Groundbreaking Alvin Pang, Stewart Tan, Amit Prakash, Alvin Chua, Pearlwin Koh, Shuyi Ling, Nicholas Oh, Jie Hui Ong, Raynold Toh, Michelle Zhu, 2019 To mark MND's 60th anniversary in 2019, Groundbreaking: 60 Years of National Development in Singapore chronicles the story of Singapore's national development from pre-independence to the present day. Led by a foreword by Minister for National Development Lawrence Wong and a preface by MND Permanent Secretary Ow Foong Pheng, the book draws on newspapers, interviews and photos to explore 200 years of urban planning in Singapore as well as the Ministry's most significant milestones and achievements in shaping Singapore as a city and transforming the lives of citizens through key initiatives and policies. The book outlines how the Ministry and its agencies transformed Singapore in just six decades from squatters in slums to proud homeowners in modern housing estates; from modest shophouses to towering skyscrapers; from dirty, dusty streets to lush gardens and world-renowned skylines. With a pragmatic, can-do spirit, strong camaraderie and a sense of common purpose, the Ministry brought together the custodians of Singapore's built environment—planners, developers, architects, policymakers and civil servants—to overcome the many challenges that have confronted Singapore in its journey from Third World to First. The Ministry and its agencies are the kampung that built a global city--

Complications in Anesthesia E-Book Lee A Fleisher, Stanley H. Rosenbaum, 2017-09-29 Using a unique, problem-solving approach, Complications in Anesthesia, 3rd Edition, walks you through effective solutions to common complications in anesthesia and critical care. This practical reference uses a highly structured, clearly illustrated format to bring you up to date with what's new in the field, help you anticipate potential challenges, and guide you through life-saving solutions. Presents content in an updated, logical organization covering various types of complications (drugs, testing, intubation, line insertion, surgical procedures, etc.) followed by differential diagnosis and treatment of signs of complications (intraoperative, such as hypoxia or hypotension; and postoperative, such as MI). Follows a problem-based, practice-oriented approach throughout; case synopses are followed by concise coverage of recognition, risk assessment, implications, management, and prevention. Allows you to review the case reports, contemplate the implications, then check your response against what the experts have to say. Includes numerous photographs, diagrams, flow charts, and tables that illustrate key concepts. Ideal as a clinical reference and as a study tool when preparing for oral boards. Brings you up to date with new safety standards and the latest ASA guidelines.

Pi: A Source Book Jonathan M. Borwein, 2013-06-29 Our intention in this collection is to provide, largely through original writings, an extended account of pi from the dawn of mathematical time to the present. The story of pi reflects the most seminal, the most serious, and sometimes the most whimsical aspects of mathematics. A surprising amount of the most important mathematics and a significant number of the most important mathematicians have contributed to its unfolding directly or otherwise. Pi is one of the few mathematical concepts whose mention evokes a response of recognition and interest in those not concerned professionally with the subject. It has been a part of human culture and the educated imagination for more than twenty-five hundred years. The computation of pi is virtually the only topic from the most ancient stratum of mathematics that is still of serious interest to modern mathematical research. To pursue this topic as it developed throughout the millennia is to follow a thread through the history of mathematics that winds through geometry, analysis and special functions, numerical analysis, algebra, and number theory. It offers a

subject that provides mathematicians with examples of many current mathematical techniques as well as a palpable sense of their historical development. Why a Source Book? Few books serve wider potential audiences than does a source book. To our knowledge, there is at present no easy access to the bulk of the material we have collected.

Assessment of Microinsurance as Emerging Microfinance Service for the Poor Asian Development Bank,2017-02-01 The Asian Development Bank (ADB) is an active partner of the Government of the Philippines in developing microfinance---the provision of insurance products that meet the needs of the disadvantaged for risk protection and relief against misfortune. As a result, microfinance activities have increased, and diversified formal financial services were made available to impoverished clients at affordable costs. However, there is still the risk of making poverty-stricken clients worse off because of unexpected events, prompting ADB to create interventions that focus on microinsurance development. This report assesses the expansion of microinsurance activities based on the Philippines' experience, with guidance on next steps forward.

