**Learning To Teach Science** Justin Dillon,2003-09-02 In response to requests by science teachers for guidance on the process of mentoring in schools, this text provides an interactive, activities-based resource. It takes into account the progressive development of skills and competencies, for all those involved in the training of science teachers; pre-service, in-service and quality control. Activities are directly related to classroom and laboratory planning, organisation and management and include general question and answer exercises.; The book covers nine areas of science teacher competence crossed with five levels of progression to give a flexible programme of training. Each activity has a commentary for mentors and notes for student teachers, and discusses the rationale behind each activity. Five activities are written specifically to help mentors review progress at each of the five levels.; Additionally, it can be used by: experienced teachers for refreshing their own practice; Heads of Science Departments for upgrading science teaching within the departments; and those concerned with quality control and certification to recommend activities, taken from the book, to aid further professional development.

**Computer Forensics: Investigating Wireless Networks and Devices** EC-Council,2009-09-17 The Computer Forensic Series by EC-Council provides the knowledge and skills to identify, track, and prosecute the cyber-criminal. The series is comprised of five books covering a broad base of topics in Computer Hacking Forensic Investigation, designed to expose the reader to the process of detecting attacks and collecting evidence in a forensically sound manner with the intent to report crime and prevent future attacks. Learners are introduced to advanced techniques in computer investigation and analysis with interest in generating potential legal evidence. In full, this and the other four books provide preparation to identify evidence in computer related crime and abuse cases as well as track the intrusive hacker's path through a client system. The series and accompanying labs help prepare the security student or professional to profile an intruder's footprint and gather all necessary information and evidence to support prosecution in a court of law. Investigating Wireless Networks and Devices discusses how to investigate wireless attacks, as well as PDA, i-Pod, i-Phone and BlackBerry forensics. **The Highly Sensitive Person's Guide to Dealing with Toxic People** Shahida Arabi,2020-10-01 Reclaim your power from narcissists, manipulators, and other toxic people. If you're a highly sensitive person, or identify as an "empath," you may feel easily overwhelmed by the world around you, suffer from "people-pleasing," experience extreme anxiety or stress in times of conflict, or even take on the emotions of others. Due to your naturally giving nature, you may also be a target for narcissists and self-centered individuals who seek to exploit others for their own gain. So, how can you protect yourself? In The Highly Sensitive Person's Survival Guide to Dealing with Toxic People, you'll learn evidence-based skills grounded in cognitive-behavioral therapy (CBT) and dialectical behavior therapy (DBT) to help you recognize and shut down the common manipulation tactics used by toxic people, such as gaslighting, stonewalling, projection, covert put-downs, and love bombing. You'll also discover targeted tips to protect yourself from the five main types of toxic people: Garden-variety boundary-steppers Crazy-makers and attention-seekers Emotional vampires Narcissists Sociopaths and psychopaths Finally, you'll learn how to heal from toxic or narcissistic abuse, and find strategies for establishing healthy boundaries and a strong sense of self. If you're an HSP who is ready to take a stand against the toxic people in your life, this book has everything you need to survive and thrive.

**Creativity and Its Discontents** Laikwan Pang,2012 Laikwan Pang offers a complex critical analysis of creativity, creative industries, and the impact of Western copyright laws on creativity in China.

