Adam Smith and the Circles of Sympathy Fonna Forman-Barzilai,2010-04-30 This 2010 text pursues Adam Smith's views on moral judgement, humanitarian care, commerce, justice and international law both in historical context and through a twenty-first-century cosmopolitan lens, making this a major contribution not only to Smith studies but also to the history of cosmopolitan thought and to contemporary cosmopolitan discourse itself. Forman-Barzilai breaks ground, demonstrating the spatial texture of Smith's moral psychology and the ways he believed that physical, affective and cultural distance constrain the identities, connections and ethical obligations of modern commercial people. Forman-Barzilai emphasizes his resistance to the sort of relativism, moral insularity and cultural chauvinism that too often accompany localist critiques of cosmopolitan thought today. This is a fascinating, revisionist study that integrates the perspectives of intellectual history, moral philosophy, political theory, cultural theory, international relations theory and political economy, and will appeal across the humanities and social sciences.

Moral Wages Kenneth H. Kolb,2014-07-18 Moral Wages offers the reader a vivid depiction of what it is like to work inside an agency that assists victims of domestic violence and sexual assault. Based on over a year of fieldwork by a man in a setting many presume to be hostile to men, this ethnographic account is unlike most research on the topic of violence against women. Instead of focusing on the victims or perpetrators of abuse, Moral Wages focuses exclusively on the service providers in the middle. It shows how victim advocates and counselors—who don't enjoy extrinsic benefits like pay, power, and prestige—are sustained by a different kind of compensation. As long as they can overcome a number of workplace dilemmas, they earn a special type of emotional reward reserved for those who help others in need: moral wages. As their struggles mount, though, it becomes clear that their jobs often put them in impossible situations—requiring them to aid and feel for vulnerable clients, yet giving them few and feeble tools to combat a persistent social problem.

Moving Forward in the Study of Temperament and Early Education Outcomes Cynthia L. Smith,David J. Bridgett,2020-06-29 This book furthers understanding of how child temperament is linked to educational outcomes through mediating and moderating factors. As the importance of socio-emotional development for educational outcomes is increasingly recognized, understanding the influence that children's temperament—which includes their emotional reactivity and regulation of emotions, cognitions, and behaviors—can have on educational factors, such as school readiness and academic achievement, is crucial. First, the chapters in this book examine pathways connecting temperament with educational outcomes; for example, one study reports that toddler negative affect predicted executive functioning, which then predicted achievement at age six. The second way that chapters in this book examine links between temperament and education is by identifying factors that make associations between temperament and educational outcomes more salient; for example, findings from one study show that shyness and negative emotion were more strongly associated with lower academic achievement only when children received fewer than nine hours of sleep each night, highlighting the importance of sleep. By examining pathways through which temperament exerts effects on educational outcomes (i.e., mediators), or factors that modify associations between temperament and educational outcomes (i.e., moderators), the potential for interventions aimed at improving early educational outcomes can be fully realized. This book was originally published as a special issue of Early Education and Development.

Sympathy for the Devil Kent Anderson,2018-11-13 Kent Anderson's stunning debut novel is a modern classic, a harrowing, authentic picture of one American soldier's experience of the Vietnam War--unlike anything else in war literature (Los Angeles Review of Books). Hanson joins the Green Berets fresh out of college. Carrying a volume of Yeats's poems in his uniform pocket, he has no idea of what he's about to face in Vietnam--from the enemy, from his fellow soldiers, or within himself. In vivid, nightmarish, and finely etched prose, Kent Anderson takes us through Hanson's two tours of duty and a bitter, ill-fated return to civilian life in-between, capturing the day-to-day process of war like no writer before or since.

Political Attitudes in Venezuela Enrique A. Baloyra,John D. Martz,2014-06-23 Here is a benchmark study of voter attitudes in a Latin American country. This volume is based on extensive survey research conducted during the Venezuelan elections of 1973. The methods employed by Baloyra and Martz to poll an unpollable society successfully challenge previously established paradigms. The authors interviewed a representative sample of over 1,500 voters to determine relationships between class, status, community, context, religion, ideology, and partisanship on the one hand and political attitudes and preferences on the other. They found that the Venezuelan electorate is defined by a series of contradictory tendencies, and they place their conclusions in the context of contemporary political science literature regarding class and party, ideology and party,

and inequality and participation.

Social Motivation, Justice, and the Moral Emotions Bernard Weiner,2006-04-21 Social Motivation, Justice, and the Moral Emotions proposes an attribution theory of interpersonal or social motivation that distinguishes between the role of thinking and feeling in determining action. The place of this theory within the larger fields of motivation and attributional analyses is explored. It features new thoughts concerning social motivation on such topics as help giving, aggression, achievement evaluation, compliance to commit a transgression, as well as new contributions to the understanding of social justice. Included also is material on moral emotions, with discussions of admiration, contempt, envy, gratitude, and other affects not considered in Professor Weiner's prior work. The text also contains previously unexamined topics regarding social inferences of arrogance and modesty. Divided into five chapters, this book: *considers the logical development and structure of a proposed theory of social motivation and justice; *reviews meta-analytic tests of the theory within the contexts of help giving and aggression and examines issues related to cultural and individual differences; *focuses on moral emotions including an analysis of admiration, envy, gratitude, jealousy, scorn, and others; *discusses conditions where reward decreases motivation while punishment augments strivings; and *provides applications that are beneficial in the classroom, in therapy, and in training programs. This book appeals to practicing and research psychologists and advanced students in social, educational, personality, political/legal, health, and clinical psychology. It will also serve as a supplement in courses on motivational psychology, emotion and motivation, altruism and/or pro-social behavior, aggression, social judgment, and morality. Also included is the raw material for 13 experiments relating to core predictions of the proposed attribution theory.

Metafilm Music in Jean-Luc Godard's Cinema Michael Baumgartner,2022 This monograph explores the under-researched use of music in Jean-Luc Godard's films and video essays from the early 1960s to the late 1990s. While Godard is largely hailed as a leading innovator of visual montage, unique storytelling style, and ground-breaking cinematography, his achievements as a leading pioneer in sculpting complex soundtracks altering the familiar relationship between sound and image have been mainly overlooked. On these soundtracks, music assumes the unique role of metafilm music. Metafilm music self-consciously refers to its own role as film music and disrupts the primary function of film music as an essential filmic device creating cinematic illusion. The concept of metafilm music describes how Godard thinks with film music about film music. Metafilm music manifests itself in Godard's work in four distinct manners: as fragmentized musical cues; as the same fragment verbatim repeated several times; as extrapolated, short excerpts from classical or popular music; and as music mixed unusually loudly into the soundtrack. With a detailed analysis of these parameters, the book explores fragmented and repeated music as Godard's critique of the leitmotif technique. Godard further self-reflexively investigates genre-specific music in musical comedies, films noir, and melodramas, as well as prototypical film music as arguably its own musical genre. His last foray into metafilm music entails music-making as a metaphor for filmmaking. By thinking with music about the function of film music, Godard has created throughout his career multi-layered soundtracks which challenge the conventional norms of film music and sound--
