INTRODUCTION Now-a-days speed math system (like Vedic Mathematics , Trachtenberg System) are gaining widespread popularity among students as well as teachers. Speed math refers to faster methods and techniques to solve arithmetic calculation mentally. It saves considerable amount of time in competitive exam. So it is worthy to study speed math. In order to compute given calculation mentally, one need to recall right kind of specific method (shortcut) out of 1000's. Instead of doing so, i) Is it possible to compute any arithmetic operation (like addition, multiplication) quickly by using scientific approach ? ii) Is it possible to derive all methods in speed math by using unique principle ? iii) Is there any unique secret (principle) behind speed mathematics ? After researching speed math about 2-3 years, I realized that there is unique secret (principle) behind speed mathematics !! This book explains entire speed mathematics by using single principle and gives introduction to new number system called as global number system. It extends VM framework in some of the area like divisibility, n'th root. bringing different researcher together, boosting number sense / logical thinking in student.

***** Essence of mathematics lies in its freedom - Georg Cantor Pure mathematics is, in its way, the poetry of logical ideas. - Albert Einstein As far as the laws of mathematics refer to reality, they are not certain, and as far as they are certain, they do not refer to reality. - Albert Einstein “ In my opinion, all things in nature occur mathematically.” — René Descartes Mathematical Knowledge adds vigour to the mind, free it from prejudices & superstition - John Arbuthnot Some mathematician, I believe, has said that true pleasure lies not in the discovery of truth, but in the search for it. -Tolstoy Mathematics is the queen of science, and arithmetic the queen of mathematics. - Carl Friedrich Gauss Truth is ever to be found in the simplicity, and not in the multiplicity and confusion of things. - Isaac Newton ----- Generally, researcher invests its invaluable time on research. Research book in country like America etc are more than 200 \$. Though some idea, concepts seems trivial , but understand that even it takes lot of time to invent / discover. Example - decimal value system may seems simple to us, but it takes thousands of year to our ancient sages to invent the symbol for numbers & decimal value system. In true sense, researcher can understand the significance of other research, because it knows value of time that other researcher invest. This book is result of many years research. The price of book doesn't reflect value of time invested. Still by considering readers comment, price of book is changed. Now reader can enjoy the book at lower price.
