**The Tattoo** Chris McKinney, 2007-04-01 "A book about 'the sins of the fathers.' . . . A gritty, troubling book."—The Honolulu Advertiser "The other Hawai'i, the one tourists never get to see."—Ian MacMillan Ken Hideyoshi is the new guy in Halawa Correctional Institute. He's tough looking, a hard case, observes his cellmate Cal—the mute tattoo artist of the prison, a wife murderer. SYN, a gang symbol, is tattooed on his hand, and he has a Japanese emblem inscribed on his left shoulder. He asks Cal for a tattoo on his back, in kanji script, of Musashi's Book of the Void. While he is being worked on, he tells Cal his life story, a tale of hardship and abuse. Motherless, he was raised by a distant father, a Vietnam War veteran, in the impoverished hinterlands. In his teen years he hung out with the native Hawaiian gangs and

was drawn into the Hawaiian-Korean underworld of strip bars and massage parlors. His ambition and proud samurai spirit seem, inevitably, to lead to his downfall. Chris McKinney is of Korean, Japanese, and Scottish descent. He was born in Honolulu and grew up in Kahaluu. He portrays the native Hawaiian experience from the inside, where children of mixed ethnicity grow up far from the clear water and pristine beaches of the rich visitors' resorts.

### **Strengthening Forensic Science in the United States**

National Research Council, Division on Engineering and Physical Sciences, Committee on Applied and Theoretical Statistics, Policy and Global Affairs, Committee on Science, Technology, and Law, Committee on Identifying the Needs of the Forensic Sciences Community, 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application.

**Strengthening Forensic Science in the United States: A Path Forward** provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration.

**Strengthening Forensic Science in the United States** gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational

structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

**Smartups** Rob Ryan, 2012-06-15 Building successful start-ups was never quite as easy as it seemed, and the changing economic

climate has raised the stakes, reduced the margin of error. New entrepreneurs can't stumble into wealth on the power of half-formed ideas, or turn dreams into reality without doing a lot of homework. It's time to get smart. This book teaches would-be entrepreneurs the skills they need to get through the venture capital process with companies that will survive to grow and succeed. Rob Ryan, a pioneer in the high-tech industry, founded Ascend Communications in 1989, and throughout the nineties provided firms with the infrastructure they needed to keep up with the rapid growth of the Internet. At the beginning of 1999, Ascend was sold to Lucent for \$25 billion. Since retiring from Ascend and starting Entrepreneur America, Ryan has helped launch a string of successful companies, including Virtmed, RightNow, and Virtual Ink. All provide electronic solutions to real-world problems, meet existing—rather than manufactured—needs, and save their customers time and money. In *Smartups*, Ryan focuses on methods he's developed over the years for building a sustainable business that makes money. He emphasizes the importance of testing ideas on customers and making sure that a product offers something new and important. Recognizing a team's key competencies is crucial, Ryan says. He also finds it necessary to take certain steps at the correct stages of a company's inception. *Smartups* will show you how to turn your idea into a real product, take it to investors, and get your start-up started right.

There is humour and there is passion - of love and hate, pagan faiths and Christian beliefs, ancestors and dancers, customs and politics, migrants and immigrants, and Pacific flora and fauna - all have stimulated Ms Mason to put pen to paper. At times incisive and descriptive, and at others deeply musing, this book is a collection of poems which is both retrospective perceptive--Back cover

Decolonizing Methodologies Linda Tuhiwai Smith, 2016-03-15 'A landmark in the process of decolonizing imperial Western knowledge.' Walter D. Mignolo, Duke University To the colonized, the term 'research' is conflated with European colonialism; the ways in which academic research has been implicated in the throes of imperialism remains a painful memory. This essential volume explores intersections of imperialism and research - specifically, the ways in which imperialism is embedded in disciplines of knowledge and tradition as 'regimes of truth.' Concepts such as 'discovery' and 'claiming' are discussed and an argument presented that the decolonization of research methods will help to reclaim control over indigenous ways of knowing and being. Now in its eagerly awaited second edition, this bestselling book has been substantially revised, with new case-studies and examples and important additions on new indigenous literature, the role of research in indigenous struggles for social justice, which brings this essential volume urgently up-to-date.

Why Are All the Black Kids Sitting Together in the Cafeteria? Beverly Daniel Tatum, 2017-09-05 The classic, New York Times-bestselling book on the psychology of racism that shows us how

to talk about race in America. Walk into any racially mixed high school and you will see Black, White, and Latino youth clustered in their own groups. Is this self-segregation a problem to address or a coping strategy? How can we get past our reluctance to discuss racial issues? Beverly Daniel Tatum, a renowned authority on the psychology of racism, argues that straight talk about our racial identities is essential if we are serious about communicating across racial and ethnic divides and pursuing antiracism. These topics have only become more urgent as the national conversation about race is increasingly acrimonious. This fully revised edition is essential reading for anyone seeking to understand dynamics of race and racial inequality in America.
