A Revolution Down on the Farm Paul K. Conkin, 2008-09-01 At a time when food is becoming increasingly scarce in many parts of the world and food prices are skyrocketing, no industry is more important than agriculture. Humans have been farming for thousands of years, and yet agriculture has undergone more fundamental changes in the past 80 years than in the previous several centuries. In 1900, 30 million American farmers tilled the soil or tended livestock; today there are fewer than 4.5 million farmers who feed a population four times larger than it was at the beginning of the century. Fifty years ago, the planet could not have sustained a population of 6.5 billion; now, commercial and industrial agriculture ensure that millions will not die from starvation. Farmers are able to feed an exponentially growing planet because the greatest industrial revolution in history has occurred in agriculture since 1929, with U.S. farmers leading the way. Productivity on American farms has increased tenfold, even as most small farmers and tenants have been forced to find other work. Today, only 300,000 farms produce approximately ninety percent of the total output, and overproduction, largely subsidized by government programs and policies, has become the hallmark of modern agriculture. *A Revolution Down on the Farm: The Transformation of American Agriculture since 1929* charts the profound changes in farming that have occurred during author Paul K. Conkin's lifetime. His personal experiences growing up on a small Tennessee farm complement compelling statistical data as he explores America's vast agricultural transformation and considers its social, political, and economic consequences. He examines the history of American agriculture, showing how New Deal innovations evolved into convoluted commodity programs following World War II. Conkin assesses the skills, new technologies, and government policies that helped transform farming in America and suggests how new legislation might affect farming in decades to come. Although the increased production and mechanization of farming has been an economic success story for Americans, the costs are becoming increasingly apparent. Small farmers are put out of business when they cannot compete with giant, non-diversified corporate farms. Caged chickens and hogs in factory-like facilities or confined dairy cattle require massive amounts of chemicals and hormones ultimately ingested by consumers. Fertilizers, new organic chemicals, manure disposal, and genetically modified seeds have introduced environmental problems that are still being discovered. *A Revolution Down on the Farm* concludes with an evaluation of farming in the twenty-first century and a distinctive meditation on alternatives to our present large scale, mechanized, subsidized, and fossil fuel and chemically dependent system.

Stellar Interiors Carl J. Hansen, Steven D Kawaler, 2012-12-06 That trees should have been cut down to provide paper for this book was an ecological affront. From a book review. - Anthony Blond (in the Spectator, 1983) The first modern text on our subject, *Structure and Evolution of the Stars*, was published over thirty years ago. In it, Martin Schwarzschild described numerical experiments that successfully reproduced most of the observed properties of the majority of stars seen in the sky. He also set the standard for a lucid description of the physics of stellar interiors. Ten years later, in 1968, John P. Cox's two-volume monograph *Principles of Stellar Structure* appeared, as did the more specialized text *Principles of Stellar Evolution and Nucleosynthesis* by Donald D. Clayton—and what a difference ten years had made. The field had matured into the basic form that it remains today. The past twenty-plus years have seen this branch of astrophysics flourish and develop into a fundamental pillar of modern astrophysics that addresses an enormous variety of phenomena. In view of this it might seem foolish to offer another text of finite length and expect it to cover any more than a fraction of what should be discussed to make it a thorough and self-contained reference. Well, it doesn't. Our specific aim is to introduce only the fundamentals of stellar astrophysics. You will find little reference here to black holes, millisecond pulsars, and other sexy objects.

Dairy Herd Health Martin Green, Martin J. Green, 2012 Dairy cow herd health is an important and universal topic in large animal veterinary practice and farming, covering both preventive medicine and health promotion. With the move towards large scale farming, the health of the herd is important as an economic unit and to promote the health of the individuals within it. This book will focus on diseases within herds, herd husbandry practices, youngstock management and environmental issues. Major diseases and conditions will be covered such as mastitis, lameness, nutrition, metabolic and common infectious diseases from a herd health perspective.

A Place We Knew Well Susan Carol McCarthy, 2015-09-29 "Susan Carol McCarthy blends fact, memory, imagination and truth with admirable grace," said The Washington Post of the author's critically acclaimed debut novel, *Lay That Trumpet in Our Hands*. Now McCarthy returns with another enthralling story of a family—their longings, their fears, and their secrets—swept up in the chaos at the height of the Cold War, perfect for fans of Caroline Leavitt, Laura Moriarty, and Ellen Feldman. Late October, 1962. Wes Avery, a one-time Air Force tail-gunner, is living his version of the American Dream as loving husband to Sarah, doting father to seventeen-year-old Charlotte, and owner of a successful Texaco station along central Florida's busiest highway. But after President Kennedy announces that the Soviets have nuclear missiles in Cuba, Army convoys clog the highways and the sky fills with fighter planes. Within days, Wes's carefully constructed life begins to unravel. Sarah, nervous and watchful, spends more and more time in the family's bomb shelter, slipping away into childhood memories and the dreams she once held for the future. Charlotte is wary but caught up in the excitement of high school—her nomination to homecoming court, the upcoming dance, and the thrill of first love. Wes, remembering his wartime experience, tries to keep his family's days as normal as possible, hoping to restore a sense of calm. But as the panic over the Missile Crisis rises, a long-buried secret threatens to push the Averys over the edge. With heartbreaking clarity and compassion, Susan

Carol McCarthy captures the shock and innocence, anxiety and fear, in those thirteen historic days, and brings vividly to life one ordinary family trying to hold center while the world around them falls apart. Praise for *A Place We Knew Well* “Gripping . . . Even as those tense days of the Cuban Missile Crisis are depicted in unwavering detail and with inexorable dread, the intimate moments between human beings on the verge of the apocalypse stand out. This multilayered story will remain with you long after you turn the last page.”—Melanie Benjamin, *New York Times* bestselling author of *The Aviator’s Wife* “Susan Carol McCarthy makes a nightmarish moment in America’s recent past terrifyingly immediate and devastatingly personal. This was what it was like to live, and even more astonishingly, to go on loving—as a husband, as a wife, as a young girl on the cusp of womanhood—with the threat of nuclear annihilation hovering only miles offshore.”—Ellen Feldman, author of *Next to Love* “Susan Carol McCarthy’s genius is in turning history over to muscle-and-blood human beings who variously hope, fear, lash out, hold steady, and tear at the seams. If you weren’t there, this is as close to living through the Cuban Missile Crisis as you will ever come.”—Tom McNeal, author of *To Be Sung Underwater* “Riveting.”—Kirkus Reviews “Powerful . . . McCarthy vividly evokes a turbulent time in her state’s recent past. . . . [She] memorably captures the impact of the intense military mobilization on residents. But the novel’s greatest strength is its seamless portrayal of what this international chess game means for one man on the brink of losing everything.”—Booklist
