**Sound Studio** Alec Nisbett, 2003-07-07 This classic work has inspired and informed a whole generation of artists and technicians working in all branches of the audio industry. Now in its seventh edition, *The Sound Studio* has been thoroughly revised to encompass the rapidly expanding range of possibilities offered by today's digital equipment. It now covers: the virtual studio; 5.1 surround sound; hard drive mixers and multichannel recorders; DVD and CD-RW. Alec Nisbett provides encyclopaedic coverage of everything from acoustics, microphones and loudspeakers, to editing, mixing and sound effects, as well as a comprehensive glossary. Through its six previous editions, *The Sound Studio* has been used for over 40 years as a standard work of reference on audio techniques. For a new generation, it links all the best techniques back to their roots: the unchanging guiding principles that have long been observed over a wide range of related media and crafts. *The Sound Studio* is intended for anyone with a creative or technical interest in sound - for radio, television, film and music recording - but has particularly strong coverage of audio in broadcasting, reflecting the author's prolific career.

*TechTV's Secrets of the Digital Studio* James Maguire, Jim Louderback, 2002 Learn to turn your PC into a recording studio! *TechTV's Secrets of the Digital Studio: Insider's Guide to Desktop Recording* enables audio do-it-yourselfers to turn a home PC into a nearly professional recording studio and provides the guidance necessary to use this desktop studio to produce high quality sound. This book covers a wide array of basic (and not so basic) audio techniques, from recording and mixing to burning CDs to developing a home set-up.

**After the Guns Fall Silent** Shawn Roberts, Jody Williams, 1995-01-01 Years after peace treaties have been signed and military conflict is nominally over, anti-personnel mines continue to claim innocent lives. This text offers data showing that landmines victimize civilians in direct contravention of the Geneva convention and examines the impact landmines have on people, on their communities and on their outlook and view of life. The report, commissioned by the VVAF, examines the consequences of landmine use on post-conflict reconstruction and development, on refugee movement and resettlement and on the environment. It also investigates mine clearance and mine awareness and medical, rehabilitative and psychological costs. Using original research, the report uses case studies from countries including Angola, Mozambique, Cambodia and the former Yugoslavia. Scholarly and accurate analysis combines with people's own words and real personal stories to present a detailed evaluation of the effect of this most potent of weapons. This work is published by the Vietnam Veterans of America Foundation and distributed in the UK and Ireland by
