*Pi: A Source Book* Jonathan M. Borwein, 2013-06-29 Our intention in this collection is to provide, largely through original writings, an extended account of pi from the dawn of mathematical time to the present. The story of pi reflects the most seminal, the most serious, and sometimes the most whimsical aspects of mathematics. A surprising amount of the most important mathematics and a significant number of the most important mathematicians have contributed to its unfolding directly or otherwise. Pi is one of the few mathematical concepts whose mention evokes a response of recognition and interest in those not concerned professionally with the subject. It has been a part of human culture and the educated imagination for more than twenty-five hundred years. The computation of pi is virtually the only topic from the most ancient stratum of mathematics that is still of serious interest to modern mathematical research. To pursue this topic as it developed throughout the millennia is to follow a thread through the history of mathematics that winds through geometry, analysis and special functions, numerical analysis, algebra, and number theory. It offers a subject that provides mathematicians with examples of many current mathematical techniques as well as a palpable sense of their historical development. Why a Source Book? Few books serve wider potential audiences than does a source book. To our knowledge, there is at present no easy access to the bulk of the material we have collected.

*Groundbreaking* Alvin Pang, Stewart Tan, Amit Prakash, Alvin Chua, Pearlwin Koh, Shuyi Ling, Nicholas Oh, Jie Hui Ong, Raynold Toh, Michelle Zhu, 2019 To mark MND's 60th anniversary in 2019, *Groundbreaking: 60 Years of National Development in Singapore* chronicles the story of Singapore's national development from pre-independence to the present day. Led by a foreword by Minister for National Development Lawrence Wong and a preface by MND Permanent Secretary Ow Foong Pheng, the book draws on newspapers, interviews and photos to explore 200 years of urban planning in Singapore as well as the Ministry's most significant milestones and achievements in shaping Singapore as a city and transforming the lives of citizens through key initiatives and policies. The book outlines how the Ministry and its agencies transformed Singapore in just six decades from squatters in slums to proud homeowners in modern housing estates; from modest shophouses to towering skyscrapers; from dirty, dusty streets to lush gardens and world-renowned skylines. With a pragmatic, can-do spirit, strong camaraderie and a sense of common purpose, the Ministry brought together the custodians of Singapore's built environment—planners, developers, architects, policymakers and civil servants—to overcome the many challenges that have confronted Singapore in its journey from Third World to First. The Ministry and its agencies are the kampung that built a global city--

**Space and the Architect** Herman Hertzberger, 2010 The work of Herman Hertzberger is the subject of wide international esteem. 1991 first saw publication of Hertzberger's *Lessons for Students in Architecture*, an elaborated version of lectures he had given since 1973 at Delft University of Technology. This immensely successful book has gone through many reprints and has also been published in Japanese, German, Italian, Portuguese, Taiwanese, Dutch, Greek, Polish, Iranian, Korean and Chinese. *Space and the Architect* is the second book written by Hertzberger. It charts the backgrounds to his work of recent years and the ideas informing it, drawing on a wide spectrum of subjects and designs by artists, precursors, past masters and colleagues, though with his own work persistently present as a reference. Space is its principal theme, physical space but also the mental or intellectual regions the architect calls upon during the process of designing. Once again Hertzberger's broad practical experience, his ideas and his seemingly inexhaustible 'library' of images are a major source of inspiration for anyone whose concern is the design of space.

**Building Militaries in Fragile States** Mara E. Karlin,2017-12-08 Combining rigorous academic scholarship with the experience of a senior Pentagon policymaker, Mara E. Karlin explores the key national security issue of our time: how to effectively build partner militaries. Given the complex and complicated global security environment, declining U.S. defense budgets, and an increasingly connected (and often unstable) world, the United States has an ever-deepening interest in strengthening fragile states. Particularly since World War II, it has often chosen to do so by strengthening partner militaries. It will continue to do so, Karlin predicts, given U.S. sensitivity to casualties, a constrained fiscal environment, the nature of modern nationalism, increasing transnational security threats, the proliferation of fragile states, and limits on U.S. public support for military interventions. However, its record of success is thin. While most analyses of these programs focus on training and equipment, Building Militaries in Fragile States argues that this approach is misguided. Instead, given the nature of a fragile state, Karlin homes in on the outsized roles played by two key actors: the U.S. military and unhelpful external actors. With a rich comparative case-study approach that spans Europe, Asia, and the Middle East, Karlin unearths provocative findings that suggest the traditional way of working with foreign militaries needs to be rethought. Benefiting from the practical eye of an experienced national security official, her results-based exploration suggests new and meaningful findings for building partner militaries in fragile states.

**Dictionary of Khotan Saka** Harold Walter Bailey,2010-06-10 The Cambridge University Press published (1945-1967) in six volumes Professor Bailey's transcriptions of Saka manuscripts found in Sin Kiang and Kansu (of the ancient kingdom of Khotan). They are central to any study of Old Iranian and the Iranian dialects; and they are also important for further understanding of the religious tradition in the sacred Avesta of the Zoroastrians, and for the history of the peoples of Central Asia generally. This 1979 dictionary represents the fulfilment of a plan formed in 1934 which required first the editing and transcription of the manuscripts, and then the slow elucidation of the whole corpus of texts. It contains a linguistic analysis and translation of all the Iranian words used in the texts. It is the necessary key to the understanding of the texts, to the mastery of the language itself, and to the linking of Khotan Saka into the Indo-European linguistic tradition.

*Assessment of Microinsurance as Emerging Microfinance Service for the Poor* Asian Development Bank,2017-02-01 The Asian Development Bank (ADB) is an active partner of the Government of the Philippines in developing microfinance---the provision of insurance products that meet the needs of the disadvantaged for risk protection and relief against misfortune. As a result, microfinance activities have increased, and diversified formal financial services were made available to impoverished clients at affordable costs. However, there is still the risk of making poverty-stricken clients worse off because of unexpected events, prompting ADB to create interventions that focus on microinsurance development. This report assesses the expansion of microinsurance activities based on the Philippines' experience, with guidance on next steps forward.

*Cultural Transfer and Political Conflicts* Andreas Kötzing,Caroline Moine,2017-07-17 Film festivals during the Cold War were fraught with the political and social tensions that dominated the world at the time. While film was becoming an increasingly powerful medium, the European festivals in particular established themselves as showcases for filmmakers and their perceptions of reality. At the same time, their prestigious, international character attracted the interest of states and private players. The history of these festivals thus sheds light not only on the films they made available to various publics, but on the cultural policies and political processes that informed their operations. Presenting new research by an international group of younger scholars, Cultural Transfer and Political Conflicts critically investigates postwar history in the context of film festivals reconstructing not only their social background and international dispensation, but also their centrality for cultural transfers between the East, the West and the South during the Cold War.
