US Amphibious Tanks of World War II Steven J. Zaloga,2012-08-20 The advent of combined arms operations in World War II created the need for specialized armored vehicles. In the case of amphibious attacks, the issue arose of how best to land tanks on a beach. Although a variety of specialized landing craft were developed, the Dieppe raid in 1942 encouraged the development of tanks that could be deployed from further off-shore to limit the vulnerability of the LCT craft. The deep-wading equipment that they developed was first used during Operation Husky on Sicily in July 1943, and subsequently for Operations Avalanche (Salerno, September 1943), Shingle (Anzio, January 1944) and Overlord (Normandy, June 1944). The US-manufactured DD tanks were used during Overlord by both US and British forces, and again in 1945 during the Rhine crossings. Initially, developments in the Pacific Theater were separate from those in Europe. The Marines learned from the Tarawa landings in 1943 that unprepared tanks could not be safely landed even in shallow water. DD tanks were never seriously considered for the Pacific, so other solutions were sought. A detailed study of specialized US amphibious tanks, this is a title that will appeal to those interested in both Pacific and European Theaters, modellers and collectors.

Tanks in Hell Oscar E. Gilbert,2015-08-04 An extraordinary slice of untold WWII history: how unproven Marines driving untested Sherman tanks turned the tide against Japan in the Battle of Tarawa. In May 1943, a self-described “really young, green, ignorant lieutenant” assumed command of a new US Marine Corps company. His even younger Marines were learning to operate an untested weapon, the M4A2 “Sherman” medium tank. Just six months later, the company would be thrown into one of the ghastliest battles of World War II. On November 20, 1943, the 2nd Marine Division launched the first amphibious assault of the Pacific War, directly into the powerful Japanese defenses on the atoll of Tarawa. In that blood-soaked invasion, a single company of Sherman tanks—of which only two survived—played a pivotal role in achieving a legendary victory. In this fascinating study, Oscar E. Gilbert and Romain V. Cansiere use official documents, memoirs, and interviews with veterans, as well as personal and aerial photographs, to follow Charlie Company from its formation. Tracing the movement, action, and fall of individual tanks, *Tanks in Hell* offers “a personal, beach-level view of the Marine island campaign” (Marine Corps History).

Rethinking tanks: opportunities for revitalizing irrigation tanks: empirical findings from Ananthapur District, Andhra Pradesh, India Sharma, A., 2003 This study finds that in the Ananthapur district of Andhra Pradesh, tanks

were a precarious source of irrigation, even at the peak of their use. Hence, with the use of electricity supply and reduction in the cost of groundwater extraction technology, farmers moved to groundwater irrigation. Along with a rise in groundwater irrigation, however, a steady decline in tank irrigated area was witnessed.
