Intelligent Computing Techniques for Smart Energy Systems

Akhtar Kalam,Khaleequr Rehman Niazi,Amit Soni,Shahbaz Ahmed

Siddiqui,Ankit Mundra,2019-12-16 The book compiles the research works related to smart solutions concept in context to smart energy systems, maintaining electrical grid discipline and resiliency, computational collective intelligence consisted of interaction between smart devices, smart environments and smart interactions, as well as information technology support for such areas. It includes high-quality papers presented in the International Conference on Intelligent Computing Techniques for Smart Energy Systems organized by Manipal University Jaipur. This book will motivate scholars to work in these areas. The book also prophesies their approach to be used for the business and the humanitarian technology development as research proposal to various government organizations for funding approval.

Constraint Networks Christophe Lecoutre,2013-03-01 A major challenge in constraint programming is to develop efficient generic approaches to solve instances of the constraint satisfaction problem (CSP). With this aim in mind, this book provides an accessible synthesis of the author's research and work in this area, divided into four main topics: representation, inference, search, and learning. The results obtained and reproduced in this book have a wide applicability, regardless of the nature of the problem or the

constraints involved, making it an extremely user-friendly resource for those involved in this field.

Start Small, Stay Small Rob Walling, 2010 **Start Small, Stay Small** is a step-by-step guide to launching a self-funded startup. If you're a desktop, mobile or web developer, this book is your blueprint to getting your startup off the ground with no outside investment. This book intentionally avoids topics restricted to venture-backed startups such as: honing your investment pitch, securing funding, and figuring out how to use the piles of cash investors keep placing in your lap. This book assumes: You don't have \$6M of investor funds sitting in your bank account You're not going to relocate to the handful of startup hubs in the world You're not going to work 70 hour weeks for low pay with the hope of someday making millions from stock options There's nothing wrong with pursuing venture funding and attempting to grow fast like Amazon, Google, Twitter, and Facebook. It just so happened that most people are not in a place to do this. **Start Small, Stay Small** also focuses on the single most important element of a startup that most developers avoid: marketing. There are many great resources for learning how to write code, organize source control, or connect to a database. This book does not cover the technical aspects

developers already know or can learn elsewhere. It focuses on finding your idea, testing it before you build, and getting it into the hands of your customers.

Mastering Go Mihalis Tsoukalos, 2019-08-29 Publisher's Note:

This edition from 2019 is outdated and is not compatible with the latest version of Go. A new third edition, updated for 2021 and featuring the latest in Go programming, has now been published.

Key Features • Second edition of the bestselling guide to advanced Go programming, expanded to cover machine learning, more Go packages and a range of modern development

techniques • Completes the Go developer's education with real-world guides to building high-performance production systems •

Packed with practical examples and patterns to apply to your own development work • Clearly explains Go nuances and features to remove the frustration from Go development Book Description

Often referred to (incorrectly) as Golang, Go is the high-performance systems language of the future. Mastering Go,

Second Edition helps you become a productive expert Go programmer, building and improving on the groundbreaking first edition. Mastering Go, Second Edition shows how to put Go to work on real production systems. For programmers who already

know the Go language basics, this book provides examples, patterns, and clear explanations to help you deeply understand Go's capabilities and apply them in your programming work. The book covers the nuances of Go, with in-depth guides on types and structures, packages, concurrency, network programming, compiler design, optimization, and more. Each chapter ends with exercises and resources to fully embed your new knowledge. This second edition includes a completely new chapter on machine learning in Go, guiding you from the foundation statistics techniques through simple regression and clustering to classification, neural networks, and anomaly detection. Other chapters are expanded to cover using Go with Docker and Kubernetes, Git, WebAssembly, JSON, and more. If you take the Go programming language seriously, the second edition of this book is an essential guide on expert techniques. What you will learn

- Clear guidance on using Go for production systems
- Detailed explanations of how Go internals work, the design choices behind the language, and how to optimize your Go code
- A full guide to all Go data types, composite types, and data structures
- Master packages, reflection, and interfaces for effective Go programming
- Build high-performance systems networking code, including server and client-side applications

Interface with other systems using WebAssembly, JSON, and gRPC • Write reliable, high-performance concurrent code • Build machine learning systems in Go, from simple statistical regression to complex neural networks Who this book is for Mastering Go, Second Edition is for Go programmers who already know the language basics, and want to become expert Go practitioners.

