Model Rules of Professional Conduct American Bar Association. House of Delegates, Center for Professional Responsibility (American Bar Association), 2007 The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Silver Screen to Digital Carlo Montanaro,2019-12-03 An era has ended. After one hundred and twenty-five years, a change has taken place in cinemas. The thousands of figures formed by silver and coloured pigments can no longer be viewed through transparent film, instead, everything has become digital, compressed, virtual and built into the rapid alternation of millions (hopefully, for quality's sake) of dots, or pixels within a very neat and minuscule grid. But projection is just the last link in a chain that is transforming the most direct language invented by humanity over the centuries. The other links – shooting, editing, special effects, re-elaboration and sound reproduction – have by now undergone radical transformations that have often signified progress. Perhaps, it is worth the trouble, then, having accepted this transformation-revolution once and for all, to understand where we started out from, how cinematographic language was born and how its grammar first and later its syntax evolved thanks to technological development. Without lightweight equipment for sound recording, sensitive emulsions, portable and compact lighting, it would not have been possible, at the end of the 50s, for example, to create identifiable currents of experimentation and concept under such titles as free cinema or nouvelle vague, which were largely based on footage from life and no longer reconstructed in the studio. That which filmmakers today can

achieve even more effectively thanks to a range of digital technologies, paradoxically, involves working with even more-minimal equipment such as a smartphone in front of green or blue screens, against absolutely virtual backgrounds. In short: no more silver and more and more pixels.