**Digital Forensics** André Årnes,2017-05-18 The definitive text for students of digital forensics, as well as professionals looking to deepen their understanding of an increasingly critical field Written by faculty members and associates of the world-renowned Norwegian Information Security Laboratory (NisLab) at the Norwegian University of Science and Technology (NTNU), this textbook takes a scientific approach to digital forensics ideally suited for university courses in digital forensics and information security. Each chapter was written by an accomplished expert in his or her field, many of them with extensive experience in law enforcement and industry. The author team comprises experts in digital forensics, cybercrime law, information security and related areas. Digital forensics is a key competency in meeting the growing risks of cybercrime, as well as for criminal investigation generally. Considering the astonishing pace at which new information technology – and new ways of exploiting information technology – is brought on line, researchers and practitioners regularly face new technical challenges, forcing them to continuously upgrade their investigatory skills. Designed to prepare the next generation to rise to those challenges, the material contained in Digital Forensics has been tested and refined by use in both graduate and undergraduate programs and subjected to formal evaluations for more than ten years. Encompasses all aspects of the field, including methodological, scientific, technical and legal matters Based on the latest research, it provides novel insights for students, including an informed look at the future of digital forensics Includes test questions from actual exam sets, multiple choice questions suitable for online use and numerous visuals, illustrations and case example images Features real-world examples and scenarios, including court cases and technical problems, as well as a rich library of academic references and references to online media Digital Forensics is an excellent introductory text for programs in computer science and computer engineering and for master degree programs in military and police education. It is also a valuable reference for legal practitioners, police officers, investigators, and forensic practitioners seeking to gain a deeper understanding of digital forensics and cybercrime.

**A Primer of Ecclesiastical Latin** John F. Collins,1988 The chief aim of this primer is to give the student, within one year of study, the ability to read ecclesiastical Latin. Collins includes the Latin of Jerome's Bible, of canon law, of the liturgy and papal bulls, of scholastic philosophers, and of the Ambrosian hymns, providing a survey of texts from the fourth century through the Middle Ages. An Answer Key to this edition is now available. Please see An Answer Key to A Primer of Ecclesiastical Latin, prepared by John Dunlap.

**Rebel City: Hong Kong's Year Of Water And Fire** South China Morning Post Team,2020-05-21 SCMP's reporting team looks back at Hong Kong's most wrenching political crisis since its return to Chinese rule in 1997. Anti-extradition bill protests that morphed rapidly into a wider anti-government movement in 2019 left no aspect of the city untouched, from its social compact to its body politic to its open economy. The demonstrations which continued well into 2020 have tested every institution of the city, from the civil service to the police to the courts and even its rail transport operator, and from offices and businesses to universities and schools, and from churches to families and even friends. This book is for anyone seeking to understand not just what Hong Kong has gone through but also the global phenomenon of increasingly leaderless protest movements. Fueled by profound angst about the place of millennial youth in society, widening income inequality, and the speed of digital communications, Hong Kong was in retrospect ripe to be the laboratory for a new-age protest movement, nearly a decade after the Middle East's Arab spring. The essays in the book collectively compose a picture of a society in trauma, bent and broken, but showing signs of an uncanny ability to bounce back. What shape it will be in a few years from now, however, is much harder to predict. Related Link(s)

**Groundbreaking** Alvin Pang, Stewart Tan, Amit Prakash, Alvin Chua, Pearlwin Koh, Shuyi Ling, Nicholas Oh, Jie Hui Ong, Raynold Toh, Michelle Zhu, 2019 To mark MND's 60th anniversary in 2019, *Groundbreaking: 60 Years of National Development in Singapore* chronicles the story of Singapore's national development from pre-independence to the present day. Led by a foreword by Minister for National Development Lawrence Wong and a preface by MND Permanent Secretary Ow Foong Pheng, the book draws on newspapers, interviews and photos to explore 200 years of urban planning in Singapore as well as the Ministry's most significant milestones and achievements in shaping Singapore as a city and transforming the lives of citizens through key initiatives and policies. The book outlines how the Ministry and its agencies transformed Singapore in just six decades from squatters in slums to proud homeowners in modern housing estates; from modest shophouses to towering skyscrapers; from dirty, dusty streets to lush gardens and world-renowned skylines. With a pragmatic, can-do spirit, strong camaraderie and a sense of common purpose, the Ministry brought together the custodians of Singapore's built environment—planners, developers, architects, policymakers and civil servants—to overcome the many challenges that have confronted Singapore in its journey from Third World to First. The Ministry and its agencies are the *kampung* that built a global city--

