Betting Game Heather M. O'Connor, 2015-10-20 Jack's a star player on an elite soccer team along with his brother, Alex. The Lancers are on top of the league, even favored to win the National Championship. But the game's about to change. A slick bookie wins Jack's friendship and introduces him to illegal betting. Before long, Jack is hooked on the adrenaline rush, and early wins convince him that gambling could make him rich. Meanwhile, an ever-widening rift is forming between the two brothers. Suddenly, Jack's "system" fails and his luck runs out. How could a few losses pile up to a gut-kicking ten grand? When he can't pay, the bookie gives Jack one way out—throw the National Championship. But can he betray his brother, his team and himself?

*Secrets of the Soil* Peter Tompkins,Christopher Bird,1989 This book,a fascinating companion to *The Secret Life of Plants* by the same authors, tells the story of the innovative, nontraditional, often surprising things that certain scientists, farmers, and mystics are doing to prevent the slow degradation of our planet. For example, using the techniques of Rudolf Steiner's biodynamic agriculture with its reliance on ethereal forces from the planets,Dan Carlson's growth stimulating Sonic Bloom, and rock dust fertilizer to revitalize depleted soils; or gardening with the help of truly amazing new technologies to reverse serious agricultural problems.The authors illustrate,in a truly enlightening and convincing manner, the pivotal role that the natural elements play in our lives, and the necessity of cultivating and sustaining a relationship with one most basic of them the soil.

*The Year of No Nonsense* Meredith Atwood,2019-12-17 In the vein of *How to Stop Feeling Like Sh\*t*, a practical guide to acknowledging and getting rid of the nonsense and bs in your life Exhausted and overworked lawyer, triathlete, wife, and mom Meredith Atwood decided one morning that she'd had it. She didn't take her kids to school. She didn't go to work. She didn't go to the gym. When she pulled herself out of bed hours later than she should have, she found a note from her husband next to two empty bottles of wine and a stack of unpaid bills: You need to get your sh\*t together. And that's what Meredith began to do, starting with identifying the nonsense in her life that was holding her back: saying yes too much, keeping frenemies around, and more. In *The Year of No Nonsense*, Atwood shares what she learned, tackling struggles with work, family, and body image, and also willpower and time management. Ultimately, she's the tough-as-nails coach /slash/ best friend who shares a practical plan for identifying and getting rid of your own nonsense in order to move forward and live an authentic, healthy life. From recognizing lies you believe about yourself and your abilities, to making a nonsense list and developing a no nonsense blueprint, this book walks you through reclaiming yourself with grit and determination, step by step. With targeted, practical chapters to help you stop feeling stuck and get on with your life, *The Year of No*

Nonsense is equal parts girlfriend and been-there-done-that. The best part? Like any friend, she helps you get to the other side.

The Art of Assembly Language, 2nd Edition Randall Hyde, 2010-03-01 Assembly is a low-level programming language that's one step above a computer's native machine language. Although assembly language is commonly used for writing device drivers, emulators, and video games, many programmers find its somewhat unfriendly syntax intimidating to learn and use. Since 1996, Randall Hyde's *The Art of Assembly Language* has provided a comprehensive, plain-English, and patient introduction to 32-bit x86 assembly for non-assembly programmers. Hyde's primary teaching tool, High Level Assembler (or HLA), incorporates many of the features found in high-level languages (like C, C++, and Java) to help you quickly grasp basic assembly concepts. HLA lets you write true low-level code while enjoying the benefits of high-level language programming. As you read *The Art of Assembly Language*, you'll learn the low-level theory fundamental to computer science and turn that understanding into real, functional code. You'll learn how to: -Edit, compile, and run HLA programs -Declare and use constants, scalar variables, pointers, arrays, structures, unions, and namespaces -Translate arithmetic expressions (integer and floating point) -Convert high-level control structures This much anticipated second edition of *The Art of Assembly Language* has been updated to reflect recent changes to HLA and to support Linux, Mac OS X, and FreeBSD. Whether you're new to programming or you have experience with high-level languages, *The Art of Assembly Language, 2nd Edition* is your essential guide to learning this complex, low-level language.

**Neutrino Physics and Astrophysics** Ettore Fiorini, 2013-03-13 Neutrino '80 held at the Ettore Majorana Center for Scientific Culture in Erice, was the tenth of a series of International Conferences on Neutrino Physics and Astrophysics. It also marked the fiftieth anniversary of the first mention, by Wolfgang Pauli, of a neutral particle emitted in beta decay. The conference occurred at a very propitious time in neutrino physics: the possibility of a non-zero neutrino mass and of neutrino oscillations has obvious implications of great importance in neutrino astrophysics and cosmology, as well as in the grand unified theories. In order to encourage contacts and discussions among the various experts in different branches of neutrino physics and astrophysics, the conference was based only on plenary sessions, and mainly on review talks. Short communications were accepted only if they bore new and unexpected results which could not be covered in the appropriate review. I would like to thank the participants for their understanding of this often unpopular rule. I take this opportunity to express my gratitude to the members of the International Advisory Committee, to George Marx, Secretary of the on-going International Neutrino Committee, to the rapporteurs and session chairmen. Thanks are especially due to Antonino Zichichi, Director of the Ettore Majorana Centre for Scientific Culture, for the warm and generous hospitality extended to us, and to Alberto Gabriele and Pinola Savalli for their untiring efforts to make our stay in Erice as enjoyable as fruitful.
