Singapore's Health Care System K. E. T. Al SATKU, 2015-11-13 How did Singapore's health care system transform itself into one of the best in the world? It not only provides easy access, but its standards of health care, not only in curative medicine but also in prevention, are exemplary. Fifty years ago, the infant mortality rate (IMR) was 26 per thousand live births; today the IMR is 2. Life expectancy was 64 years then; today, it is 83. The Singapore Medicine brand is trusted internationally, and patients are drawn to Singapore from all over the world. And while many countries struggle to finance their health care, Singapore has developed a health care financing framework that makes health care affordable for its people and gives sustainability to the health care system. Reliability is provided by a professional workforce that seeks to continually learn, improve and become ever more proficient with cutting edge technology while emphasizing the relational aspects of health care by nurturing compassion and maintaining high standards of integrity. Convenience and safety are enhanced by a unifying IT system that enables the portability of medical records across health care institutions. All these have been achieved not by chance but by careful planning, strong leadership and dedicated people who are prepared to learn from Singapore's own experience while adapting best practices from around the world. But the system is not without

challenges -- not least those of an aging population, and an increasing market influence. This book provides a fascinating insight into the development of Singapore's health care system from the early days of fighting infections and providing nutrition supplementation for school children, to today's management of lifestyle diseases and high-end tertiary care. It also discusses how the system must adapt to help Singaporeans continue to live well, live long, and with peace of mind.--

Hello I Want to Die Please Fix Me Anna Mehler Paperny, 2020-03-31 An engrossing memoir-meets-investigative report that takes a fresh, frank look at how we treat depression Depression is a havoc-wreaking illness that masquerades as personal failing and hijacks your life. After a major suicide attempt in her early twenties, Anna Mehler Paperny resolved to put her reporter's skills to use to get to know her enemy, setting off on a journey to understand her condition, the dizzying array of medical treatments on offer, and a medical profession in search of answers. Charting the way depression wrecks so many lives, she maps competing schools of therapy, pharmacology, cutting-edge medicine, the pill-popping pitfalls of long-term treatment, the glaring unknowns and the institutional shortcomings that both patients and practitioners are up against. She interviews leading medical experts across the US and Canada, from psychiatrists to neurologists, brain-mapping pioneers to family practitioners, and others dabbling in strange hypotheses—and shares compassionate conversations with fellow sufferers. Hello I Want to Die Please Fix Me tracks Anna's quest for knowledge and her desire to get well. Impeccably reported, it is a profoundly compelling story about the human spirit and the myriad ways we treat (and fail to treat) the disease that accounts for more years swallowed up by disability than any other in the world.

The Hilarious World of Depression John Moe, 2020-05-05 One of Today's Ten Best Inspirational Books, 2020 By the creator and host of the acclaimed mental health podcast Depresh Mode with John Moe [A] path to deeper understanding and openness, by way of laughter in the dark —The New York Times Book Review Filled with heart, humor and hope. —People A funny, honest book. —Neil Gaiman Candid and funny and intimate. —Susan Orlean For years John Moe, critically-acclaimed public radio personality and host of The Hilarious World of Depression podcast, struggled with depression; it plagued his family and claimed the life of his brother in 2007. As Moe came to terms with his own illness, he began to see similar patterns of behavior and coping mechanisms surfacing in conversations with others, including high-profile comedians who'd struggled with the disease. Moe saw that there was tremendous comfort and community in open dialogue about these shared experiences and that humor had a unique power. Thus was born the podcast The Hilarious World of Depression. Inspired by the immediate success of the podcast, Moe has written a remarkable investigation of the disease, part memoir of his own journey, part treasure trove of laugh-out-loud stories and insights drawn from years of interviews with some of the most brilliant minds facing similar challenges. Throughout the course of this powerful narrative, depression's universal themes come to light, among them, struggles with identity, lack of understanding of the symptoms, the challenges of work-life, self-medicating, the fallout of the disease in the lives of our loved ones, the tragedy of suicide, and the hereditary aspects of the disease. The Hilarious World of Depression illuminates depression in an entirely fresh and inspiring way.

She's the founder of IQuitSugar.com, whose 8-Week Program has been completed by 1.5 million people in 133 countries. A former news journalist and editor of Cosmopolitan, she was the host of the first series of MasterChef Australia and is the author of the international bestsellers first, we make the beast beautiful, I Quit Sugar: Simplicious, I Quit Sugar and I Quit

