Sweet Home Wendy Erskine,2019-06-27 'A gripping, wonderfully understated book that oozes humanity, emotion and humour.' Guardian Winner of the 2020 Butler Literary Award Shortlisted for the Edge Hill Prize 2019 Shortlisted for the Republic of Consciousness Prize 2019 Longlisted for the Gordon Burn Prize and the Sunday Times Audible Short Story Award 2019 'Wendy Erskine's first collection, Sweet Home . . . is every bit as good as her early stories in the always astute Stinging Fly magazine promised.' Jon McGregor, New Statesman Set in the author's native Belfast, the ten stories in Sweet Home lay bare the heartbreak and quiet tragedies that run under the surface of everyday lives. A lonely woman is fascinated by her niqab-wearing neighbours; a middle-aged teacher becomes obsessed with a young Gaelic football player; and an employer covers for his two employees caught having sex in a public toilet. Wendy Erskine offers perfectly formed, brilliantly observed portraits of people trying to carve out a life for themselves, all the while being buffeted by the loss, grief and regret that come their way. Warm, compassionate and funny, Sweet Home captures life in contemporary East Belfast, in all of its forms. A Book of the Year in the Guardian, The White Review, Observer, New Statesman, TLS.

The 1/2 Lot Project: A 5,000 Sq Ft Life Dale Stubbart, This book details the design for a smaller living space. You can adjust the plans to meet your desires and needs. If this book says to do something one way and you want to do it another way, investigate how to do it another way and then do it that way. Hopefully this idea will encourage your own ideas. And, hopefully, it will more than halve the carbon footprint of a typical home in the US.5,000 square feet may sound like a lot of space, until you realize we're talking about land area and that 10,000 sq ft is the typical size of a city residential lot. 10,000 sq ft is a little less than 1/4 acre. So, 5,000 sq ft would be half that much or about 1/10 acre. Since we're reducing the land area by 1/2, we should also reduce the house and the car by 1/2. The Not So Big House reduced houses to about 2000 sq ft. In this project we will go even further, reducing the house to 500 sq ft. Many starter homes, modulars, trailer homes, and two-bedroom apts are 1000 sq ft. Large RV's and Houseboats are about 1000 sq ft or less. 500 sq ft is the size of a small 1 bedroom apt or a large studio apt. We could make the house 1000 sq ft by giving it a basement or a second floor, but we want to reduce the amount of house we have to heat, cool, clean, and maintain. Some of things I've designed to maximize the space in your home and garage have yet to be invented. If they are never invented, there is still plenty of room in both the house and the garage. The inventions just give you that much more space. One of these inventions is the car. The car is a modular car, meaning it comes in pieces or modules which can be easily taken apart and put back together. The main module or cab of the car holds 2 people and a few groceries. Most of the time, the only module you need is the main module. The other two modules are a back seat, and an enclosed truck bed or van module. You can even attach all three modules together and still have a car that is small enough to fit easily in a 1 car garage.