**Power** Shahida Arabi, 2017-01-11 Pathological mind games. Covert and overt put-downs. Triangulation. Gaslighting. Projection. These are the manipulative tactics survivors of malignant narcissists are unfortunately all too familiar with. As victims of silent crimes where the perpetrators are rarely held accountable, survivors of narcissistic abuse have lived in a war zone of epic proportions, enduring an abuse cycle of love-bombing and devaluation-psychological violence on steroids. From how to heal our addiction to the narcissist to how to recognize a covert narcissist, Shahida Arabi's articles on narcissistic abuse have gained renown as some of the most accurate and in-depth depictions of this terrifying trauma, resonating with millions of survivors all over the world and receiving endorsements from numerous mental health professionals. In this essay compilation, readers can enjoy some of her most popular articles as well as new thought pieces on narcissistic abuse: what therapists have to say about malignant narcissists and how children of narcissistic parents can become trapped in the trauma repetition cycle. Survivors are offered new insights on what it means to be both a survivor and a thriver of covert manipulation and trauma. *POWER* teaches us that it is important to not only understand the tactics of toxic personalities but also to recognize and combat the effects of narcissistic abuse; it guides the survivor to learning, growing, healing and most importantly of all—owning their agency to rebuild their lives and transform their powerlessness into victory.

**Assessment of Microinsurance as Emerging Microfinance Service for the Poor** Asian Development Bank, 2017-02-01 The Asian Development Bank (ADB) is an active partner of the Government of the Philippines in developing microfinance--the provision of insurance products that meet the needs of the disadvantaged for risk protection and relief against misfortune. As a result, microfinance activities have increased, and diversified formal financial services were made available to impoverished clients at affordable costs. However, there is still the risk of making poverty-stricken clients worse off because of unexpected events, prompting ADB to create interventions that focus on microinsurance development. This report assesses the expansion of microinsurance activities based on the Philippines' experience, with guidance on next steps forward.

**Beginning film studies** Andrew Dix, 2016-05-01 *Beginning film studies* offers the ideal introduction to this vibrant subject. Written accessibly and with verve, it ranges across the key topics and manifold approaches to film studies. Andrew Dix has thoroughly updated the first edition, and this new volume includes new case studies, overviews of recent developments in the discipline, and up-to-the-minute suggestions for further reading. The book begins by considering some of film's formal features - mise-en-scène, editing and sound - before moving outwards to narrative, genre, authorship, stardom and ideology. Later chapters on film industries and on film consumption - where and how we watch movies - assess the discipline's recent geographical 'turn'. The book references many film cultures, including Hollywood, Bollywood and contemporary Hong Kong. Case studies cover such topics as sound in *The Great Gatsby* and narrative in *Inception*. The superhero movie is

studied; so too is Jennifer Lawrence. Beginning film studies is also interactive, with readers enabled throughout to reflect critically upon the field.

*Cultural Transfer and Political Conflicts* Andreas Kötzing,Caroline Moine,2017-07-17 Film festivals during the Cold War were fraught with the political and social tensions that dominated the world at the time. While film was becoming an increasingly powerful medium, the European festivals in particular established themselves as showcases for filmmakers and their perceptions of reality. At the same time, their prestigious, international character attracted the interest of states and private players. The history of these festivals thus sheds light not only on the films they made available to various publics, but on the cultural policies and political processes that informed their operations. Presenting new research by an international group of younger scholars, Cultural Transfer and Political Conflicts critically investigates postwar history in the context of film festivals reconstructing not only their social background and international dispensation, but also their centrality for cultural transfers between the East, the West and the South during the Cold War.

*God's Undertaker* John C Lennox,2011-03-29 Evaluates the evidence of modern science in relation to the debate between the atheistic and theistic interpretations of the universe, and provides a fresh basis for discussion. The book has grown out of the author's lengthy experience of lecturing and debating on this subject in the UK, USA, Germany and Russia, and has been written in response to endless requests for the argumentation in written form.
