Those who Can-- Teach! Lorraine Glennon,Mary Mohler,1999 Many successful people can point to a single teacher whose talent and dedication made a crucial difference in their lives. Sometimes former students clearly recall a teacher's casually brilliant remark that produced an instant aha! response; sometimes they are affected by a teacher's passionate devotion to professional duty. The methods of a great teacher are as varied and distinctive as teachers themselves, but the result - inspired teaching - is a gift enjoyed for a lifetime. Those Who Can . . . Teach brings together personal reminiscences about gifted educators from a wide array of contributors, including writers, entertainers, business leaders, religious figures, politicians - and of course teachers themselves. Some are humorous, others irreverent, others sweet, still others passionately polemical. Based on interviews conducted by the editors, the book includes many excerpts culled from literature, personal letters, and film.

To Teach, to Love Jesse Stuart,1970 In To Teach, To Love, the great Kentucky novelist, short-story writer, poet, and teacher writes about his boyhood, his elementary school and high-school experiences, his days at Lincoln Memorial College and Vanderbilt University. He describes the teachers who inspired him, and those who did not, and tells what made the difference. With great warmth and the wisdom that comes from nearly fifty years in the classroom, Jesse Stuart tells of teaching in one-room rural schoolhouses ... He recounts his experiences as a country school superintendent and as a high-school principal and describes his stay at the American University in Cairo, Egypt, where he taught creative writing. He explains what classroom methods worked best, and why, and speculates on what has gone wrong in American schools today--From jacket flap.

My Students Taught Me How To Teach Jim Seaman,2022-11-04 If you're reading this back cover, you obviously have read the title of my book. And if you read the title then you must be thinking to yourself: What is he talking about? How is it possible for students to teach the teacher how to teach? They spend 5 years in college securing their teaching certificate, then several months student teaching in a teacher's classroom. This is followed up with district training throughout each year and after-school weekly learning sessions. So let me explain how this title is both appropriate and accurate. My style and persona are one of having fun and bringing smiles and laughter into people's lives. I wanted this to include my students. But I wasn't sure if I could bring the real me into the classroom. I was concerned that if I acted silly or a little crazy or played a prank, the students would not be able to re-focus and immediately get back on track. I told my students on their first day, I could be strict or we could have fun. It's up to you. Every year my students chose laughter and fun and as a result, they tried harder and scored higher than most classes in the district. They surely did teach me that by utilizing unorthodox teaching methods, they would rise up and excel (as if I were teaching an honors class).

Teach Them Well George F. Madaus,Thomas Kellaghan,Richard Lewis Schwab,1989

To Teach William Ayers,1993 To Teach is the story of one teacher's odyssey into the ethical and intellectual heart of teaching, and at the same time an invitation to teachers to more thoughtfully and carefully map their own pathways. This second edition offers new resources and addresses the small schools movement, as well as new challenges facing teachers. In conceptual and practical ways, To Teach narrates an essential journey all teachers must take if, at the end of their own Yellow Brick Roads, they are to achieve the basics: a heart, a brain, the nerve, and a home.

Twenty Teachers Ken Macrorie,1984-10-18 The rare and exceptional teacher--one who could teach absolutely anything to anybody--is what Ken Macrorie set out to find among teachers of many different subjects at many different levels. The result of his search is 20 Teachers, a collection of revealing profiles in which outstanding educators explain what works for them in the classroom and why. Macrorie's interviews with these professionals show an astonishing similarity in their beliefs, methods, and attitudes and the keys to their success with students from first grade to the graduate level. Ranging from a woodworking instructor in a wealthy suburban school to an inner-city history teacher to a professor of space engineering, the teachers profiled here share a fundamental belief in putting choice and responsibility in the hands of their students, no matter what their age. Macrorie includes, in addition to the interviews, a summary chapter listing 43 items these teachers claim help learners to do good works. Finally, in an Open Letter About Schools, he explores the notion that schools have developed, often unwittingly, traditions that run counter to the way these educators work; he discusses the obstacles they face, from both within the system and without. Twenty Teachers offers insights that will enable others to inspire learning in their students and voices a new and challenging view of today's educational system.
