Descent Tim Johnston, 2015-01-06 A Breakout NEW YORK TIMES Bestseller A USA Today Bestseller An Indie National Bestseller “Outstanding . . . The days when you had to choose between a great story and a great piece of writing? Gone.” –Esquire “The story unfolds brilliantly, always surprisingly . . . The magic of his prose equals the horror of Johnston’s story; each somehow enhances the other . . . Read this astonishing novel.” –The Washington Post “Tim Johnston’s high-wire literary thriller . . . will leave you gasping.” –Vanity Fair “A riveting literary thriller of the can’t-stop-turning-the-page, stay-up-all-night variety.” –Alice LaPlante, author of *A Circle of Wives* The Rocky Mountains have cast their spell over the Courtlands, a young family from the plains taking a last summer vacation before their daughter begins college. For eighteen-year-old Caitlin, the mountains loom as the ultimate test of her runner’s heart, while her parents hope that so much beauty, so much grandeur, will somehow repair a damaged marriage. But when Caitlin and her younger brother, Sean, go out for an early morning run and only Sean returns, the mountains become as terrifying as they are majestic, as suddenly this family find themselves living the kind of nightmare they’ve only read about in headlines or seen on TV. As their world comes undone, the Courtlands are drawn into a vortex of dread and recrimination. Why weren’t they more careful? What has happened to their daughter? Is she alive? Will they ever know? Caitlin’s disappearance, all the more devastating for its mystery, is the beginning of the family’s harrowing journey down increasingly divergent and solitary paths until all that continues to bind them together are the questions they can never bring themselves to ask: At what point does a family stop searching? At what point will a girl stop fighting for her life? Written with a precision that captures every emotion, every moment of fear, as each member of the family searches for answers, *Descent* is a perfectly crafted thriller that races like an avalanche toward its heart-pounding conclusion, and heralds the arrival of a master storyteller.

Blind Descent James M. Tabor, 2011-02-15 “Heart-stopping and relentlessly gripping. Tabor takes us on an odyssey into unfathomable worlds beneath us, and into the hearts of rare explorers who will do anything to get there first.” –Robert Kurson, author of *Shadow Divers* In 2004, two great scientist-explorers attempted to find the bottom of the world. American Bill Stone took on the vast, deadly Cheve Cave in southern Mexico. Ukrainian Alexander Klimchouk targeted Krubera, a freezing nightmare of a supercave in the war-torn former Soviet republic of Georgia. Both men spent months almost two vertical miles deep, contending with thousand-foot drops, raging whitewater rivers, monstrous waterfalls, mile-long belly crawls, and the psychological horrors produced by weeks in absolute darkness, beyond all hope of rescue. Based on his unprecedented access to logs and journals as well as hours of personal interviews, James Tabor has crafted a thrilling exploration of man’s timeless urge to discover—and of two extraordinary men whose pursuit of greatness led them to the heights of triumph and the depths of tragedy. *Blind Descent* is an unforgettable addition to the classic literature of true-life adventure, and a testament to human survival and endurance. “Holds the reader to his seat, containing dangers aplenty with deadly falls, killer microbes, sudden burial, asphyxiation, claustrophobia, anxiety, and hallucinations far underneath the ground in a lightless world. Using a pulse-pounding narrative, this is tense real-life adventure pitting two master cavers mirroring the cold war with very uncommonly high stakes.” –Publishers Weekly (starred review) “A fascinating and informative introduction to the sport of cave diving, as well as a dramatic portrayal of a significant man-vs.-nature conflict. . . . What counts is Tabor’s knack for maximizing dramatic potential, while also managing to be informative and attentive to the major personalities associated with the most important cave explorations of the last two decades.” –Kirkus Reviews Includes a 16-pg black and white insert

Descent Roland Smith, 2020 In a thrilling novel from the best-selling author of *Peak*, mountain-climbing prodigy Peak Marcello faces his toughest challenge yet as he descends into Tibet and goes head-to-head with an old enemy.

Targeted Transnationals Jenna Hennebry, Bessma Momani, 2013-04-01 Following 9/11, the securitization of state practices and policies has chipped away at the citizenship and personal rights of all Canadians, particularly those of Arab descent. This book argues that in a securitized global context and through racialized immigration and security policies, Arab Canadians have become targeted transnationals. Media representations have further legitimized their homogenization and racialization. The contributors to this book examine state practices towards, and media representations of, Arab Canadians. They also present voices that counter the dominant discourse and trace forms of community resistance to the racialization of Arab Canadians.

