Transforming the Workforce for Children Birth Through Age 8 National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on the Science of Children Birth to Age 8: Deepening and Broadening the Foundation for Success, 2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Trigeminal Nerve Injuries Michael Miloro, 2013-05-14 Trigeminal nerve injuries present complex clinical challenges and can be very distressing for patients, resulting in abnormal sensations of the oro-facial region, yet surgeons may lack the knowledge required for optimal patient management based upon the specific nerve injury. This textbook is the first to be devoted to the diagnosis and management of trigeminal nerve injuries. A wide range of topics are covered, including historical perspectives, demographics, etiology, anatomy and physiology, pathophysiology, clinical neurosensory testing, nonsurgical management, and surgical management and principles of microneurosurgery, specifically involving the inferior alveolar and lingual nerves. Algorithms and a glossary are provided that will assist in the clinical management of these complex scenarios. The authors include surgeons with considerable experience and expertise in the field who have previously published on the subject. This book will serve as an ideal clinical reference for surgeons with patients who sustain trigeminal nerve injuries.

Sustainable Waste Management: Policies and Case Studies Sadhan Kumar Ghosh, 2019-06-21 The book presents high-quality research papers from the Seventh International Conference on Solid Waste Management (IconSWM 2017), held at Professor Jayashankar Telangana State Agricultural University, Hyderabad on December 15–17, 2017. Presenting research on solid waste management from more than 30 countries, the book is divided into three volumes and addresses various issues related to innovation and implementation in sustainable waste management, segregation, collection, transportation of waste, treatment technology, policy and strategies, energy recovery, life cycle analysis, climate change, research and business opportunities.

Organic Waste Composting through Nexus Thinking Hiroshan Hettiarachchi, Serena Caucci, Kai Schwärzel, 2020-11-23 Organic waste composting is another excellent example to demonstrate the power and the benefits of nexus thinking. Even though organic waste composting itself is not a new topic, those who want to start a new project or align an ongoing project with nexus thinking, find it difficult to gather the necessary information. With nine case studies from four continents, this book aims to fill above gap in literature. While current literature on composting is often found to be limited to either soil/agriculture sector or waste management sector, this book presents a combined point of view. This open access book starts with an introductory chapter that describes the need to bring the waste management aspects and soil nutrient management aspects of compost production into one integrated theme. The relevance of nexus thinking and the Sustainable Development Goals (SDGs) are also presented in this introduction. The first three chapters after the introduction covers composting from the solid waste management and its policy aspects, taking examples from three developing countries. The next three examples are mostly about the benefits composting can provide to the soil and agriculture. These examples are also from three developing countries, but with a mixture of urban as well as rural settings. Last three chapters present more insight into the latest developments taking examples from Europe, as well as new methods adapted from the traditional styles from Africa.

Geotechnical Characterization and Modelling Madhavi Latha Gali, Raghuveer Rao P., 2020-09-18 This volume comprises select papers presented during the Indian Geotechnical Conference 2018, discussing issues and challenges relating to the characterization of geomaterials, modelling approaches, and geotechnical engineering education. This volume will be of interest to researchers and practitioners alike.

Cohesion, Coherence and Temporal Reference from an Experimental Corpus Pragmatics Perspective Cristina Grisot, 2018-10-06 This open access book provides new methodological and theoretical insights into temporal reference and its linguistic expression, from a cross-linguistic experimental corpus pragmatics approach. Verbal tenses, in general, and more specifically the categories of tense, grammatical and lexical aspect are treated as cohesion ties contributing to the temporal coherence of a discourse, as well as to the cognitive temporal coherence of the mental representations built in the language comprehension process. As such, it investigates the phenomenon of temporal reference at the interface between corpus linguistics, theoretical linguistics and pragmatics, experimental pragmatics, psycholinguistics, natural language processing and machine translation.

Sustainable Rice Straw Management Martin Gummert, Nguyen Van Hung, Pauline Chivenge, M. B. Douthwaite, 2020-01-01 This open access book on straw management aims to provide a wide array of options for rice straw management that are potentially more sustainable, environmental, and profitable compared to current practice. The book is authored by expert researchers, engineers and innovators working on a range of straw management options with case studies from Vietnam, the Philippines and Cambodia. The book is written for engineers and researchers in order to provide them information on current good practice and the gaps and constraints that require further research and innovation. The book is also aimed at extension workers and farmers to help them decide on the best alternative straw management options in their area by presenting both the technological options as well as the value chains and business models required to make them work. The book will also be useful for policy makers, required by public opinion to reduce greenhouse gas emissions and air pollution, looking for research-based evidence to guide the policies they develop and implement.

