Right Brain/Left Brain President Mary Lou Décosterd,2010-04-09 This intriguing analysis examines an aspect of President Obama that falls outside of his ethnic background, his political career, or policies: how his unique leadership style comes from his extraordinary ability to use both halves of his brain to maximum potential. Right Brain/Left Brain President: Barack Obama's Uncommon Leadership Ability and How We Can Each Develop It is an inspirational guide to leadership as it should be practiced, conveyed through an up-close look at the man who sets the new leadership bar. Author Mary Lou Décosterd uses her Right Brain/Left Brain Leadership Model to frame Barack Obama's leadership skill sets. Her book shows that Obama's unique brand of leadership is the result of his extraordinary ability to leverage full-brain potential in the ways he thinks, decides, and acts. Right Brain/Left Brain President examines Obama's life and the Obama phenomenon, analyzing how he rose to prominence so quickly and what that teaches us. The president is used as an example of the ten full-spectrum behaviors—the must-have leadership skills—that make one an extraordinary leader. To help readers emulate the Obama model and become the most consummate leaders possible, Décosterd discusses how each of us can learn to lead from both right and left brain abilities.

Latin Loanwords in Ancient Greek Eleanor Dickey, 2023-05-31 Why, when, and how did speakers of ancient Greek borrow words from Latin? Which words did they borrow? Who used Latin loanwords, and how? Who avoided them, and why? How many words were borrowed, and what kind of word? How long did the loanwords survive? Until now, attempts to answer such questions have been based on incomplete and often misleading evidence, but this study offers the first comprehensive collection of evidence from papyri, inscriptions, and literature from the fifth century BC to the sixth century AD. That collection – included in the book as a lexicon of Latin loanwords – is examined using insights from linguistic work on modern languages to provide new answers that

often differ strikingly from earlier ones. The analysis is accessibly presented, and the lexicon offers a firm foundation for future work in this area.

Research Anthology on Bilingual and Multilingual Education Management Association, Information Resources, 2021-10-29 Given the boost in global immigration and migration, as well as the emphasis on creating inclusive classrooms, research is turning to the challenges that teachers face with the increasing need for bilingual and multilingual education. The benefits of bilingual education are widespread, allowing students to develop important cognitive skills such as critical thinking and problem solving as well as opening further career opportunities later in life. However, very few resources are available for the successful practice and implementation of this education into the curriculum, with an even greater lack of appropriate cultural representation in the classroom. Thus, it is essential for educators to remain knowledgeable on the emerging strategies and procedures available for making bilingual and multilingual education successful. The Research

Anthology on Bilingual and Multilingual Education is a comprehensive reference source on bilingual and multilingual education that offers the latest insights on education strategy and considerations on the language learners themselves. This research anthology features a diverse collection of authors, offering valuable global perspectives on multilingual education. Covering topics such as gamification, learning processes, and teaching models, this anthology serves as an essential resource for professors, teachers, pre-service teachers, faculty of K-12 and higher education, government officials, policymakers, researchers, and academicians with an interest in key strategy and understanding of bilingual and multilingual education.

Shari'a Scripts Brinkley Messick, 2018-01-02 A case study in the textual architecture of the venerable legal and ethical tradition at the center of the Islamic experience, Shari'a Scripts is a work of historical anthropology focused on Yemen in the early twentieth century. There—while colonial regimes, late Ottoman reformers, and early nationalists wrought decisive changes to the legal status of the shari'a, significantly narrowing its sphere of relevance—the Zaydī school of jurisprudence, rooted in highland Yemen for a millennium, still held sway. Brinkley Messick uses the richly varied writings of the Yemeni past to offer a uniquely comprehensive view of the shari'a as a localized and lived phenomenon. Shari'a Scripts reads a wide spectrum of sources in search of a new historical-anthropological perspective

on Islamic textual relations. Messick analyzes the shari‘a as a local system of texts, distinguishing between theoretical or doctrinal juridical texts (or the “library”) and those produced by the shari‘a courts and notarial writers (termed the “archive”). Attending to textual form, he closely examines representative books of madrasa instruction; formal opinion-giving by muftis and imams; the structure of court judgments; and the drafting of contracts. Messick’s intensive readings of texts are supplemented by retrospective ethnography and oral history based on extensive field research. Further, the book ventures a major methodological contribution by confronting anthropology’s longstanding reliance upon the observational and the colloquial. Presenting a new understanding of Islamic legal history, *Shari‘a Scripts* is a groundbreaking examination of the interpretative range and historical insights offered by the anthropologist as reader.

