Master the Multiplication Tables Workbook Maria Miller, 2016-01-15 The third grade workbook Master the Multiplication Tables concentrates on teaching the multiplication tables in a specific order. It is a comprehensive teaching resource with lessons and exercises to introduce or review the multiplication tables. The lessons include a way to drill a specific table but also have many other related exercises, including word problems. The book assumes that the students already know the concept of multiplication. It is best preceded by my other workbook, Multiplication Concept. I have created a systematic approach to memorizing times tables. In this method, one table is studied at a time until it is mastered. The individual tables are NOT studied in the order of 2, 3, 4, etc. but instead the easy tables of 2, 5, 10, and 11 are studied first. The study order also includes studying the table of 4 right after the table of 2, and studying the table of 6 right after the table of 3, because the skip-counting patterns of those tables share some similarities. The lessons emphasize the fact that one multiplication fact is always in two different tables. This way, when the student gets to the hardest tables, the tables of 7, 8, and 12, there are only a few totally new facts to learn. We always start the study of each table by memorizing the skip-counting pattern 7, 14, 21, 28, etc. Then we work on memorizing which fact is associated with which answer. This way your students not only know what is 8×7 but also know all of it backwards - that 56 is in the tables of 8 and 7. That knowledge will be an enormous help later, when the students learn division, factorizing, and finding LCM's or GCF's. The book also includes a 12×12 grid at the end of almost every lesson. The boxes for those answers that have not been studied yet are shaded and are not to be filled. Little by little, the

shaded areas become fewer and fewer, and the progress is very visible to the student. I encourage you also to use games for motivation and for practice. I have included a list of online multiplication games for that purpose. Of course, board and card games are perfect as well. However, games are not enough in themselves. The memorization also requires a mental effort from the student: sitting down with the skip-counting list, then with the facts, reading them, and then trying to remember them. The basic age-old technique of covering the list and trying to remember it is still very effective! I do not want to discount the value of songs or mnemonic devices, but they tend to isolate the facts in the child's mind as separate odd trivia. This book shows the patterns found in the multiplication tables in order to keep the facts in a structured context, and emphasizes learning the tables backwards in order to facilitate learning division. The book also includes a guide for the teacher titled Effective Oral Drilling. This drilling is structured, not random, and is based on the pattern in the table itself: Table of 2 - 11 new facts to learn. Table of 4 - 10 new facts. These are doubles of those in the table of two. Table of 10 - 9 easy facts. Table of 5 - 8 new facts. More Practice and Review is a break from memorizing new tables. Table of 3 - 7 new facts. Table of 6 - 6 new facts. These are doubles of those in the table of 3. Table of 11 - 5 new facts, four of them are easy. Table of 9 - 4 new facts. Table of 7 - 3 new facts. Table of 8 - 2 new facts. Table of 12 - 1 new fact.

Multiplication 1 is a fairly self-explanatory worktext to learn the concept of multiplication and the multiplication tables. It has two parts: The first part concentrates on the concept of multiplication, the order of operations, and word problems. The second part is all about memorizing the times tables. I have created a systematic approach to memorizing the times tables. In this method, one table is studied at a time to mastery. The individual tables are NOT studied in the order of 2, 3, 4, etc. but instead the easy tables of 2, 5, 10, and 11 are studied first. The study order also includes studying the table of 4 right after the table of 2, and studying the table of 6 right after the table of 3, because the skip-counting patterns of those tables share some similarities. That knowledge will be an enormous help later, when the student learns division, factorizing, and finding LCM's or GCF's. The book also includes a 12x12 grid at the end of almost every lesson in part 2. The boxes for those answers that have not been studied yet are shaded and are not to be filled in. Little by little, the shaded areas become

fewer and fewer, and the progress is very visible to the student. I encourage you also to use games for motivation and for practice. Promoting Green Economy T. Ayuk, E. Oku, 2016-12-29 Most African national economies depend on the exploitation of both renewable and non-renewable natural resources for development. Conventional and unconventional exploitation of natural resources has left negative carbon footprints. This has also degraded hotspots across the African continent, impacting negatively on people and the environment. A Green Economy offers the continent the opportunity to achieve sustained economic development devoid of environmental degradation and inefficient utilisation of natural resources. This book,

Promoting Green Economy, explores issues affecting the socio-economic development of the continent and focuses on Africa's need for a green economy. With chapters written by seasoned authors from academia and industry across the continent, the book examines the challenges of sustainable management of Africa's natural resources and recommends the need for the continent to transit towards green economy as this can provide opportunities for minimising environmental footprints of all economic activities. The book calls on the commitment of the public and private sectors to the development of appropriate green economy policies and regulatory frameworks to promote inclusive growth.

Public Enterprise Management And Privatisation Laxmi Narain, 2005-01-01 A number of public enterprise (PE) executives have long felt the need for a book which would provide necessary information and analysis of various dimensions of PE management and privatisation. The book provides at one place, a precise and authoritative account of the concept, policy, and analysis of major issues confronting PEs. Public ownership per se does not make PE performance sub-optimal. The operation of the Government system, of which PE is a sub-system, has not been conducive to performance. During the last six decades, inadequate political will and vested interests have come in the way of freeing PEs from excessive and throttling controls, and demoralising accountability. Not letting the managers manage with the freedom required in the liberalised and globalised set-up is the problem. The multifarious and complex managerial problems of PEs, which get compounded by faltering moves towards privatisation, cannot be wished away. These have been considered in the book at some length. The book, first published in 1980, continues to be a standard work on the subject. This latest edition has been

revised by Dr. R.K.Mishra, Director, Institute of Public Enterprise, Hyderabad.