The Environment in Asia Pacific Harbours Eric Wolanski, 2006-01-18 Urbanization has reached unprecedented levels in the estuarine and coastal zone, particularly in the Asia Pacific region where mega-cities and mega-harbours are still growing. This book demonstrates the different solutions and pitfalls, successes and failures in a large number of ports and harbours in the Asia Pacific Region, and shows how science can provide ecologically sustainable solutions that apply wherever the growth of mega-harbours occurs.

The Prokaryotes Edward F. DeLong, Stephen Lory, Erko Stackebrandt, Fabiano Thompson, 2014-10-13 The Prokaryotes is a comprehensive, multi-authored, peer reviewed reference work on Bacteria and Archaea. This fourth edition of The Prokaryotes is organized to cover all taxonomic diversity, using the family level to delineate chapters. Different from other resources, this new Springer product includes not only taxonomy, but also prokaryotic biology and technology of taxa in a broad context. Technological aspects highlight the usefulness of prokaryotes in processes and products, including biocontrol agents and as genetics tools. The content of the expanded fourth edition is divided into two parts: Part 1 contains review chapters dealing with the most important general concepts in molecular, applied and general prokaryote biology; Part 2 describes the known properties of specific taxonomic groups. Two completely new sections have been added to Part 1: bacterial communities and human bacteriology. The bacterial communities section reflects the growing realization that studies on pure cultures of bacteria have led to an incomplete picture of the microbial world for two fundamental reasons: the vast majority of bacteria in soil, water and associated with biological tissues are currently not culturable, and that an understanding of microbial ecology requires knowledge on how different bacterial species interact with each other in their natural environment. The new section on human microbiology deals with bacteria associated with healthy humans and bacterial pathogenesis. Each of the major human diseases caused by bacteria is reviewed, from identifying the pathogens by classical clinical and non-culturing techniques to the biochemical mechanisms of the disease process. The 4th edition of The Prokaryotes is the most complete resource on the biology of prokaryotes. The following volumes are published consecutively within the 4th Edition: Prokaryotic Biology and Symbiotic Associations Prokaryotic Communities and Ecophysiology Prokaryotic Physiology and Biochemistry Applied Bacteriology and Biotechnology Human Microbiology Actinobacteria Firmicutes Alphaproteobacteria and Betaproteobacteria Gammaproteobacteria Deltaproteobacteria and Epsilonproteobacteria Other Major Lineages of Bacteria and the Archaea

Municipal Solid Waste Management in Asia and the Pacific Islands Agamuthu Pariatamby, Masaru Tanaka, 2013-09-05 Solid waste management issues, technologies and challenges are dynamic. More so, in developing and transitory nations in Asia. This book, written by Asian experts in solid waste management, explores the current situation in Asian countries including Pacific Islands. There are not many technical books of this kind, especially dedicated to this region of the world. The chapters form a comprehensive, coherent investigation in municipal solid waste (MSW) management, including, definitions used, generation, sustainable waste management system, legal framework and impacts on global warming. Several case studies from Asian nations are included to exemplify the real situation experienced. Discussions on MSW policy in these countries and their impacts on waste management and minimization (if any) are indeed an eye-opener. Undoubtedly, this book would be a pioneer in revealing the latest situation in the Asian region, which includes two of the world's most dynamic nations in the economic growth. It is greatly envisaged to form an excellent source of reference in MSW management in Asia and Pacific Islands. This book will bridge the wide gap in available information between the developed and transitory/developing nations.

Municipal Landfill Leachate Management Maryam Pazoki, Reza Ghasemzadeh, 2020-08-18 This book is divided into seven chapters, which address various leachate landfill management issues such as the quality, quantity and management of municipal landfill leachate, together with new methods. There are many methods available for the treatment and management of municipal landfill leachate. The waste management methods presented here can be applied in most third-world countries, due to the lack of waste separation and high organic content of waste. The book provides descriptions and a hierarchy of waste management, reviews the history of solid waste disposal, and covers a range of topics, including: leachate and gas generation in landfills; natural attenuation landfills; landfill site selection; leachate and stormwater management, collection and treatment; landfill gas management; landfill cover requirements; leachate collection; types of natural treatment systems; and design procedure and considerations. In closing, it provides an overview of the current solid waste management status in Iran.

Introduction to the Physical and Biological Oceanography of Shelf Seas John H. Simpson, Jonathan Sharples, 2012-03-29 In this exciting and innovative textbook, two leading oceanographers bring together the fundamental physics and biology of the coastal ocean in a quantitative but accessible way for undergraduate and graduate students. Shelf sea processes are comprehensively explained from first principles using an integrated approach to oceanography that helps build a clear understanding of how shelf sea physics underpins key biological processes in these environmentally sensitive regions. Using many observational and model examples, worked problems and software tools, the authors explain the range of physical controls on primary biological production and shelf sea ecosystems. Boxes throughout the book present extra detail for each topic and non-mathematical summary points are provided for physics sections, allowing students to develop an intuitive understanding. The book is fully supported by extensive online materials, including worked solutions to end-of-chapter exercises, additional homework/exam problems with solutions and simple MATLAB and FORTRAN models for running simulations.

