Learning To Teach Science Justin Dillon,2003-09-02 In response to requests by science teachers for guidance on the process of mentoring in schools, this text provides an interactive, activities-based resource. It takes into account the progressive development of skills and competencies, for all those involved in the training of science teachers; pre-service, in-service and quality control. Activities are directly related to classroom and laboratory planning, organisation and management and include general question and answer exercises.; The book covers nine areas of science teacher competence crossed with five levels of progression to give a flexible programme of training. Each activity has a commentary for mentors and notes for student teachers, and discusses the rationale behind each activity. Five activities are written specifically to help mentors review progress at each of the five levels.; Additionally, it can be used by: experienced teachers for refreshing their own practice; Heads of Science Departments for upgrading science teaching within the departments; and those concerned with quality control and certification to recommend activities, taken from the book, to aid further professional development.

Cultural Transfer and Political Conflicts Andreas Kötzing,Caroline Moine,2017-07-17 Film festivals during the Cold War were fraught with the political and social tensions that dominated the world at the time. While film was becoming an increasingly powerful medium, the European festivals in particular established themselves as showcases for filmmakers and their perceptions of reality. At the same time, their prestigious, international character attracted the interest of states and private players. The history of these festivals thus sheds light not only on the films they made available to various publics, but on the cultural policies and political processes that informed their operations. Presenting new research by an international group of younger scholars, Cultural Transfer and Political Conflicts critically investigates postwar history in the context of film festivals reconstructing not only their social background and international dispensation, but also their centrality for cultural transfers between the East, the West and the South during the Cold War.

The Distorting Mirror Laikwan Pang,2007-10-31 The Distorting Mirror analyzes the multiple and complex ways in which urban Chinese subjects saw themselves interacting with the new visual culture that emerged during the turbulent period between the 1880s and the 1930s. The media and visual forms examined include lithography, photography, advertising, film, and theatrical performances. Urbanites actively engaged with and enjoyed this visual culture, which was largely driven by the subjective desire for the empty promises of modernity—promises comprised of such abstract and fleeting concepts as new, exciting, and fashionable. Detailing and analyzing the trajectories of development of various visual representations, Laikwan Pang emphasizes their interactions. In doing so, she demonstrates that visual modernity was not only a combination of independent cultural phenomena, but also a partially coherent sociocultural discourse whose influences were seen in different and collective parts of the culture. The work begins with an overall historical account and theorization of a new lithographic pictorial culture developing at the end of the nineteenth century and an examination of modernity's obsession with the investigation of the real. Subsequent chapters treat the fascination with the image of the female body in the new visual culture; entertainment venues in which this culture unfolded and was performed; how urbanites came to terms with and interacted with the new reality; and the production and reception of images, the dynamics between these two being a theme explored throughout the book. Modernity, as the author shows, can be seen as spectacle. At the same time, she demonstrates that, although the excessiveness of this spectacle captivated the modern subject, it did not completely overwhelm or immobilize those who engaged with it. After all, she argues, they participated in and performed with this ephemeral visual culture in an attempt to come to terms with their own new, modern self.

Man Jesus Loved Theodore W. Jr. Jennings,Theodore W. Jennings,2009-06-24 Homosexuality has been at the forefront of debate in the church for the last quarter-century, with Biblical interpretation at the heart of this debate. Some biblical passages appear to condemn certain same-sex relationships or erotic practices, resulting in a challenge to clergy as well as laity regarding the preaching and understanding of these Biblical passages. In The Man Jesus Loved, Jennings proposes a gay-affirmative reading of the Bible in the hope of respecting the integrity of these texts and making them more clear as well as persuasive. This reading suggests that the exclusion of persons on the basis of their sexual orientation or same-sex practices fundamentally distorts the Bible generally and the traditions concerning Jesus in particular.

Forensic Examination of Digital Evidence U S Department of Justice,2014-08-01 Developments in the world have shown how simple it is to acquire all sorts of information through the use of computers. This information can be used for a variety of endeavors, and criminal activity is a major one. In an effort to fight this new crime wave, law enforcement agencies, financial institutions, and investment firms are incorporating computer forensics into their infrastructure. From network security breaches to child pornography investiga- tions, the common bridge is the demon- stration that the particular electronic media contained the incriminating evidence. Supportive examination procedures and protocols should be in place in order to show that the electronic media contains the incriminating evidence.