Resisting Corporate Corruption Stephen V. Arbogast,2013-03-11 This text's objective is to teach business ethics in a manner very different from the conceptual/legal frameworks which dominate graduate schools. The book offers 25 case studies that cover a full range of business practice, controls and ethics issues. The cases are framed to instruct students in early identification of ethics issues, and how to work such problems effectively within corporate organizations. By pursuing these case studies, students should emerge with a practical toolkit that better enables them to follow their moral compass. The cases provide examples of how executives can embed more ethical approaches inside alternative business strategies, redirect pressure and intimidation to parties better positioned to resist, and use the

firm's controls structure to counteract corrupt practices. Specific cases take up the circumstances of whistleblowers and the changing protections afforded by recent laws. Fourteen case studies examine Enron's crossing of various ethical lines from 1987-2001. Eleven new cases examine key financial crisis moments at Countrywide, Fannie Mae, Citibank, Goldman Sachs and PriceWaterhouseCoopers. Interpretive essays discuss the nature of sound financial controls systems, the lessons of Enron, and the extent to which the financial crisis shows Enron's issues to be unresolved.

The War in the Country Thomas Pawlick, 2009 Rural life in North America has changed dramatically over the past few decades. Corporate-backed factory farms, mining interests, and large-scale tourist developments have replaced the family farm, and the small farmers who remain are strangled by debt, hounded by government, and harassed by regulations. Rural First Nations face a similar struggle, as do small-town businesses. However, those who seek to make rural life extinct are meeting with some fierce resistance. In this book, a writer who is a farmer himself uses the microcosm of his own rural community to portray the groups involved and the battles they are fighting. The outcome of these clashes will decide not only the future of rural life but also the quality and sustainability of our food, our water, our soil, and our air.--Jacket.

Schwartz wrote music for films in the 1940s--with Academy Award nominations for *They're Either Too Young or Too Old* and *A Gal in Calico*--produced two popular movie musicals--*Cover Girl* and *Night and Day*--and was among the first songwriters to work in the new medium of television. The author describes his creative process and includes behind-the-scenes stories of each of his major musicals.

Lingua Franca in the Mediterranean J. E. Wansborough, 2013-12-16 The subject of this study is the language of commerce and diplomacy during the period from 1500 BCE to 1500 CE. Based on texts of chancery provenance, its aim is the identification of a linguistic sub-system that effected and informed the major channel of international relations. The standard procedures of contact and exchange generated a format that facilitated inter-lingual transfer of concepts and terms. *Lingua Franca* refers to the several natural languages that served as vehicle in the transfer, but also to the format itself.

Gender Scripts in Medicine and Narrative Angela Laflen, 2010-06-09 Gender is an exciting area of current research in the medical humanities, and by combining the study of medical narratives with theories of gender and sexuality, the essays in *Gender Scripts in Medicine and Narrative* illustrate the power of gender stereotypes to shape the way medicine is practiced and

perceived. The chapters of *Gender Scripts in Medicine and Narrative* investigate gendered perceptions and representations of healers and patients in fiction, memoir, popular literature, poetry, film, television, the history of science, new media, and visual art. The fourteen chapters of *Gender Scripts in Medicine and Narrative* are organized into four cohesive sections. These chapters investigate the impact of gender stereotypes on medical narratives from a variety of points of view, considering narratives from diverse languages, time periods, genres, and media. Each section addresses some of the most pressing and provocative issues in theories of gender and the medical humanities: I. Gendering the Medical Gaze and Pathology; II. Monitoring Race through Reproduction; III. Rescripting Trauma and Healing; and IV. Medical Masculinities. Along with these sections, *Gender Scripts in Medicine and Narrative* features a preface by Rita Charon, MD, PhD, Director and Founder, The Program in Narrative Medicine, Columbia University, a foreword by Marcelline Block, and an introduction by Angela Laflen. This collection takes a truly interdisciplinary look at the topic of gender and medicine, and the impressive group of contributors to the anthology represent a wide range of academic fields of inquiry, including medical humanities, bioethics, English, modern languages, women's studies, film theory, postcolonial theory, art history, the history of science and medicine, new media studies, theories of trauma, among others. This approach of crossing boundaries of genre and discipline makes the volume accessible to scholars

who are concerned with narrative, gender, and/or medical ethics. [Click here](#) for a recent review of this title.
