Contemporary Task-Based Language Teaching in Asia Michael Thomas,Hayo Reinders,2015-02-26 Over the last decade task-based approaches to language learning and teaching (TBLT) have become a global focus of increased levels of research. Governments around the world have turned to TBLT as a potential solution for curricula that lack authentic and meaningful engagement with language learning and are failing to motivate students as a result. This book focuses on Asia, where this shift has been particularly in evidence. TBLT has often been implemented in top-down approaches to curriculum development, which presents a huge range of challenges at the cultural as well as the pedagogic level. Contemporary Task Based Language Teaching in Asia looks at the drivers, stakeholders and obstacles across the region. Some countries have adapted TBLT to deal with the local constraints, others have found it hard to apply and many are still in the process of investigating its implementation in their specific contexts. This collection is important to all involved in language development, from curriculum reform to materials development. It assists from programme evaluation to the setting of assessment standards. The chapters cover all aspects of language education across Asia, from primary to tertiary, private and public education, as well as innovations at local, regional and national levels.

Task-Based Approaches to Teaching and Assessing Pragmatics Naoko Taguchi,YouJin Kim,2018-08-15 This volume is the first book-length attempt to bring together the fields of task-based language teaching (TBLT) and second language pragmatics by exploring how the teaching and assessment of pragmatics can be integrated into TBLT. The TBLT-pragmatics connection is illustrated in a variety of constructs (e.g., speech acts, honorifics, genres, interactional features), methods (e.g., quantitative, quasi-experimental, conversation analysis), and topics (e.g., instructed SLA, heritage language learning, technology-enhanced teaching, assessment, and discursive pragmatics). Chapters in this volume collectively demonstrate how the two fields can together advance the current practice of teaching language for socially-situated, real-world communicative needs.

Task-Based Language Learning – Insights from and for L2 Writing Heidi Byrnes,Rosa M. Manchón,2014-11-14 The book seeks to enlarge the theoretical scope, research agenda, and practices associated with TBLT in a two-way dynamic, by exploring how insights from writing might reconfigure our understanding of tasks and, in turn, how work associated with TBLT might benefit the learning and teaching of writing. In order to enrich the domain of task and to advance the educational interests of TBLT, it adopts both a psycholinguistic and a textual meaning-making orientation. Following an issues-oriented introductory chapter, Part I of the volume explores tenets, methods, and findings in task-oriented theory and research in the context of writing; the chapters in Part II present empirical findings on task-based writing by investigating how writing tasks are implemented, how writers differentially respond to tasks, and how tasks can contribute to language development. A coda chapter summarizes the volume's contribution and suggests directions for advancing TBLT constructs and research agendas.

Engaging in Culturally Relevant Math Tasks Lou Edward Matthews,Shelly M. Jones,Yolanda A. Parker,2023 This was part of a reflection from a graduate student in one of our mathematics education courses. The students were all teachers, asked to complete an assignment incorporating culturally relevant teaching into a lesson plan. The concern expressed in the reflection was about potential pushback associated with delivering such a lesson - not from students, but from administrators and possibly parents--

Technology-Supported Learning In and Out of the Japanese Language Classroom Erica Zimmerman,Abigail McMeekin,2019-05-10 This book addresses several pressing concerns of teachers and researchers who are looking for ways to integrate technology use in and out of their classrooms and assess its usefulness in the learning process. It provides an up-to-date examination of technology-supported pedagogy and language acquisition in a variety of Japanese as a foreign or second language contexts. It equips readers with practical pedagogical information, including methods of implementation and learning assessment, and ideas for how technology can be applied to achieve a wide range of learning objectives. The topics examined include cultural learning, identity construction, speaking, reading, writing, pronunciation, collaborative online learning, digital and 3D

virtual reality games, online text analysis, and participation in online communities. In addition, different e-learning configurations such as flipped, online, and distance learning classrooms are explored. Studies examine various current technologies (e.g. blogs, synchronous/asynchronous telecollaboration, corpus analysis software, modern pronunciation tools) and will have both direct and indirect consequences for teaching and learning a second/foreign language with technology across all languages.

RESTful Web API Patterns and Practices Cookbook Mike Amundsen,2022-10-17 Many organizations today orchestrate and maintain apps that rely on other people's services. Software designers, developers, and architects in those companies often work to coordinate and maintain apps based on existing microservices, including third-party services that run outside their ecosystem. This cookbook provides proven recipes to help you get those many disparate parts to work together in your network. Author Mike Amundsen provides step-by-step solutions for finding, connecting, and maintaining applications designed and built by people outside the organization. Whether you're working on human-centric mobile apps or creating high-powered machine-to-machine solutions, this guide shows you the rules, routines, commands, and protocols—the glue—that integrates individual microservices so they can function together in a safe, scalable, and reliable way. Design and build individual microservices that can successfully interact on the open web Increase interoperability by designing services that share a common understanding Build client applications that can adapt to evolving services without breaking Create resilient and reliable microservices that support peer-to-peer interactions on the web Use web-based service registries to support runtime find-and-bind operations that manage external dependencies in real time Implement stable workflows to accomplish complex, multiservice tasks consistently

Nalepa,2023-10-18 Artificial intelligence, or AI, now affects the day-to-day life of almost everyone on the planet, and continues to be a perennial hot topic in the news. This book presents the proceedings of ECAI 2023, the 26th European Conference on Artificial Intelligence, and of PAIS 2023, the 12th Conference on Prestigious Applications of Intelligent Systems, held from 30 September to 4 October 2023 and on 3 October 2023 respectively in Kraków, Poland. Since 1974, ECAI has been the premier venue for presenting AI research in Europe, and this annual conference has become the place for researchers and practitioners of AI to discuss the latest trends and challenges in all subfields of AI, and to demonstrate innovative applications and uses of advanced AI technology. ECAI 2023 received 1896 submissions – a record number – of which 1691 were retained for review, ultimately resulting in an acceptance rate of 23%. The 390 papers included here, cover topics including machine learning, natural language processing, multi agent systems, and vision and knowledge representation and reasoning. PAIS 2023 received 17 submissions, of which 10 were accepted after a rigorous review process. Those 10 papers cover topics ranging from fostering better working environments, behavior modeling and citizen science to large language models and neuro-symbolic applications, and are also included here. Presenting a comprehensive overview of current research and developments in AI, the book will be of interest to all those working in the field.

Multiple Perspectives on Learner Interaction William J. Crawford,2021-09-07 In the field of Second Language Studies, shared datasets provide a valuable contribution to second language research as many variables are held constant (e.g., participants, tasks, research context) thus allowing for an evaluation of theoretical and/or methodological perspectives that may not otherwise be comparable. This edited volume includes a wide range of studies using a common dataset (the Corpus of Collaborative Oral Tasks). The corpus includes 820 spoken tasks (268,927 words) carried out by dyads of L2 English speakers (primarily Chinese and Arabic learners). Studies included in the book are categorized into three main traditions: learner corpus research, Task-Based Language Teaching, and assessment. Because the corpus contains text and sound files, both lexico-grammatical and phonological analyses are included. Intended for researchers in the field of Second Language Studies with an interest in oral interaction research, this book provides a collection of methodological, pedagogical, and assessment studies using a common dataset.
