The Battle of Leyte Gulf H. P. Willmott, 2005-08-19 The Battle of Leyte Gulf was an extremely unusual battle. It was unusual on five separate counts that are so obvious that they are usually missed. It was unusual in that it was a series of actions, not a single battle. It was unusual as a naval battle in that it was fought over five days; historically, naval battles have seldom spread themselves over more than one or two days. It was unusual in terms of its name. This battle involved a series of related actions subsequently grouped together under the name of just one of these engagements, but in fact none of the actions were fought inside Leyte Gulf.... More importantly, it was unusual in that it was a full-scale fleet action fought after the issue of victory and defeat at sea had been decided, and it was unusual in that it resulted in clear, overwhelming victory and defeat. -- from Chapter One The Battle of Leyte Gulf -- October 22-28, 1944 -- was the greatest naval engagement in history. In fact the battle was four separate actions, none of which were fought in the Gulf itself, and the result was the destruction of Japanese naval power in the Pacific. This book is a detailed and comprehensive account of the fighting from both sides. It provides the context of the battle, most obviously in terms of Japanese calculations and the search for a fitting place to die and the chance to bloom as flowers of death. Using Japanese material never previously noted in western accounts, H.P. Willmott provides new perspectives on the unfolding of the battle and very deliberately seeks to give readers a proper understanding of the importance of this battle for American naval operations in the following month. This careful interrogation of the accounts of the last fleet action is a significant contribution to military history.

The Emmons Saga USS Emmons Association, 2005-11-16 Rear Admiral Edward Baxter Billingsley's book, *The Emmons Saga*, captures the deck plate routine of the Sailors aboard Emmons as she intersected with the great events of World War II and influenced the course of history. Any reader who has ever served afloat will recognize the authenticity of every detail, and will appreciate the complex relationship of an individual ship with war and diplomacy. This is a history of brave men ? members of the greatest generation ? who operated in both the Atlantic and Pacific theaters of World War II. Admiral Billingsley provides us a microcosm of World War II naval warfare, spanning the Battle of the Atlantic, the North African Campaign, the Normandy Invasion and the Battle of Okinawa. Historic facts and colorful sea-stories depict life aboard a naval combatant and illuminate the bonds of friendship and trust that developed among this group of young, inexperienced, and untested youth. As members of that special generation pass on at a rate of over 1,000 each day, it is important that the virtues and sacrifice that they epitomize be remembered by future generations of Americans. USS EMMONS rose from the depths of obscurity in 2001 when her gravesite was discovered off the shores of Okinawa and charted by American recreational divers. Her rediscovery has focused renewed interest both in the United States and Japan into the character of the American youth of that generation. The Emmons Saga, originally published a decade and a half ago, has been revised and up-dated, and it deserves a place of honor on the bookshelf of every maritime historian and lover of the sea. Admiral John S. McCain and the Triumph of Naval Air Power William F Trimble, 2019-04-15 Admiral John S. McCain and the Triumph of Naval Air Power covers the life and professional career of Adm. John S. McCain Sr. (1884–1945). Spanning most of the first half of the twentieth century, McCain's life and career highlight the integration of aviation into the Navy, emphasizing the evolution of the aircraft carrier from a tactical element of the fleet stressing sea control to a strategic force capable of long-range power projection. Although much of the book focuses on carrier aviation, McCain was instrumental in the emergence of flying boats, considered essential for long-range reconnaissance in the Pacific. One of the senior officers branded as “Johnny-Come-Latelys” by pioneer aviators, McCain nevertheless brought fresh approaches and innovation to naval aviation. His prewar and initial wartime commands encompassed tender-based and shore-based aviation, which were critical to early operations in the Pacific, yet McCain also understood the power and potential of carrier-based aviation, initially as commanding officer of the USS Ranger before the war, then as a carrier task force commander under Adm. William F. Halsey in the Pacific in 1944 and 1945. Moreover, he served tours as Chief of the Bureau of Aeronautics and the first Deputy Chief of Naval Operations (Air) in 1942–1944. In these posts he witnessed and played a role in the culmination of naval air power as a means of delivering crippling blows to the enemy's homeland. McCain was among only a handful of officers who achieved prominence during the war and who had experience in all of these varied and challenging levels of command.

Hell from the Heavens John Wukovits, 2015-04-07 Looking toward the heavens, the destroyer crew saw what seemed to be the entire Japanese Air Force assembled directly above. Hell was about to be unleashed on them in the largest single-ship kamikaze attack of World War II. On April 16, 1945, the crewmen of the USS Laffey were battle hardened and prepared. They had engaged in combat off the Normandy coast in June 1944. They had been involved in three prior assaults of enemy positions in the Pacific-at Leyte and Lingayen in the Philippines and at Iwo Jima. They had seen kamikazes purposely crash into other destroyers and cruisers in their unit and had seen firsthand the bloody results of those crazed tactics. But nothing could have prepared the crew for this moment-an eighty-minute ordeal in which the single small ship was targeted by no fewer than twenty-two Japanese suicide aircraft. By the time the unprecedented attack on the Laffey was finished, thirty-two sailors lay dead, more than seventy were wounded, and the ship was grievously damaged. Although she lay shrouded in smoke and fire for hours, the Laffey somehow survived, and the gutted American warship limped from Okinawa's shore for home, where the ship and crew would be feted as heroes. Using scores of personal interviews with survivors, the memoirs of crew members, and the sailors' wartime correspondence, historian and author John Wukovits breathes life into the story of this nearly forgotten historic event. The US Navy described the kamikaze attack on the Laffey as one of the great sea epics of the war. In *Hell from the Heavens*, the author makes the ordeal of the Laffey and her crew a story for the ages.

