contains articles which discuss present and future research on subtitles for the deaf and hard of hearing carried out in Canada and across Europe: Belgium, Denmark, Italy, Poland, Spain, and UK. It provides an outlook for the implementation of the European Guidelines on Media Accessibility.
