Gordon A. Craig

Postwar Japan as History Andrew Gordon,1993-10-20 As they examine three related themes of postwar history, the authors describe an ongoing historical process marked by unexpected changes, such as Japan's extraordinary economic growth, and unanticipated continuities, such as the endurance of conservative rule. --From publisher's description.

Organizing the Unemployed James J. Lorence,1996-07-03 Focusing on Michigan during the Great Depression, this book highlights the efforts of community organizers and activists in the United Automobile Workers (UAW) to mobilize the jobless for mass action. In doing so, it demonstrates the relationship between unemployed activism and the rise of industrial unionism. Moreover, by discussing Communist and Socialist initiatives on behalf of displaced workers, the book illuminates the impact of radicalism on social change and shows how political claims influenced the cultural discourse of the 1930s. The book not only helps fill a void in our knowledge of community activism, worker culture, and labor history in the 1930s but also sheds light on the New Deal's domestication of American labor and the channeling of mass protest toward politically and socially acceptable goals. The UAW acceptance of responsibility for the underclass of the 1930s raises pertinent questions for labor in the 1990s.

Albertanus of Brescia James M. Powell,2016-11-11 Albertanus of Brescia is an important figure in the cultural history of late medieval and Renaissance Italy. He is best known among literary scholars for the influence of his writings on Brunetto Latini, John Gower, and Geoffrey Chaucer. In addition, his sermons have received attention as part of the history of lay confraternities and lay preaching in the twelfth and thirteenth centuries. James M. Powell shows that Albertanus's contributions considerably surpass even these notable attainments. Powell contends that Albertanus was an original social theorist who drew on his experience with religious confraternities and with the law to develop a theory of consent. Albertanus developed the idea that society rested on voluntary acceptance of a rule, much as did religious life. This acceptance laid the foundation for social cohesion and legal enforcement. Albertanus's ideas were to find great prominence in the later Middle Ages. Powell's purpose in writing *Albertanus of Brescia* goes beyond the study of his eponymous subject. Through Albertanus, Powell examines how major developments of the twelfth century began to find expression in the mind of an early thirteenth-century secular thinker. In *Albertanus*, Powell perceives an individual bringing received, bookish authority into confrontation with lived experience. To Powell, the example of Albertanus suggests a much more complex picture of medieval approaches to social theory than that previously evident in the literature. This is the first book-length study of Albertanus and his works. It will be of particular interest to students and scholars of medieval, Italian, intellectual, and literary history, and political theory.

Asian History Grant Kohn Goodman,1993

International History Akira Iriye,Petra Goedde,2022-01-13 *International History: A Cultural Approach* offers an innovative history of modern international relations that stresses cultural themes. In place of the usual focus on great-power rivalries, diplomatic negotiations, military conflict, and other phenomena in which sovereign nations

are the key players, this book focuses on intercultural relations as individuals, races, religions, and non-state actors interact across national boundaries, to provide a fresh perspective on modern international history. Among the themes covered are: - Nationalism and cosmopolitanism - Migration - Cross-cultural encounters - Consumerism and youth cultures - Environmental transformations - Economic and technological globalization Akira Iriye and Petra Goedde's approach offers a deeper understanding of international history, focusing on people and their cultures rather than just state level interactions.

Democracy and Control in the Workplace Ed Davis, Russell D. Lansbury, 1986

Earth Horizon Mary Austin, 2007 In her autobiography, published in 1932, Austin speaks frankly about her life while also commenting on the events and decisions that formed and influenced her life and writing. A prolific writer, she wrote novels, short stories, essays, plays, and poetry. She was an early advocate for environmental issues as well as the rights of women and minority groups.

An Instance of Treason Chalmers Johnson, 1990 This is the only complete, authoritative account of the most brilliantly successful espionage operation of the twentieth century: the notorious Communist spy ring headed by Dr. Richard Sorge, whose cover was that of senior German journalist in Tokyo during World War II. Ozaki Hotsumi, the second-ranking member of the ring, was also a prominent journalist, a leading authority on China, and a consultant to the Konoye cabinet.

The Politics of Excellence Robert Marc Friedman, 2001-01-01 Reveals all the politics & personal agendas that dictate who has been awarded the Prize, & just as importantly, who has not. Published in conjunction with the 100th anniversary of the Prizes.

The Germans Gordon A. Craig, 1991-09-01 They have given mankind unique triumphs in science, literature, philosophy, music, and art. They have also produced Hitler and the Holocaust. They are romantic and conservative, idealistic and practical, proud and insecure, ruthless and good-natured. They are, in short, the Germans. In this definitive history, Professor Gordon A. Craig, one of the world's premier authorities on Germany, comes to grips with the complex paradoxes at the heart of the German identity. His masterly study explores the roots of many contemporary institutions in German history and closely examines such topics as religion, money, Germans and Jews, women, professors and students, romantics, literature and society, soldiers, Berlin, and the German language. Craig also discusses the events surrounding the fall of the Berlin Wall and the German reunification, while offering invaluable insights into Germany's pivotal role in world affairs for over a century.

