Lost in a Good Book Jasper Fforde,2004-02-24 The second installment in Jasper Fforde's New York Times bestselling series follows literary detective Thursday Next on another adventure in her alternate reality of literature-obsessed England—from the author of *The Constant Rabbit* The inventive, exuberant, and totally original literary fun that began with *The Eyre Affair* continues with New York Times bestselling author Jasper Fforde's magnificent second adventure starring the resourceful, fearless literary sleuth Thursday Next. When Landen, the love of her life, is eradicated by the corrupt multinational Goliath Corporation, Thursday must moonlight as a Prose Resource Operative of Jurisfiction—the police force inside the BookWorld. She is apprenticed to the man-hating Miss Havisham from Dickens's *Great Expectations*, who grudgingly shows Thursday the ropes. And she gains just enough skill to get herself in a real mess entering the pages of Poe's "The Raven." What she really wants is to get Landen back. But this latest mission is not without further complications. Along with jumping into the works of Kafka and Austen, and even Beatrix Potter's *The Tale of the Flopsy Bunnies*, Thursday finds herself the target of a series of potentially lethal coincidences, the authenticator of a newly discovered play by the Bard himself, and the only one who can prevent an unidentifiable pink sludge from engulfing all life on Earth. It's another genre-bending blend of crime fiction, fantasy, and top-drawer literary entertainment for fans of Douglas Adams and P. G. Wodehouse. Thursday's zany investigations continue with *The Well of Lost Plots*.

Polymer Colloids Rodney Priestley,Robert Prud'homme,2019-12-02 Academic and industrial research around polymer-based colloids is huge, driven both by the development of mature technologies, e.g. latexes for coatings, as well as the advancement of new materials and applications, such as building blocks for 2D/3D structures and medicine. Edited by two world-renowned leaders in polymer science and engineering, this is a fundamental text for the field. Based on a specialised course by the editors, this book provides the reader with an invaluable single source of reference. The first section describes formation, explaining basic properties of emulsions and dispersion polymerization, microfluidic approaches to produce polymer-based colloids and formation via directed self-assembly. The next section details characterisation methodologies from microscopy and small angle scattering, to surface science and simulations. The final chapters close with applications, including Pickering emulsions and molecular engineering for materials development. A comprehensive guide to polymer colloids, with contributions by leaders in their respective areas, this book is a must-have for researchers and practitioners working across polymers, soft matter and chemical and molecular engineering.

Acoustic Absorbers and Diffusers Trevor J. Cox,Peter D'Antonio,2009-01-26 Absorbers and diffusers are two of the main design tools for altering the acoustic conditions of rooms, semi-enclosed spaces and the outdoor environment. Their correct use is important for delivering high quality acoustics. Unique and authoritative, this book describes how to effectively measure, model, design and apply diffusers and absorbers. It is a resource for new and experienced acousticians, seeking an understanding of the evolution, characteristics and application of modern diffusers. Absorption is a more established technology and so the book blends traditional designs with modern developments. The book covers practical and theoretical aspects of absorbers and diffusers and is well illustrated with examples of installations and case studies. This new edition brings *Acoustic Absorbers and Diffusers* up-to-date with current research, practice and standards. New developments in measurement, materials, theory and practice since the first edition (published in 2004) are included. The sections on absorbers are extended to include more about noise control.

Recommendations on the Transport of Dangerous Goods United Nations,2020-01-06 The Manual of Tests and Criteria contains criteria, test methods and procedures to be used for classification of dangerous goods according to the provisions of Parts 2 and 3 of the United Nations Recommendations on the Transport of Dangerous Goods, Model Regulations, as well as of chemicals presenting physical hazards according to the Globally Harmonized System of Classification and Labelling of Chemicals (GHS). As a consequence, it supplements also national or international regulations which are derived from the United Nations Recommendations on the Transport of Dangerous Goods or the GHS. At its ninth session (7 December 2018), the Committee adopted a set of amendments to the sixth revised edition of the Manual as amended by Amendment 1. This seventh revised edition takes account of these amendments. In addition, noting that the work to facilitate the use of the Manual in the context of the GHS had been completed, the Committee considered that the reference to the Recommendations on the Transport of Dangerous Goods in the title of the Manual was no longer appropriate, and decided that from now on, the Manual should be entitled Manual of Tests and Criteria.

The papers are organized in sections on architecture/compilers, cluster computing, compilers and tools, scheduling, parallel algorithms, mobile computing, parallel applications, and interconnection networks.

Winds of Change Transportation Research Board,1991-02 Commercial aviation was one of the first industries affected by the controversial regulatory reforms that began in the 1970s. Beginning in 1975, administrative reforms of the Civil Aeronautics Board gave carriers greater freedom in discounting prices and serving new markets. The Airline Deregulation Act of 1978 removed restrictions on entry, pricing, and routes. Still unresolved in policy and practice, however, is the question of the appropriate role of government. In the interest of informing the public

debate about deregulation, the Executive Committee of the Transportation Research Board convened a committee of 15 experts to review air passenger service and safety since deregulation. The findings of the committee and its recommendations are presented in this report.

FREIGHTVISION - Sustainable European Freight Transport 2050 Stephan Helmreich,Hartmut Keller,2011-02-04 This book has been written on the basis of the research done between 2008 and 2010 as part of the European Commission funded FREIGHTVISION project. The “FREIGHTVISION - Freight Transport 2050 Foresight” project was funded by the Directorate General MOVE to design a long term vision for European freight transport in 2050 and to identify actions and research to progress appropriate freight transport measures in Europe. The project was carried out as a foresight process encompassing four conferences in which the project team identified and developed with the aid of more than 100 experts an action plan for securing long term freight transport in Europe. The book provides insights into the freight transport visions and Backcasts identified for 2035 and 2050, issues which need to be addressed and measures which were assessed to be part of future paths to assure an economical, environmental, and social freight transport system.

Hardcore Java Robert Simmons (Jr.),2004 Focuses on the little-touched but critical parts of the Java programming language that the expert programmers use. Learn about extremely powerful and useful programming techniques such as reflection, advanced data modeling, advanced GUI design, and advanced aspects of JDO, EJB, and XML-based web clients. This unique book reveals the true wizardry behind the complex and often mysterious Java environment. --O'Reilly web site

Fishery Products Hartmut Rehbein,Jorg Oehlenschlager,2009-11-16 Food quality and safety issues continue to dominate the press, with most food companies spending large amounts of money to ensure that the food quality and assessment procedures in place are adequate and produce good and safe food. This holds true for companies and laboratories responsible for the processing of fish into various products, those responsible for researching safe new products, and departments within other companies supporting these functions. Fishery Products brings together details of all the major methodologies used to assess the quality of fishery products in the widest sense. Subject coverage of this important book includes chapters on assessment of authenticity, and several chapters on quality assessment using various methods, such as: Texture measurement Electronic nose and tongue NMR Colour measurement This timely volume will serve as a vital tool for all those working in the processing of fishery and aquaculture products: including laboratory personnel working in regulatory bodies, food quality control personnel, food scientists, food technologists, nutritionists, seafood trade bodies, seafood labelling regulatory bodies, government food protection agencies and environmental health personnel. Libraries in research establishments and universities where food science, food technology, nutrition, aquaculture, fisheries and biological sciences are studied and taught should have copies of this important publication on their shelves.
