Strange Code Ronald T. Kneusel,2022-09-27 Strengthen your overall coding skills by exploring the wonderful, wild, and often weird world of esoteric languages (esolangs). Strange Code starts with a dive into the underlying history of programming, covering the early computer-science concepts, like Turing machines and Turing completeness, that led to the languages we use today. It then explores the realm of “atypical” programming languages, introducing you to the out-of-the-box thinking that comes from these unusual approaches to coding. Later chapters address the even more unusual esolangs, nearly all of which are like nothing you’ve ever seen. Finally, author Ron Kneusel helps you develop and use two entirely new programming languages. You may not apply these languages in your day job, but this one-of-a-kind book will motivate you to think differently about what it means to express thought through code, while discovering the far-flung boundaries of programming. You’ll learn: How to program with pictures using Piet How to write two-dimensional programs in Befunge How to implement machine-learning algorithms using the text pattern matching language SNOBOL How to decipher Brainfuck code like [->[>+”]>[[-+]+>+”]””]/liliHow to design and create two original programming languages Learning to think in these languages will make you a better, more confident programmer.

Freeman's: Animals John Freeman,2022-10-11 Featuring new work from Mieko Kawakami, Martín Espada, Kali Fajardo-Anstine, Arthur Sze, Camonghne Felix, and more, the latest installment of the acclaimed literary journal *Freeman's* explores the irrevocably intertwined lives of animals and the humans that exist alongside them Over a century ago, Rilke went to the Jardin des Plantes in Paris, where he watched a pair of flamingos. A flock of other birds screeched by, and, as he describes in a poem, the great red-pink birds sauntered on, unphased, then “stretched amazed and singly march into the imaginary.” This encounter—so strange, so typical of flamingos, with their fabulous posture—is also still typical of how we interact with animals. Even as our actions threaten their very

survival, they are still symbolic, captivating and captive, caught in a drama of our framing This issue of Freeman's tells the story of that interaction, its costs, its tendernesses, the mythological flex of it. From lovers in a Chiara Barzini story, falling apart as a group of wild boars roams in their Roman neighborhood, to the soppen emergency birth of a cow on a Wales farm, stunningly described by Cynan Jones, no one has the moral high ground here. Nor is this a piece of mourning. There's wonder, humor, rage, and relief, too. Featuring pigeons, calves, stray dogs, mascots, stolen cats, and bears, to the captive, tortured animals who make up our food supply, powerfully described in Nobel Prize winner Olga Tokarczuk's essay, this wide-ranging issue of Freeman's will stimulate discussion and dreams alike.

Weve been drinking tea for thousands of years, yet few of us realize that all teafrom elegant lapsang to pungent pu-erhcome from the same source. The taste is down to science: geography, chemistry, and physics, the application of heat and pressure, and the magic of time and enzymes. How to Make Tea lays out the principles for the tea-loving nonscientist; extract the best from every cup.
