Privacy and Security in the Digital Age Michael Friedewald, Ronald J Pohoryles, 2016-01-13 Privacy and data protection are recognized as fundamental human rights. Recent developments, however, indicate that security issues are used to undermine these fundamental rights. As new technologies effectively facilitate collection, storage, processing and combination of personal data government agencies take advantage for their own purposes. Increasingly, and for other reasons, the business sector threatens the privacy of citizens as well. The contributions to this book explore the different aspects of the relationship between technology and privacy. The emergence of new technologies threaten increasingly privacy and/or data protection; however, little is known about the potential of these technologies that call for innovative and prospective analysis, or even new conceptual frameworks. Technology and privacy are two intertwined notions that must be jointly analyzed and faced. Technology is a social practice that embodies the capacity of societies to transform themselves by creating the possibility to generate and manipulate not only physical objects, but also symbols, cultural forms and social relations. In turn, privacy describes a vital and complex aspect of these social relations. Thus technology influences people's understanding of privacy, and people's understanding of privacy is a key factor in defining the direction of technological development. This book was originally published as a special issue of *Innovation: The European Journal of Social Science Research*.

Criminology of the Domestic Pamela Davies, Michael Rowe, 2023-06-29 Bringing together a range of perspectives, this book establishes a criminology of the domestic, paying particular attention to emerging spatial and relational reconfigurations. We move beyond criminologies of public and urban domains to consider over-looked non-public locales, and crimes and harms that occur in the home and other private spaces. Developed in the context of the COVID-19 lockdowns, where distinctions between public and private became increasingly untenable, the book considers how the pandemic has accelerated new patterns of behaviour, enabled by technology and shifting social relations. Drawing on a range of criminological topics, including victimisation, offending, property and violent crime, consumption, deviance and leisure, and zemiology,

the book argues that the domestic sphere, and its relation to the public realm, needs to be more carefully conceptualised if criminology is to respond to new spatial and relational dimensions of changing lifestyles. An accessible and compelling read, this book will appeal to students and scholars of criminology, sociology, politics, geography, history, gender, surveillance and security, and all those interested in a criminology of the domestic sphere.

Sauser, 2014-10-01 This edited book is intended to address the need for an updated look at the HRM legal and regulatory environment. Contrary to existing books which address legal issues in HRM from a narrower focus or specific issue (like sexual harassment, performance appraisal or employment termination), this book provides a comprehensive and in-depth look at legal issues, regulations and laws which govern all aspects of human resource management—recruitment, selection, placement, performance management (i.e., employee training and development), benefits and compensation—and specific issues such as job analysis, sexual harassment, and the like. The contributors to this book offer their insight derived from their own research and practical experience with the HRM legal and regulatory environment/world of work. More specifically, the contributors examine, analyze and discuss challenges, issues and opportunities related to HRM legal and regulatory issues and the implications for employees and their organizations while emphasizing the importance of navigating such laws and regulations to the employment cycle and toward sustainable competitive advantage in today's and tomorrow's organizations.

Domestic fortress Rowland Atkinson, Sarah Blandy, 2016-11-04 Today's home is a kind of fortress that tells us as much about our need for privacy as it does about ensuring our security. Fortress homes, gated communities and elaborate defensive systems have become everyday features of urban life, highlighting the depth of fear as well as the desire for prestige and social display and the ideological strength of home ownership. This book offers a fresh analysis of our homes, our demands for security and anxieties about invasion, loss and finding seclusion in a worrying and divided world. Using a rich range of sources from cutting-edge research to media accounts, the book considers the fantasies and realities of dangers to the contemporary home and its inhabitants, and details the extreme measures now used in the pursuit of total safety.

Journalism and Free Speech John Steel, 2013-06-17 Journalism and Free Speech brings together for the first time an historical and theoretical exploration of journalism and its relationship with the idea of free speech. Though freedom of the press is widely regarded as an essential ingredient to democratic societies, the relationship between the idea of freedom of speech and the practice of press freedom is one that is generally taken for granted. Censorship, in general terms is an anathema. This book explores the philosophical and historical development of free speech and critically examines the ways in which it relates to freedom of the press in practice. The main contention of the book is that the actualisation of press freedom should be seen as encompassing modes of censorship which place pressure upon the principled connection between journalism and freedom of speech. Topics covered include: The Philosophy of Free Speech Journalism and Free Speech Press Freedom and the Democratic Imperative New Media and the Global Public Sphere Regulating Journalism Privacy and Defamation National Security and Insecurity Ownership News, Language Culture and Censorship This book introduces students to a wide range of issues centred around freedom of speech, press freedom and censorship, providing an accessible text for courses on journalism and mass media--