Born on the Fourth of July Ron Kovic, 1977 Optimize training, enhance recovery, and improve performance with Performance Nutrition: Applying the Science of Nutrient Timing. Based on the most current research in nutrient timing, Performance Nutrition blends theory with applied content and real-life examples to help nutritionists, athletes, and coaches design nutrition plans based on each athlete's individual needs and the specific demands of the sport. While other texts may provide a brief discussion of nutrient timing as a tool for improving sport

performance, *Performance Nutrition: Applying the Science of Nutrient Timing* focuses solely on this newly developing facet of sport nutrition. Distinguished authors Krista Austin (a physiologist and nutritionist) and Bob Seebohar (a sport dietitian and USA Triathlon elite coach) share their extensive practical experience with athletes at all levels from recreational through professional. They provide specific nutrient timing recommendations for a wide range of sport types, including endurance, strength and power, combative (weight classified), and team sports. In particular, you will learn information on using nutrient timing theory to counteract altitude, heat and humidity, cold exposure, and air pollution. A chapter devoted to competition-day guidelines will help you keep your athletes hydrated, energized, and ready to perform. Plus, nutritional timelines, highlighted in special callout boxes and placed at the edge of the page for quick reference, offer visual plans of what athletes should eat in the hours leading up to and during competition. Practical and user friendly, this text also includes In Practice application exercises, mini-case studies, and four extended case studies to assist in translating the information to your own practice. Incorporating nutrient ingestion timing into your athlete's training program can promote enhanced recovery, create positive training adaptations, improve body composition, support immunity, and ultimately enhance performance. With *Performance Nutrition: Applying the Science of Nutrient Timing*, you will gain the foundational knowledge and practical techniques to develop individualized nutrition programs to improve training, performance, and recovery.

Old Age in European Society Peter N. Stearns, 2024-05-10 Originally published in 1977, *Old Age in European Society* provides an historical perspective on aging, a process which had received little attention from any group in the social sciences and virtually none from historians at the time. Starting from the premise that 'the elderly can and should be active, participant members of their society' the book examines the ways in which old people were and are viewed by certain key groups. This is done in a series of thematic essays linked by the main theme of a dominant culture in which the elderly and the groups who deal with them were and still are ensnared. This dominant culture is one of denigration of the elderly: the traditional idea of veneration of the elderly is found to be largely mythical. Variations on this theme are dealt with in individual chapters concerned with the elderly in French working-class culture and geriatric medicine. Key groups are studied with an eye to distinct patterns of modernization, which involves particular attention to the working class and middle class as those exposed to the leading edge of change. Women are treated separately, as their aging process involves distinctive elements, which exacerbate the problems of old age. France, with its exceptional percentage of elderly and its low retirement ages, provides much of the material for these essays, the main purpose of which is to indicate those topics for which an historical treatment is vital to our understanding of the elderly and to the formulation of a more positive approach to old age.

Teaching Of History Herbert B [From Old Catalog] Adams, 2023-07-18 A guidebook for history teachers, exploring various methods and philosophies for educating students about the past. After Orientalism Inge E. Boer, 2003 How does Edward Said's Orientalism speak to us today? What relevance did and does it have politically and intellectually? How and in what modes does Orientalism engage with new, intersecting fields of inquiry? At the occasion of the twenty-fifth anniversary of Orientalism these questions shape the essays collected in the present volume. The after of the title does not only guide the contributions in a look on past discussions, but specifically points at future research as well. Orientalism's critical entanglements are thus connected to productive looks; these productive looks make us read differently, but only after we recognize our struggle with the dominant notions that we live by, that divide and unite us. More specifically, this volume addresses three fields of research enabling productive looks: visual culture; the body, sexuality and the performative; and national identities, modernity and gender. All articles, weaving delicate, new analytical and theoretical textures, maintain vital links with at least two of the fields mentioned. Orientalism's role as a cultural catalyst is gauged in the analysis of materials such as Iranian film, 16th and 17th century Venetian representations of the Turk, Barthes' take on Japanese culture, modern Arab travel narratives, Palestinian popular culture, photography on and of the Maghreb, Japanese queer and gay culture, the 19th century Illustrated London News, theories on migration and exile, postcolonial cinema, and Hanan al-Shaykh's and Mai Ghoussoub's writing on civil war in Lebanon. Authors include: Karina Eileraas, Belgin Turan Özkaya, Joshua Paul Dale, John Potvin, Mark McLelland, Tina Sherwell, Nasrin Rahimieh, Stephen Morton, Anastasia Vallasopoulos, Suha Kudsieh and Kate McInturff.

After Orientalism François Pouillion, Jean-Claude Vatin, 2014-11-27 This book offers an exciting new landscape in which to situate research on cultures and societies of the non-European world, with a road-map that leads us beyond the restrictive dichotomy of Occident/Orient.