Table of Contents • Go and the Operating System • Understanding Go Internals • Working with Basic Go Data Types • The Uses of Composite Types • How to Enhance Go Code with Data Structures • What You Might Not Know About Go Packages and functions • Reflection and Interfaces for All Seasons • Telling a Unix System What to Do • Concurrency in Go: Goroutines, Channels, and Pipelines • Concurrency in Go: Advanced Topics • Code Testing, Optimization, and Profiling • The Foundations of Network Programming in Go • Network Programming: Building Your Own Servers and Clients • Machine Learning in Go Review Mastering Go - Second Edition is a must-read for developers wanting to expand their knowledge of the language or wanting to pick it up from scratch -- Alex Ellis - Founder of OpenFaaS Ltd, CNCF Ambassador

Information Security and IT Risk Management Manish

Agrawal,Alex Campoe,Eric Pierce,2014-04-21 This new text provides students the knowledge and skills they will need to

compete for and succeed in the information security roles they will encounter straight out of college. This is accomplished by providing a hands-on immersion in essential system administration, service and application installation and configuration, security tool use, TIG implementation and reporting. It is designed for an introductory course on IS Security offered usually as an elective in IS departments in 2 and 4 year schools. It is not designed for security certification courses.

Functional Performance in Older Adults Bette R Bonder, Vanina Dal Bello-Haas, 2008-10-31 The ideal resource for rehabilitation professionals who are working with or preparing to work with older adults! It describes the normal aging process, illustrates how health and social factors can impede an aging person's abilities, and demonstrates how to develop mechanisms for maximizing the well-being of older adults.

The American Printer ,1902

The Palgrave Handbook of Positive Education Margaret L. Kern, 2021 The approaches outlined in this volume will help expand the narrow focus on academic success to include psychological well-being for students and educators alike. It is a must-read for anyone interested in how positive outcomes such as life

satisfaction, positive emotion, and meaning and purpose can be optimized in the educational settings. -- Judith Moskowitz, PhD MPH, Northwestern University Feinberg School of Medicine, USA, IPPA President 2019-2021

This open access handbook provides a comprehensive overview of the growing field of positive education, featuring a broad range of theoretical, applied, and practice-focused chapters from leading international experts. It demonstrates how positive education offers an approach to understanding learning that blends academic study with life skills such as self-awareness, emotion regulation, healthy mindsets, mindfulness, and positive habits, grounded in the science of wellbeing, to promote character development, optimal functioning, engagement in learning, and resilience. The handbook offers an in-depth understanding and critical consideration of the relevance of positive psychology to education, which encompasses its theoretical foundations, the empirical findings, and the existing educational applications and interventions. The contributors situate wellbeing science within the broader framework of education, considering its implications for teacher training, education and developmental psychology, school administration, policy making, pedagogy, and curriculum studies. This landmark collection will

appeal to researchers and practitioners working in positive psychology, educational and school psychology, developmental psychology, education, counselling, social work, and public policy. Margaret (Peggy) L. Kern is Associate Professor at the Centre for Positive Psychology at the University of Melbourne's Graduate School of Education, Australia. Dr Kern is Founding Chair of the Education Division of the International Positive Psychology Association (IPPA). You can find out more about Dr Kern's work at www.peggykern.org. Michael L. Wehmeyer is Ross and Mariana Beach Distinguished Professor of Special Education; Chair of the Department of Special Education; and Director and Senior Scientist, Beach Center on Disability, at the University of Kansas, United States. Dr Wehmeyer is Publications Lead for the Education Division of the International Positive Psychology Association (IPPA). Advances in Affective and Pleasurable Design Shuichi

Fukuda,2019-06-05 This book discusses the latest advances in affective and pleasurable design. It reports on important theoretical and practical issues, covering a wealth of topics including aesthetics in product and system design, design-driven innovation, affective computing, evaluation tools for emotion, Kansei engineering for products and services, and many more. Based on papers presented at the AHFE 2019 International Conference on Affective and Pleasurable Design, held on July 24–28, 2019, in Washington DC, USA, the book provides an inspiring guide for all researchers and professionals in the field of design, e.g. industrial designers, emotion designers, ethnographers, human–computer interaction researchers, human factors engineers, interaction designers, mobile product designers, and vehicle system designers.

Handbook of Game Theory and Industrial Organization,

Volume I Luis C. Corchón,Marco A. Marini,2018 The first volume of this wide-ranging Handbook contains original contributions by world-class specialists. It provides up-to-date surveys of the main game-theoretic tools commonly used to model industrial

organization topics. The Handbook covers numerous subjects in detail including, among others, the tools of lattice programming, supermodular and aggregative games, monopolistic competition, horizontal and vertically differentiated good models, dynamic and Stackelberg games, entry games, evolutionary games with adaptive players, asymmetric information, moral hazard, learning and information sharing models.

The Copywriting Sourcebook Andy Maslen,2010-02-11 It's OK knowing the theory, but when it's 9am and you have just been given until lunchtime to write some copy for a new sales email, landing page, press ad or brochure, what you really need is a shortcut. This book takes the grind out of planning and writing almost any type of copy by providing step-by-step advice on the best layouts, approaches and styles to suit everything from an email subject line to recruitment ad, direct mail letter or website. Prepared by one of the best copywriters in the B2B sector, this book also provides the reader with templates for 13 of the most common copywriting tasks for maximum effectiveness and speed.