Deep Learning for Targeted Treatments Rishabha Malviya, Gheorghita Ghinea, Rajesh Kumar Dhanaraj, Balamurugan Balusamy, Sonali Sundram, 2022-09-20 DEEP LEARNING FOR TREATMENTS The book provides the direction for future research in deep learning in terms of its role in targeted treatment, biological systems, site-specific drug delivery, risk assessment in therapy, etc. Deep Learning for Targeted Treatments describes the importance of the deep learning framework for patient care, disease imaging/detection, and health management. Since deep learning can and does play a major role in a patient’s healthcare management by controlling drug delivery to targeted tissues or organs, the main focus of the book is to leverage the various prospects of the DL framework for targeted therapy of various diseases. In terms of its industrial significance, this general-purpose automatic learning procedure is being widely implemented in pharmaceutical healthcare. Audience The book will be immensely interesting and useful to researchers and those working in the areas of clinical research, disease management, pharmaceuticals, R&D formulation, deep learning analytics, remote healthcare management, healthcare analytics, and deep learning in the healthcare industry.

First Descent Pam Withers, 2014-02-11 Montana-born Rex dreams of following in his grandfather's footsteps and making a first descent down one of the world's last unconquered wild rivers. When he finally gets enough sponsors, Rex heads to South America to tackle the well-named El Furioso. And while he anticipates the river's challenges, he finds himself in a situation where the real danger is human. In Colombia, he hires a guide: seventeen year-old Myriam Calambás, an indígena who has lived along El Furioso all her life. Though she loves its rushing waters, Myriam longs to go to university, become a reporter, and tell the world what is happening to her people. Her dreams, and her very survival, are in the balance when she and Rex become caught up in the clash between the paramilitaries, who work for the rich landowners, and the guerillas, who are supposed to protect the poor. Pam Withers' skill at writing about extreme sports is reflected in this compelling novel about an endangered world and a people struggling for their very right to exist.

Social Inequities in Cancer Dana Hashim, Friederike Erdmann, Hajo Zeeb, 2019-08-19 “Social Inequities in Cancer” is a compendium of articles that identify barriers and metrics on the topic of modifiable and unnecessary cancer inequalities. Social inequities have long been recognised as a strong contributing factor in health and cancer inequalities for the past several decades. Despite progress in cancer treatment, cancer incidence, mortality and survival vary markedly between and within countries. Globalisation, greater life expectancy, emerging analytical technologies, and the scalability of big data have revolutionized the vantage point from which social inequities can be studied. The focus of these articles is inequalities as they relate to cancer, with the inequalities ranging from the community to the global scale. The Descent Jeff Long,1999-11-12 We are not alone. Some call them devils or demons. But they are real. They are down there. And they are waiting for us to find them. In a cave in the Himalayas, a guide discovers a self-mutilated body with a warning: Satan exists. In the Kalahari Desert, a nun unearths evidence of a proto-human species and a deity called Older-than-Old. In Bosnia, something has been feeding upon the dead in a mass grave. So begins mankind’s most shocking realization: the underworld is a vast geological labyrinth populated by another race of beings. With all of Hell's precious resources and territories to be won, a global race ensues. Nations, armies, religions, and industries rush to colonize and exploit the subterranean frontier. A scientific expedition is launched westward to explore beneath the Pacific Ocean floor, both to catalog the riches there and to learn how life could develop in the sunless abyss. But in the dark underground, as humanity falls away from them, the scientists and mercenaries find themselves prey not only to the savage creatures, but also to their own treachery, mutiny, and greed. One thing is certain: Miles inside the earth, evil is very much alive.

Final Descent Terence Hill,1998-08-12 Final Descent presents detailed information on the loss of allied aircraft in the forbidding hills of Wales and the often tragic consequences.

Photoelectric Detection on Derived Attributes of Targets Xing Yang,Yihua Hu,2023-08-22 This book highlights the novel photoelectric detection technique on derived attributes of targets. Photoelectric detection on derived attributes of targets is a new target detection and monitoring method. It is achieved by acquiring three types of attributes of the target, including those that reflect the essential features of parts of the target, those directly generated from the target, and those synthesized by the target features. The book introduces the classification of derived attributes of targets and describes typical detection methods. Emphases are put on laser detection of aerial moving targets, using derived attributes such as the disturbance of atmospheric wind fields, trailing vortexes, and the disturbance of atmospheric components. The authors also elaborate on visible light imaging detection using derived attributes such as retroreflection and the identification of target carriers. Besides, the synthetic attributes processing of integrated aerospace images is introduced for the detection of targets on the ground and sea surfaces. This book can be used as a good reference for researchers engaged in the fields of photoelectric detection, target detection and image processing, and as a reference book for senior undergraduates and postgraduates in relevant majors.

Deep Learning for Radar and Communications Automatic Target Recognition Uttam K. Majumder,Erik P. Blasch,David A. Garren,2020-07-31 This authoritative resource presents a comprehensive illustration of modern Artificial Intelligence / Machine Learning (AI/ML) technology for radio frequency (RF) data exploitation. It identifies technical challenges, benefits, and directions of deep learning (DL) based object classification using radar data, including synthetic aperture radar (SAR) and high range resolution (HRR) radar. The performance of AI/ML algorithms is provided from an overview of machine learning (ML) theory that includes history, background primer, and examples. Radar data issues of collection, application, and examples for SAR/HRR data and communication signals analysis are discussed. In addition, this book presents practical considerations of deploying such techniques, including performance evaluation, energy-efficient computing, and the future unresolved issues.
