Encyclopedia of Pestilence, Pandemics, and Plagues [2 volumes] Joseph P. Byrne, 2008-09-30 Editor Joseph P. Byrne, together with an advisory board of specialists and over

100 scholars, research scientists, and medical practitioners from 13 countries, has produced a uniquely interdisciplinary treatment of the ways in which diseases pestilence, and plagues have affected human life. From the Athenian flu pandemic to the Black Death to AIDS, this extensive two-volume set offers a sociocultural, historical, and medical look at infectious diseases and their place in human history from Neolithic times to the present. Nearly 300 entries cover individual diseases (such as HIV/AIDS, malaria, Ebola, and SARS); major epidemics (such as the Black Death, 16th-century syphilis, cholera in the nineteenth century, and the Spanish Flu of 1918-19); environmental factors (such as ecology, travel, poverty, wealth, slavery, and war); and historical and cultural effects of disease (such as the relationship of Romanticism to Tuberculosis, the closing of London theaters during plague epidemics, and the effect of venereal disease on social reform). Primary source sidebars, over 70 illustrations, a glossary, and an extensive print and nonprint bibliography round out the work.

Mastering Purchasing Management for Inbound Supply Chains Thomas A.

Cook,2016-04-19 Importing finished products, components, and raw materials has become the status quo in today's increasingly competitive business landscape. The lessons of inbound supply, however,

can be very costly if learned through a trial-and-error approach—especially foreign purchasing. By not understanding the parameters of landed costs alone, purchasing managers can cause serious and expensive disruptions to their supply chain. Leaving little to chance, *Mastering Purchasing Management for Inbound Supply Chains* details the fundamentals regarding logistics and compliance. It emphasizes the importance of bonded warehouses and cost modeling and presents case studies from a wide range of industries that illustrate best practices in imports, logistics, and landed cost modeling. International trade expert Thomas Cook provides valuable insights for avoiding common foreign trade zone pitfalls. He also explains the best ways to handle and minimize landed costs, including duties, shipping costs, and transfer pricing. This comprehensive purchasing guide covers the potential risks and complications involved with U.S. Customs (CBP), freight, INCO terms, and title and payment issues. Complete with a multitude of references to additional information in print and on the Web, the text provides the well-rounded understanding needed to avoid costly mistakes and make purchasing one of the strongest links in your global supply chain.

Toxic Loopholes Craig Collins, 2010-03-08 The EPA was established to enforce the environmental laws Congress enacted during the 1970s. Yet today lethal toxins still permeate our environment, causing widespread illness and even death. Toxic Loopholes investigates these laws, and the agency charged with their enforcement, to explain why they have failed to arrest the nation's rising environmental crime wave and clean up the country's land, air and water. This book illustrates how weak laws, legal loopholes and regulatory negligence harm everyday people struggling to clean up their communities. It demonstrates that our current system of environmental protection pacifies the public with a false sense of security, dampens environmental activism, and

erects legal barricades and bureaucratic barriers to shield powerful polluters from the wrath of their victims. After examining the corrosive economic and political forces undermining environmental law making and enforcement, the final chapters assess the potential for real improvement and the possibility of building cooperative international agreements to confront the rising tide of ecological perils threatening the entire planet.

The Handbook of News Analytics in Finance Gautam Mitra, Leela Mitra, 2011-07-13 The Handbook of News Analytics in Finance is a landmark publication bringing together the latest models and applications of News Analytics for asset pricing, portfolio construction, trading and risk control. The content of the Hand Book is organised to provide a rapid yet comprehensive understanding of this topic. Chapter 1 sets out an overview of News Analytics (NA) with an explanation of the technology and applications. The rest of the chapters are presented in four parts. Part 1 contains an explanation of methods and models which are used to measure and quantify news sentiment. In Part 2 the relationship between news events and discovery of abnormal returns (the elusive alpha) is discussed in detail by the leading researchers and industry experts. The material in this part also covers potential application of NA to trading and fund management. Part 3 covers the use of quantified news for the purpose of monitoring, early diagnostics and risk control. Part 4 is

entirely industry focused; it contains insights of experts from leading technology (content) vendors. It also contains a discussion of technologies and finally a compact directory of content vendor and financial analytics companies in the marketplace of NA. The book draws equally upon the expertise of academics and practitioners who have developed these models and is supported by two major content vendors - RavenPack and Thomson Reuters - leading providers of news analytics software and machine readable news. The book will appeal to decision makers in the banking, finance and insurance services industry. In particular: asset managers; quantitative fund managers; hedge fund managers; algorithmic traders; proprietary (program) trading desks; sell-side firms; brokerage houses; risk managers and research departments will benefit from the unique insights into this new and pertinent area of financial modelling.

Incapacitation Franklin E. Zimring, 1997 The one, sure way that imprisonment prevents crime is by restraining offenders from committing crimes while they are locked up. Called incapacitation by experts in criminology, this effect has become the dominant justification for imprisonment in the United States, where well over a million persons are currently in jails and prisons and public figures who want to appear tough on crime periodically urge that we throw away the key. How useful is the modern prison in restraining crime, and at what cost? How much do we really know about incapacitation and its effectiveness? This book is the first comprehensive assessment of incapacitation. Zimring and Hawkins show the increasing reliance on restraint to justify imprisonment, analyze the existing theories on incapacitation's effects, assess the current empirical research, report a new study, and explore the links between what is known about incapacitation and what it tells us about our criminal justice policy. An insightful evaluation of a pressing policy issue, Incapacitation is a vital contribution to the current debates on our criminal justice system.

U.S. Vulnerabilities to Money Laundering, Drugs, and Terrorist Financing Us Senate Investigations Subcommittee, 2012 The U.S. Senate Permanent Subcommittee On Investigations (PSI) issued a report in *U.S. Vulnerabilities to Money Laundering, Drugs, and Terrorist Financing*, using the global banking and financial firm, HSBC Group, as a case study. HSBC lapsed in the management of anti-money laundering and compliance issues in an effort to cut costs as the firm grew. As a result, the report suggests the sharing of information among globally systemically important financial institutions to maintain an awareness of risk alerts. The PSI suggests standards that HSBC and Office of the Comptroller of the Currency, HSBC's regulator, should uphold. The U.S. SENATE PERMANENT SUBCOMMITTEE ON INVESTIGATIONS (PSI) is a bi-partisan committee of senators that deals with Homeland Security and Governmental Affairs, and is currently headed by Senator Carl Levin (D-MI) and Senator Tom Coburn (R-OK). Formerly known as the Committee on Government Operations, PSI is the oldest subcommittee of the Senate Homeland Security Committee.

Rising in the East Rachel Keeton, 2011 In the west, the design of new towns has always been based on an ideal model in accordance with the ideas of that moment. In the case of the latest

generation of new towns in Asia, however, only quantitative and marketing principles seem to play a role: the number of square metres, dwellings or people, or the greenest, most beautiful or most technologically advanced town. Rising in the east shows which design principles these premises are based on.