Sugar For Life. Her latest book is *I Quit Sugar: Simplicious Flow*. She is ranked as one of the top 200 most influential authors in the world. Sarah blogs in an intimate fashion - on philosophy, anxiety, minimalism and anti-consumerism - at sarahwilson.com, lives in Sydney, Australia, rides a bike everywhere, is a compulsive hiker and is eternally curious. In *first, we make the beast beautiful*, Sarah directs her intense focus and fierce investigatory skills onto this lifetime companion of hers, looking at the triggers and treatments, the fashions and fads. She reads widely and interviews fellow sufferers, mental health experts, philosophers, and even the Dalai Lama, processing all she learns through the prism her own experiences. Sarah pulls at the thread of accepted definitions of anxiety, and unravels the notion that it is a difficult, dangerous disease that must be medicated into submission. Ultimately, she re-frames anxiety as a spiritual quest rather than a burdensome affliction, a state of yearning that will lead us closer to what really matters. Practical and poetic, wise and funny, this is a small book with a big heart. It will encourage the myriad sufferers of the world's most common mental illness to feel not just better about their condition, but delighted by the possibilities it offers for a richer, fuller life. Island on the Edge Chris Berry, Feii Lu, 2005-01-01 This is the first English-language anthology on the Taiwan New Cinema and its legacy. It is an exciting collection which covers all the major filmmakers from Hou Hsiao Hsien and Edward Yang to Ang Lee and more.

Gathering a range of essays that analyze individual films produced since the advent of the Taiwan New Cinema in the early 1980s, it aims to complement Feii Lu's *Taiwan Cinema: Politics, Economics, Aesthetics*, translated by Chris Berry (Duke University Press and Hong Kong University Press, forthcoming). Taiwan and its internationally renowned cinema are on the edge in more ways than one. For all of its history the island has been on the edge of larger geopolitical entities, subjected to invasions, migrations, incursions, and pressures. On the other hand, as one of the Little Tiger economies of Asia, it has been on the cutting edge of the Asian economic boom and of technological innovation; in recent years it has pioneered democratization of authoritarian regimes in East Asia.

Reinventing Collapse Dmitry Orlov, 2011-06-01 A guide to the decline of the American empire for individuals, families and communities The United States is in steep decline. Plagued by runaway debt, a shrinking economy, and environmental catastrophes to rival Chernobyl, the United States has been retracing the trajectory of the Soviet Union in the early 1980s toward national bankruptcy and political dissolution. By comparing a collapse that has run its course to one that is now unfolding, Dmitry Orlov holds a unique lens up to America's present and future. As Orlov's predictions continue to come true, his writing continues to gain mainstream acceptance. This revised and updated edition of *Reinventing Collapse* examines the circumstances of the demise of the Soviet superpower and offers clear insights into how we might prepare for the events that are unfolding here. Orlov gives no quarter to prophets of doom and gloom, finding plenty of room for optimism, if only we focus our efforts on personal and cultural transformation instead of trying to perpetuate an impossible status quo. This challenging yet inspiring and surprisingly upbeat work is a must-read for anyone concerned about peak oil, the environment, geopolitics, international relations, and life in a resource-constrained world. Dmitry Orlov is an American engineer who was an eyewitness to the Soviet collapse and has written extensively on the subject of the impending collapse of the United States.

AI and Humanity Illah Reza Nourbakhsh, Jennifer Keating, 2020-03-10 An examination of the implications for society of rapidly advancing artificial intelligence systems, combining a humanities perspective with technical analysis; includes exercises and discussion questions. *AI and Humanity* provides an analytical framing and a common language for understanding the effects of technological advances in artificial intelligence on society. Coauthored by a computer scientist and a scholar of literature and cultural studies, it is unique in combining a humanities perspective with technical analysis, using the tools of literary explication to examine the societal impact of AI systems. It explores the historical development of these technologies, moving from the apparently benign Roomba to the

considerably more sinister semi-autonomous weapon system Harpy. The book is driven by an exploration of the cultural and etymological roots of a series of keywords relevant to both AI and society. Works examined range from Narrative of the Life of Frederick Douglass, given a close reading for its themes of literacy and agency, to Simon Head's critique of the effects of surveillance and automation on the Amazon labor force in Mindless. Originally developed as a textbook for an interdisciplinary humanities-science course at Carnegie Mellon, AI & Humanity offers discussion questions, exercises (including journal writing and concept mapping), and reading lists. A companion website provides updated resources and a portal to a video archive of interviews with AI scientists, sociologists, literary theorists, and others.

Tourism and the Branded City Stephanie Hemelryk Donald, John G. Gammack, 2016-02-24 Comparing the major Pacific Rim cities of Sydney, Hong Kong and Shanghai, this book examines world city branding. Whilst all three cities compete on the world's stage for events, tourists and investment, they are also at the centre of distinct film traditions and their identities are thus strongly connected with a cinematic impression. Using an interdisciplinary approach, this book not only analyses the city branding of these cities from the more widely researched perspectives of tourism, marketing and regional development, but also draws in cultural studies and psychology approaches which offer fresh and useful insights to place branding and marketing in general. The authors compare and contrast qualitative and quantitative original data as well as critically analyzing current texts and debates on city branding. In conclusion, they argue that city branding should contribute not only to regional development and identity, but also to sustainable economic well-being and public happiness.