Task Analyses of Military Intelligence Critical Combat Functions Terry P. Bartkoski, 1998 This preface provides the user with necessary and relevant information concerning the development of critical combat functions (CCF): CCF 1, Conduct Intelligence Planning, CCF 2, Collect Information, CCF 3, Process Information, and CCF 4, Disseminate Intelligence, as performed by a brigade. A CCF is defined as. an integration (i.e., interrelationship) among participants and tasks that represents a force multiplier with a definable outcome. Participants and organizational structure identified in this analysis are based on table of organization and equipment (TOE) 87042L100, dated 10/05/95. Field Manual (FM) 71-3, The Armored and Mechanized Infantry Brigade, January 1996, was used to identify special staff positions. These analyses of a brigade's performance of the CCFs which compose the Intelligence Bafflefield Operating System (BOS) are a product of the process of developing a training strategy for the brigade. The analyses describe tasks, participants, products, processes, and relationships necessary for providing intelligence to the heavy brigade commander and staff, higher and lower units, supporting units, and adjacent units.--DTIC.

Air War Pacific Eric Hammel, 2020-12-05 AIR WAR PACIFIC: Chronology America's Air War Against Japan in East Asia and the Pacific 1941 – 1945 Eric Hammel THE GREAT AMERICAN AERIAL CRUSADE OF WORLD WAR II: There was never a military campaign like it, and there never will be another. Here is an opportunity to follow the great crusade as it unfolded in the air over the Japan's ill-gotten empire in East Asia and the Pacific. This exhaustive chronology sheds a fascinating light on the course of America's air war against Japan in all the active theaters. * The Air War Pacific Chronology is a day-by-day accounting of all the major combat aviation missions undertaken by United States Army Air Forces, United States Navy, United States Marine Corps, and American Volunteer Group units and commands in China, Burma, India, and throughout the Pacific during World

War II. * All Army Air Forces, Navy, Marine, and Flying Tiger theater fighter aces are covered including unit affiliation, date and time ace status was attained, and date and time of highest victory tally (over ten). * Information pertaining to the arrival, activation, transfer, departure, and decommissioning of air commands, combat units, and special units. Comings and goings of the commanders of major aviation units are also covered. * Provides a rich contextual framework pertaining to related ground campaigns; international and high-command conferences and decisions influencing air strategies and campaigns; and breakthroughs in the development of special techniques and equipment. * Includes a bibliography, guide to abbreviations, maps, and two indexes. Eric Hammel is the author of more than forty military history books, including Pacifica Military History's Air War Europa Chronology; Fire In the Streets; Six Days in June; Aces Against Japan, and Guadalcanal: Starvation Island.

"Ruck it Up!" Charles Edward Kirkpatrick,2006 ?The transformation of V Corps from a traditional tank-heavy corps committed to a high intensity battle in central Europe to a lighter, more deployable reaction force simply based in central Europe is an exemplar of the changes that confronted the army at large to be sustained. This narrative outlines the major shifts in the operational context in which V Corps found itself after 1990 and discusses the major military operations in which the corps took part. Those operations gave the headquarters the essential feedback to adjust its organization and training to be more in synch with the requirements it faced. The study offers some tentative conclusions about the process of transformation of the Army in Europe, as seen from the perspective of one heavy, mechanized corps.

Ebb and Flow: November 1950 - July 1951 Billy C. Mossman,1990 NOTE: NO FURTHER DISCOUNT FOR THIS PRINT PRODUCT---OVERSTOCK SALE -- Significantly reduced list price while supplies last Ebb and Flow records an important chapter in the Korean War, the period from late November 1950 to early July 1951 when battle lines did indeed ebb and flow in pronounced surges. Billy C. Mossman begins with the last weeks of the pell-mell rush of United Nations forces to the Chinese border and goes on to chronicle in great detail the test of American military leadership and resources posed by the taxing retreat of the Eighth Army and X Corps across the frozen wastes of North Korea. He highlights the limitations imposed by terrain and weather on the fighting capabilities of an American army facing surprise attack from a large disciplined enemy. In addition, the operations he describes in such careful detail vivify the principles of war for those with an interest in studying the profession of arms. High school students and above researching the Korean War may be interested in this book. Additioanlly, military leaders, strategists, historians, and political scientists may be interested in this volume about the Korean War.
