Each Sudoku puzzle is designed to exercise your brain and challenge you in different levels. All you have to do now is grab a pencil and focus on the common goal. 'Sudoku' is a game of puzzle originally from Japan. Unlike other puzzles such as picture puzzles or word puzzles, Sudoku is completely different. It is a puzzle with numbers and if you love solving mysteries, you might be

the perfect person to solve Sudoku. The most interesting thing about these puzzles is that you do not have to be a math whiz. That's right. You can stop cringing now. This suits both math lovers as well as non-math lovers. How is that possible? It may sound surprising but this game uses only logic and reasoning. In other words, common sense. If you desire a productive way to keep your mind busy while exercising your brain, Sudoku is the right choice. It not only helps you in improving your IQ but also helps you stay alert and awake. This simple path that you take towards your mental wellbeing can create big positive changes in your life on the long run. Another fascinating thing about Sudoku is that there is no set age limit for this game. Hence both young and old with an interest could enjoy solving Sudoku puzzles. The rules of Sudoku are simple. A grid with randomly filled numbers is provided. Your goal is to fill the grid with digits in such a manner that every column, row and 3*3 box has numbers from 1 to 9 without repeating any. The strategies that you may use could fit one puzzle but not the other. Sometimes the same tactics could be used in solving many different puzzles. It is up to you in discovering the route to complete the puzzle. It is no wonder that this fun filled game has become an addiction to millions so much so that some have even gone to the extent of collecting records of their solved puzzles to track their progress in books such as these. These puzzles help you come up with strategies you have never thought of, providing you the opportunity to think independently and come up with your own way of solving problems. Your analytical skills get sharpened as you complete Sudoku puzzles with different levels of difficulty as it is said to activate the left part of your brain which is responsible for logic and reasoning. You do not have to complete puzzles at a stretch or at one go. There is not timer to put you

under pressure. So you can take your own time, think thoroughly before making a move and solve the puzzle at your pace. The satisfaction and sheer joy that you get after completing a Sudoku puzzle cannot be described in words, it should be felt. To make things even easier, we are providing you with some picture puzzles too. This is to break the monotony and give you a chance to refresh your mind and come back with a fresh start to continue Sudoku from the point you have stopped. Sometimes you may overlook a small mistake in Sudoku which can make the whole puzzle go wrong. To prevent you from this, picture puzzles would direct your focus into a different direction. We provide you with answers to each puzzle so that you may have the chance to self-assess your abilities, reflect on your mistakes and even change your game tactics. What are you waiting for? Take a few minutes from your daily life to work on Sudoku. You will be surprised at the amount of positive energy circulating within you changing the way you look at problems in a much better way thus allowing you to have better control over things. We assure that you will never regret trying the IQ booster Sudoku.