Permanent Magnet Spherical Motors Kun Bai, Kok-Meng Lee, 2018-03-20 This book introduces and illustrates modeling, sensing, and control methods for analyzing, designing, and developing spherical motors. It systematically presents models for establishing the relationships among the magnetic fields, position/orientation and force/torque, while also providing time-efficient solutions to assist researchers and engineers in studying and developing these motors. In order to take full advantage of spherical motors' compact structure in practical applications, sensing and control methods that utilize their magnetic fields and eliminate the need to install external sensors for feedback are proposed. Further, the book investigates for the first time spherical motors' force/torque manipulation capability, and proposes algorithms enabling the ball-joint-like end-effector for haptic use based on these motors' hybrid position/force actuation modes. While systematically presenting approaches to their design, sensing and control, the book also provides many examples illustrating the implementation issues readers may encounter.

The Biopolitics of Development Sandro Mezzadra, Julian Reid, Ranabir Samaddar, 2013-12-27 This book offers an original analysis and theorization of the biopolitics of development in the postcolonial present, and draws significantly from the later works of Michel Foucault on biopolitics. Foucault's works have had a massive influence on postcolonial literatures, particularly in political science and international relations, and several authors of this book have themselves made significant contributions to that influence. While Foucault's thought has been inspirational for understanding colonial biopolitics as well as governmental rationalities concerned with development, his works have too often failed to inspire studies of political subjectivity. Instead, they have been used to stoke the myth of the inevitability of the decline of collective political subjects, often describing an increasingly limited horizon of political possibilities, and provoking a disenchantment with the political itself in postcolonial works and studies. Working against the grain of current Foucauldian scholarship, this book underlines the importance of Foucault's work for the capacity to recognize how this degraded view of political subjectivity came about, particularly within the framework of the discourses and politics of 'development', and with particular attention to the predicaments of postcolonial peoples. It explores how we can use Foucault's ideas to recover the vital capacity to think and act politically at a time when fundamentally human capacities to think, know and to act purposively in the world are being pathologized as expressions of the hubris and 'underdevelopment' of postcolonial peoples. Why and how it is that life in postcolonial settings has been depoliticized to such dramatic effect? The immediacy of these themes will be obvious to anyone living in the South of the world. But within the academy they remain heavily under-addressed. In thinking about what it means to read Michel Foucault today, this book tackles some significant questions and problems: Not simply that of how to explain the ways in which postcolonial regimes of governance have achieved the debasements of political subjectivity they have; nor that of how we might better equip them with the means to suborn the life of postcolonial peoples more fully; but that of how such peoples, in their subjection to governance, can and do resist, subvert, escape and defy the imposition of modes of governance which seek to remove their lives of those very capacities for resistance, subversion, flight, and defiance.

Handbook of Applied Spatial Analysis Manfred M. Fischer, Arthur Getis, 2009-12-24 The Handbook is written for academics, researchers, practitioners and advanced graduate students. It has been designed to be read by those new or starting out in the field of spatial analysis as well as by those who are already familiar with the field. The chapters have been written in such a way that readers who are new to the field will gain important overview and insight. At the same time, those readers who are already practitioners in the field will gain through the advanced and/or updated tools and new materials and state-of-the-art developments included. This volume provides an accounting of the diversity of current and emergent approaches, not available elsewhere despite the many excellent journals and textbooks that exist. Most of the chapters are original, some few are reprints from the Journal of Geographical Systems, Geographical Analysis, The Review of Regional Studies and Letters of Spatial and Resource Sciences. We let our contributors develop, from their particular perspective and insights, their own strategies for mapping the part of terrain for which they were responsible. As the chapters were submitted, we became the first consumers of the project we had initiated. We gained from depth, breadth and distinctiveness of our contributors' insights and, in particular, the presence of links between them.

Writing in Space, 1973–2019 Lorraine O'Grady, 2020-09-21 Writing in Space, 1973-2019 gathers the writings of conceptual artist Lorraine O'Grady, who for over forty years has investigated the complicated relationship between text and image. A firsthand account of O'Grady's wide-ranging practice, this volume contains statements, scripts, and previously unpublished notes charting the development of her performance work and conceptual photography; her art and music criticism that appeared in the Village Voice and Artforum; critical and theoretical essays on art and culture, including her classic Olympia's Maid; and interviews in which O'Grady maps, expands, and complicates the intellectual terrain of her work. She examines issues ranging from black female subjectivity to diaspora and race and representation in contemporary art, exploring both their personal and their institutional implications. O'Grady's writings—introduced in this collection by critic and curator Aruna D'Souza—offer a unique window into her artistic and intellectual evolution while consistently plumbing the political possibilities of art.
