**Binary Options** Alan C. Sedar, 2014-02-05 This book provides a step by step process on how to earn an income using a little known investment vehicle called a Binary Option, a recently developed investment instrument. This tool can offer the not so rich person an opportunity to make money on their own time from the comforts of their own home, or anywhere they have access to a computer and internet connection. The beauty of this system is that, unlike many work from home programs, there is no need to build a website, sell to your family and friends, pay for advertising, sell products, carry inventory, and all of the baggage that comes with other income opportunities. This is a simple trading system. After learning the process, the investor can make intelligent decisions on the price of an investment whereby they can earn anywhere from a potential 70% return and up on their money. Using the model built around a 1-minute time period, the investor has the potential to make quite a bit of money in a relatively short period of time.

**Options Trading: Options Trading Start Up Guide: Learn How to Start Making Money** Conor Mathews, 2017-02-28 Binary options is a form of trading in which prices of currencies, commodities, futures, stocks, and indices are traded. Still, binary options trading is not to be confused with Forex and stocks trading, since there are certain differences between the markets. Binary options are an easier form, in the sense that they are easier to understand, but as with every market, they require a serious approach as well. What characterizes binary options is that traders do not buy the assets; they simply invest or bet on whether an asset will rise or drop in value. They place trades on the potential price increase or decrease, but never really own the asset. Therefore, binary options is often compared to gambling, and it took a long time for the market to establish itself as a trading market, defending itself by proving that it is far removed from a game of chance. The truth is that it is a little bit of both, and it depends on how traders see it. If traders participate in the market as individuals with a trading plan and a clear strategy, it certainly classifies as trading. Nevertheless, if traders approach the market like a game and make random trades, they classify as gamblers. There is no clear-cut line in the options market since it is flexible and depends solely on how the trader approaches it. Still, binary options is one of the most popular markets, right next to the trillion dollar Forex industry, and they appeal to many market participants, especially to beginners who find it easier to understand than the stock or Forex market for example.
