Heuristic Reasoning Emiliano Ippoliti,2014-09-05 How can we advance knowledge? Which methods do we need in order to make new discoveries? How can we rationally evaluate, reconstruct and offer discoveries as a means of improving the ‘method’ of discovery itself? And how can we use findings about scientific discovery to boost funding policies, thus fostering a deeper impact of scientific discovery itself? The respective chapters in this book provide readers with answers to these questions. They focus on a set of issues that are essential to the development of types of reasoning for advancing knowledge, such as models for both revolutionary findings and paradigm shifts; ways of rationally addressing scientific disagreement, e.g. when a revolutionary discovery sparks considerable disagreement inside the scientific community; frameworks for both discovery and inference methods; and heuristics for economics and the social sciences.

Cloud Ginger Kathrens, 2012-11-06 This bestselling book, originally published as a companion volume for public television's Nature series, *Cloud: The Wild Stallion of the Rockies* is documentary filmmaker Ginger Kathrens's personal retelling of her years following the wild horse she named Cloud. Beautifully designed, the book is elaborately photographed and divided into seventeen chapters that follow the life of a wild stallion, just one of hundreds of horses that have roamed wild in the Rocky Mountains for two hundred years. The book begins with the author and filmmaker witnessing the birth of a helpless white colt, that will soon capture her heart and imagination. Each subsequent chapter documents Cloud's interaction with his mare Raven, his brother Diamond, and other colts in the wild as well as his adventures encountering dangerous predators, older stallions, and human trappers. The author follows Cloud over the course of five years, taking note of his physical and behavioral development, as he begins to take on more of a leadership role in the band of wild bachelors he's joined, to become a fighter, a survivor, and a father. Kathrens's emotional involvement in Cloud's story is palpable, such as when she tearfully watches the young stallion get captured by trappers. Due to his unusual coloration, he is set free, though the other members of his band and sisters are removed and sold. Returning to the mountains every season, the author continues to look for Cloud in the vast wild habitat, always relieved to find him still living, despite

fights, predators, and encounters with trappers. She is later is touched to see how Cloud, the five-year-old mare, grazes with his yearling son, the first of his new family. Kathrens's gripping observations of wild horses of the Arrowheads, their fights, struggles, and alliances, give the reader much insight into the fascinating behavior of these wild horses. Now published in paperback for the first time, this updated and fully redesigned volume coincides with the one year anniversary of the last sighting of Cloud.

Brutified Robert Benefiel,2020-11-27 Brutified is a collection of poetry written by the author Robert Benefiel. The poems contained within it are from a larger cache of poems written in 2019. The pieces themselves range from narrative to abstract, bibliographical to fictionalized, allowing for a fuller range of expression and voice. What each piece carries is the idea of surviving the brutality of the world, others, and even one's self, in hopes of gaining insight and retaining one's compassion. Whether the piece is addressing the idea of finding one's own art at a junk store, or stumbling across a love note written before, but after, a lover has left them, or even watching a young midget be chased through the mall, the author never ceases to try and present the emotion and meaning at the core of each piece in a blatant yet subtle way.
