Marketing the Blue and Gray Lawrence A. Kreiser, Jr.,2019-06-12 Lawrence A. Kreiser, Jr.'s Marketing the Blue and Gray analyzes newspaper advertising during the American Civil War. Newspapers circulated widely between 1861 and 1865, and merchants took full advantage of this readership. They marketed everything from war bonds to biographies of military and political leaders; from patent medicines that promised to cure almost any battlefield wound to "secession cloaks" and "Fort Sumter" cockades. Union and Confederate advertisers pitched shopping as its own form of patriotism, one of the more enduring legacies of the nation's largest and bloodiest war. However, unlike important-sounding headlines and editorials, advertisements have received only passing notice from historians. As the first full-length analysis of Union and Confederate newspaper advertising, Kreiser's study sheds light on this often overlooked aspect of Civil War media. Kreiser argues that the marketing strategies of the time show how commercialization and patriotism became increasingly intertwined as Union and Confederate war aims evolved. Yankees and Rebels believed that buying decisions were an important expression of their civic pride, from "Union forever" groceries to "States Rights" sewing machines. He suggests that the notices helped to expand American democracy by allowing their diverse readership to participate in almost every aspect of the Civil War. As potential customers, free blacks and white women perused announcements for war-themed biographies, images, and other material wares that helped to define the meaning of the fighting. Advertisements also helped readers to become more savvy consumers and, ultimately, citizens, by offering them choices. White men and, in the Union after 1863, black men might volunteer for military service after reading a recruitment notice; or they might instead respond to the kind of notice for "draft insurance" that flooded newspapers after the Union and Confederate governments resorted to conscription to help fill the ranks. Marketing the Blue and Gray demonstrates how, through their sometimes-messy choices, advertising pages offered readers the opportunity to participate-or not-in the war effort.

Popular Culture: 1980–1999 Jilly Hunt,2012 From Margaret Thatcher to Bill Clinton, politics played a role in the popular culture of this era, while new technology led to video game arcades popping up anywhere teenagers might be lurking. Early game consoles found their way into many homes, as did the records, cassette tapes and compact discs of Madonna, Michael Jackson, Prince and U2.

News Media and Power in Russia Olessia Koltsova,2006-09-27 The end of communist rule in the Soviet Union brought with it a brave new world of media and commerce. Formerly state-owned enterprises were transformed, often through private ownership, and new corporations sprung up overnight to take advantage of the new atmosphere of freedom. Until now, most research on media and news production in Russia has focused on the scope of government control and comparisons with the communist era. However, extra-governmental controls and the challenges of operating in a newly capitalist environment have been just as important – if not more so – in the formation of the new media climate. Filling the gap in the literature, this book examines the various agents who ‘make’ the news, and discusses the fierce struggle among the various agents of power involved. Drawing on existing theories and scholarship, the book provides a wealth of detail on the actual daily practices of news production in Russia. Original research is combined with compelling first-hand accounts of news production and dissemination to provide an incisive look at the issues and power structures Russian journalists face on a daily basis.