Complications in Anesthesiology Emilio B. Lobato,Nikolaus Gravenstein,Robert R. Kirby,2008 Now in its Third Edition, this comprehensive, problem-based textbook discusses the full range of complications in anesthesiology. Major sections cover intraoperative and postoperative complications affecting each organ system-respiratory, cardiovascular, neurologic, ophthalmologic, renal, hematologic and hemostatic, gastrointestinal, endocrine, obstetric, immunologic and infectious, and disorders of temperature regulation. Coverage includes problems that are rarely mentioned in older textbooks, such as ischemic optic neuropathy and postoperative cognitive dysfunction. Chapters address complications associated with specific equipment and techniques, with adverse drug interactions, and with herbal remedies and over-the-counter medications. Also included are chapters on medicolegal issues and risks to the anesthesiologist.

Cultural Transfer and Political Conflicts Andreas Kötzing,Caroline Moine,2017-07-17 Film festivals during the Cold War were fraught with the political and social tensions that dominated the world at the time. While film was becoming an increasingly powerful medium, the European festivals in particular established themselves as showcases for filmmakers and their perceptions of reality. At the same time, their prestigious, international character attracted the interest of states and private players. The history of these festivals thus sheds light not only on the films they made available to various publics, but on the cultural policies and political processes that informed their operations. Presenting new research by an international group of younger scholars, *Cultural Transfer and Political Conflicts* critically investigates postwar history in the context of film festivals reconstructing not only their social background and international dispensation, but also their centrality for cultural transfers between the East, the West and the South during the Cold War.

Anesthesia for Trauma Corey S. Scher,2014-08-28 Trauma is the leading cause of death among people under the age of 40 and it ranks third for all age groups. Still, relatively few clinicians specialize in trauma and training is often obtained through experience. The number of trauma patients is expected to continue to grow as pre-hospital care continues to advance. As well, hospitals increasingly see trauma treatment, which requires no pre-approval, as a good source of revenue. Given these developments, the number of opportunities for specialists trained in trauma, including anesthesiologists and critical care physicians, will expand in the

years ahead. This book addresses the need for an up-to-date, comprehensive and clinically focused volume for practitioners and trainees in trauma anesthesia and critical care. It is organized by organ system. The editor is an attending physician at a major urban hospital center recognized worldwide for its outstanding emergency medical services including trauma care and is recruiting leading trauma anesthesiologists to contribute. Anesthesiologists, pain medicine physicians, critical care physicians and trainees are the target audience.

Anthropological Perspectives on Student Futures Amy Stambach, Kathleen D. Hall, 2016-10-31 This book examines diverse ways in which young people from around the world envision and prepare for their future education, careers, and families. The book features cutting-edge anthropological essays including ethnographic accounts of schooling in India, South Africa, the US, Bhutan, Tanzania, and Nigeria. Each chapter focuses on today's generation of students and on students' use of education to create new possibilities for themselves. This volume will be of particular interest to practicing teachers and anthropologists and to readers who seek an ethnographic understanding of the world as seen through the eyes of students.

A Practical Approach to Cardiac Anesthesia Frederick A. Hensley, Donald Eugene Martin, Glenn P. Gravlee, 2012-10-08 The text manages to bridge the distance between anesthesia residents, fellow in cardiac anesthesia, anesthesiology practitioners, perfusionists, and CRNAs. Presented in outline format, it is a comprehensive overview of cardiac anesthesia. The text progresses from cardiac physiology and pharmacology to anesthetic management of specific cardiac surgical procedures to management of cardiac disorders, to circulatory support and organ preservation. It ends with a section on thoracic anesthesia and pain management in cardiac and thoracic procedures. Includes a new, more significant chapter on cardiac physiology and a new chapter on pericardial disease. New content added on adult congenital heart disease and new material on percutaneous valvae.
