*The Routledge Handbook of Comparative Economic Systems* Bruno Dallago, Sara Casagrande, 2022-12-19 The Routledge Handbook of Comparative Economic Systems examines the institutional bases of economies, and the different ways in which economic activity can function, be organized and governed. It examines the complexity of this academic and research field, assessing the place of comparative economic studies within economics, paying due attention to future perspectives, and presenting critically important questions, analytical methods and relative approaches. This complements the recent revival of the systemic view of economic governance, which was accelerated by the COVID-19 pandemic and likely even more the renewed East-West clash epitomized by the Russian invasion of Ukraine and the West's reaction to it. The Handbook is divided into five parts. Each part deals with an issue of relevance for the discipline. The first and second parts look at the subject, content and approach of the discipline and its comparative method. The third part looks at the idiosyncratic nature of different economic systems and their constituent elements. The fourth part considers the outcomes that different economic systems generate and how these outcomes change following the evolution and transformation of economic systems. The last part takes stock and looks ahead at the challenges, from a theoretical and applied perspective, and the exogenous and endogenous factors promoting the advancement of the discipline, including the interaction between and competition among varied approaches and opposing paradigms. The Handbook brings together leading international contributors to reflect on the relevant debates and case or country studies, provides a balanced overview of the results achieved and current knowledge, as well as evolving issues and new fields of research. The book provides researchers, students and analysts with a complete, critical and forward-looking presentation and analysis of the content, development, challenges and perspectives of comparative economic studies.

**Food Waste Reduction and Valorisation** Piergiuseppe Morone, Franka Papendiek, Valentina Elena Tartiu, 2017-04-26 This book adds a new dimension to the sustainability assessment of food waste reduction and valorisation: policy analysis. Featuring a transdisciplinary analysis by key experts in the field, it identifies the drivers of change in food-waste reduction and valorisation technologies by looking, for example, at the regulatory framework and at policy actions undertaken by local and global actors. The book explores the development of regulations and policies for food-waste prevention, management, and valorisation at a global as well as European Union level. It also discusses the notion of food waste in legal terms and investigates the effects of the lack of a standard, universal definition of food waste on the efficient use of by-products, promising processes and products for technological and commercial exploitation. Utilising mathematical mapping methods to assess food consumption impacts and providing supply chain models that allow the testing of consumption scenarios, the book goes on to discuss a series of emerging technologies (tested at lab scale and/or pilot scale) and opportunities for the valorisation of food waste.

**ICT, Cities, and Reaching Positive Peace** Ali Cheshmehzangi,2022-07-18 This book is the first attempt to explore the use and application of Information and Communication Technology (ICT) and related smart technologies in cities and for the sole purpose of reaching positive peace. The everyday usage of digital technologies in cities encourages us to study the benefits, co-benefits, disadvantages, and threats of ICT application in cities and urban environments. The continuous growth of digital technologies and their growing demand in everyday urban practices and systems are already known to scholars, practitioners, and policy-makers. However, this book explores whether or not such applications and usage help us reaching positive peace. This approach is novel in the field of urban studies, allowing us to identify and highlight best practices, successes, and failures of ICT application to meet positive peace pillars. The scope of the book highlights our focus on positive peace and its eight pillars, mainly how they are meant to be achieved in cities and urban areas. With an analytical view on the topic, we aim to reflect on the systematic features of urban systems, using positive peace pillars as the primary targets. We believe ICT application and usage in cities could be more directive and beneficial to reach peace and prosperity to achieve such a goal. Therefore, this book provides a holistic guideline and coverage of ICT use for positive peace pathways and peace-building practices. We hope the findings of the book help researchers and policy-makers to come up with novel and integrated strategies, ensuring that our everyday usage of digital technologies, ICT, and smart tools, are more meaningful and people-oriented.

**Advanced Digital Marketing Strategies in a Data-Driven Era** Saura, Jose Ramon,2021-06-25 In the last decade, the use of data sciences in the digital marketing environment has increased. Digital marketing has transformed how companies communicate with their customers around the world. The increase in the use of social networks and how users communicate with companies on the internet has given rise to new business models based on the bidirectionality of communication between companies and internet users. Digital marketing, new business models, data-driven approaches, online advertising campaigns, and other digital strategies have gathered user opinions and comments through this new online channel. Advanced Digital Marketing Strategies in a Data-Driven Era contains high-quality research that presents a holistic overview of the main applications of data sciences to digital marketing and generates insights related to the creation of innovative data mining and knowledge discovery techniques applied to traditional and digital marketing strategies. The book analyzes how companies are adopting these new data-driven methods and how these strategies influence digital marketing. Discussing topics such as digital strategies, social media marketing, big data, marketing analytics, and data sciences, this book is essential for marketers, digital marketers, advertisers, brand managers, managers, executives, social media analysts, IT specialists, data scientists, students, researchers, and academicians in the field.
