High-Performing Self-Managed Work Teams Dale E.

Yeatts, Cloyd Hyten, 1997-11-26 Since the mid-1970s, pressure from international competition has forced U.S. businesses to look for better ways to achieve and maintain a competitive position. At the same time, public organizations have been asked to produce their services with fewer dollars. The result of these trends has been a growing urgency among public and private organizations to find new ways of reducing their expenses while maintaining or increasing productivity and quality. One popular tool is the self-managed work team (SMWT). How is it different than a work group or short-term team? Which problems compel an organization to create an SMWT? What factors explain successful SMWTs? What must the organization do to develop high-performance, cost-effective teams? In *High-Performing Self-Managed Work Teams*, Dale E. Yeatts and Cloyd Hyten, Principle Investigators for the three-year National Science Foundation study of the performance of SMWTs, answer these questions and thoroughly examine the most widely accepted theories that attempt to explain SMWT performance. They introduce a synthesis of these theories based on 10 case studies from three different settings: manufacturing, public service, and health care. In an accessible style, the authors lead students and professionals to better understand the theory behind SMWTs as well as the practical aspects of when to use SMWTs to find solutions and how to develop achieving teams. This book appeals to practitioners and scholars in management, human resources, organization studies, industrial psychology, public administration, organizational communication, marketing, sociology, public health, and nursing.

A Review and Annotated Bibliography of the Literature Pertaining to Team and Small Group Performance (1989 to 1999) Andrew S. Lajoie,1999

The military, along with private industry, is relying more on small teams of specialized individuals who work together to achieve a common goal. Examples of these teams include emergency medical teams, aircrews, decision-making teams, industrial project teams, Special Forces teams, weapon system crews and everyday work teams. Training and military doctrine has been evolving to reflect this emphasis on teamwork. The purpose of this annotated bibliography is to review literature published over the last ten years concerning team and small group performance. Specifically, the articles reviewed in this report represent a sampling of the research published in the social sciences, including psychology, sociology, and business. The team and small group literature reviewed includes examples of the many types of teams mentioned earlier. A summary and integration of this work is provided. In general, the research suggests that there are several components which contribute to the successful performance of teams, and that some of these components can be explicitly trained. Several training models are discussed. -- Stinet.

Teamwork in Palliative Care Peter Speck,2006-09-14

Teamwork is a complex but essential component of palliative care. The needs of people diagnosed with life threatening disease will vary greatly over time, and it is rarely possible for just one professional to be able to provide adequate care. In order to ensure an holistic approach, the whole multi-disciplinary team must be involved. Inevitable questions arise from such an approach, and this book seeks to address these. How does a team come into being? What different formats are there? How might the patient contribute to the effectiveness of their care and the way in

which the team operates? What are the difficulties and frustrations encountered in developing and maintaining such teams? What models of working and styles of leadership have developed? How are power and authority handled within the team setting? The importance of team building, training, support, attention to group process, and stress management to protect the mental health of the team are explored. The ethical issues inherent in palliative care such as consent, autonomy, confidentiality, decision making within teams, and the legal implications of such are also discussed. The book concludes with one important question - do we know if teams are the most effective way of providing care? This book addresses key issues surrounding the role of the team in palliative care, and is an essential guide to reappraising the importance of collaborative teamwork, and enhancing understanding of existing team structures.

Do Big Things Craig Ross, Angela V. Paccione, Victoria L. Roberts, 2017-08-28 An inspiring, practical and progress-oriented blueprint for energetic achievement. Amid constant swirl, uncertainty, and complexity is your team capable of doing big things? Too often people are pulled together, labeled a "team," given a directive, and expected to deliver results quickly. Soon, however, due to lack of focus, increasing pressures and competing priorities the team suffers from DSD: distracted, hopelessly stressed and disconnected from one another. Predictably, the team flatlines and the energy needed to succeed is lost. Based upon research of what successful teams do to overcome severe odds, **Do Big Things** presents an intuitive, seven-step process that equips teams with how to quickly and consistently operate in a manner necessary for success. Team members develop the self-awareness and ability to: Bring their best to every situation Bring out the best in others in every interaction Partner across the business to deliver common objectives Filled with practical tools and engaging stories of teams today, **Do Big Things** equips leaders with "the how" to quickly identify and activate the behaviors

needed to achieve more than you or your team ever thought possible. Idea and information exchanges interlock the hand, head and heart of each team member to get everyone moving toward a common goal. Increasingly, individually and collectively, the team becomes emotionally stronger and more productive as they do their work. Do Big Things provides your team with the common language necessary to be authentic, empathetic and transparent, so that potential barriers to success come to light – faster. This empowers the team to be more accountable with an enterprise mindset, because they can have the profound discussions needed to adapt quicker to unforeseen challenges and demonstrate an innovative reflex. By applying the concepts in this book, the team's daily interactions are transformed, focus is sustained, and energetic progress toward your goals is triggered. Every member of your team wants to succeed. Do Big Things provides a straightforward method to bring greater meaning to the work everyone does so the team delivers extraordinary performance together. You know what your team can achieve—now use the proven method to enable them to do it.

a manager or a director or from top management or an entrepreneur or a leader working with any type or size of team. Trust in Military Teams Professor Neville A

Stanton, 2012-10-01 The objective of this book is to report on contemporary trends in the defence research community on trust in teams, including inter- and intra-team trust, multi-agency trust and coalition trust. The book also considers trust in information and automation, taking a systems view of humans as agents in a multi-agent, socio-technical, community. The different types of trust are usually found to share many of the same emotive,

behavioural, cognitive and social constructs, but differ in the degree of importance associated with each of them. Trust in Military Teams is written by defence scientists from the USA, Canada, Australia and the UK, under the auspices of The Transfer Cooperation Programme. It is representative of the latest thinking on trust in teams, and is written for defence researchers, postgraduate students, academics and practitioners in the human factors community.
