Prehistoric Henges Aubrey Burl,1991 Stonehenge is only one of almost a hundred vast circular earthworks built in Britain and Ireland over five thousand years ago. Known as henges, they remain one of the mysteries of prehistoric Britain. With their overgrown banks and weathered ditches they attract few visitors. Yet discoveries have revealed fascinating glimpses of the beliefs of their builders. Excavations have unearthed grim evidence of forgotten rituals: a child's sacrifice at Woodhenge; a human burial at the centre of Arbor Low; winter moonlight at Stonehenge. Such things hint at the power and importance that these huge enclosures once had. The effort needed to raise these spacious rings of earth or chalk, the careful planning of their entrances, the settings of stone or timber inside them and the avenues leading uphill from nearby rivers all make henges among the most exciting and intriguing of the ancient monuments of the British Isles. --Back cover.

Medieval Roads and Tracks Brian Paul Hindle,1998 This book looks at an almost totally neglected aspect of medieval England and Wales. Starting from the basic concept of a 'road' in medieval times, it looks at how well the Roman roads had survived and then at the demand for roads. Who travelled? Why? What records of their travels did they leave? What archaeological evidence remains? Dr Hindle answers these questions and examines the unique cartographic evidence. About the author Dr Paul Hindle took early retirement in 2000; he was previously a Senior Lecturer in Geography. He is Honorary Secretary of Manchester Geographical Society. He has written widely on roads, maps and the Lake District.

Deserted Villages Trevor Rowley,John Wood,2008-11-18 Villages have been abandoned throughout history, and in every part of the British Isles. Some of them are former towns; others were only ever small hamlets. Many still await discovery. This book explains how villages have become deserted - often the result of disease and shrinking populations - and describes how the archaeologist recovers and interprets the evidence and shows how everyone can become involved in discovering and recording sites. Some good examples of sites worth visiting are included.

Prehistoric Astronomy and Ritual Aubrey Burl,2008-03-04 Stonehenge was not an observatory used by druidical astronomer-priests, but instead an almighty monument in which the moon, the sun, and the dead were joined together. In this compelling book, archaeological expert Aubrey Burl explains how, more than four thousand years ago, people in the British Isles identified life and death with the cycle of midwinter and midsummer, and with the rising and setting of the sun and moon. It is for this reason that so many megalithic monuments have astronomical sightlines built into them. This book explores the development of astronomical customs in the British Isles, and, unlike other works about 'megalithic astronomy', keeps the technical explanations of azimuths and declinations to their simplest, its emphasis being upon people rather than perturbations and eclipses.

Prehistoric Stone Circles Aubrey Burl,2008-03-04 For centuries, stone circles have excited the imagination of their visitors, while archaeologists, astronomers and anthropologists have argued about the purpose of these mysterious abandoned rings. In recent years, accurate surveys of many sites have revealed that these monuments were not simply roughly arranged stone circles, but instead elegantly designed ritual centers. Modern excavations have shown that the earliest circles were erected over five thousand years ago and that sightlines were often built into them towards the sun or moon. Whether in northern Scotland, western Ireland, Wales, or southern England, a picture appears of widely dispersed communities constructing great rings for their ceremonies, frequently burying burnt human bone inside them. In Prehistoric Stone Circles, Aubrey Burl studies these rings, explores their history and reveals how we are gradually coming to an understanding of the true significance of these incredible feats of construction.

Romano-British Coin Hoards Richard Abdy,2008-03-04 The best testament to Britain's participation in Graceo-Roman civilisation is its 'hidden' monuments- hoards of household valuables or decorations and also rich hoards of gold, silver and bronze coins. This book provides an introduction to Romano-British coin hoards and places major discoveries in the story of the Roman province's monetary system.
