Ditch That Textbook Matt Miller, 2015-04-13 Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting by the textbook implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning. In *Ditch That Textbook*, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. *Ditch That Textbook* is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.

Building PowerPoint Templates Step by Step with the Experts
Echo Swinford, Julie Terberg, 2012-09-28 Building PowerPoint Templates Supercharge your PowerPoint® presentations with custom templates and themes! Want to create presentations that are more consistent and cost-effective? Presentations that fully reflect your branding? Then don't settle for Microsoft's "out-of-the-box" templates and themes: create your own! In this easy, hands-on guide, two PowerPoint MVPs teach you every skill and technique you'll need to build the perfect template—from planning and design, through theme building, custom layouts, colors, and deployment. Echo Swinford and Julie Terberg have distilled their immense PowerPoint knowledge into simple, step-by-step techniques you can use right now, whether you're using PowerPoint 2010 or 2007 for Windows, or PowerPoint 2011 for Mac. Well-built templates are the backbone of great presentations—whether building them for your own use or designing for thousands of users, this book will guide you through the process of creating the most effective templates. Important Note: Upgrading from older versions of PowerPoint, such as PowerPoint 2003? Your old templates may no longer work. This book will help you make the transition painlessly! • Plan new templates and themes to maximize their business value for years

to come • Understand the differences between templates and themes, and how they work together • Make better choices about color, fonts, and slide layouts • Create efficient templates for individual users, teams, and large organizations • Incorporate Notes and Handout Masters into your presentation templates • Provide example slides and default settings that lead to better presentations • Use Microsoft's little-known Theme Builder to create effects and background styles • Work around hidden quirks in PowerPoint's advanced template and theme features

Echo Swinford, a Microsoft PowerPoint MVP since 2000, has been a featured speaker at the Presentation Summit (formerly PowerPoint Live) since its inception. She is the expert voice and instructor behind PowerPoint 2010 LiveLessons (Video Training), the author of Fixing PowerPoint Annoyances and co-author of The PowerPoint 2007 Complete Makeover Kit. Julie Terberg is a Microsoft PowerPoint MVP and featured speaker at the Presentation Summit. She is the owner of Terberg Design and has been designing presentations since the mid-1980s. She is co-author of Perfect Medical Presentations. As contributing author for Presentations Magazine, she won awards for her Creative Techniques columns.

A Poetry Handbook Mary Oliver, 1994 With passion, wit, and good common sense, the celebrated poet Mary Oliver tells of the basic ways a poem is built—meter and rhyme, form and diction, sound and sense. Drawing on poems from Robert Frost, Elizabeth Bishop, and others, Oliver imparts an extraordinary amount of information in a remarkably short space. Stunning (Los Angeles Times). Index.

Conducting Polymers with Micro or Nanometer Structure Meixiang Wan, 2009-03-15 Conducting Polymers with Micro or Nanometer Structure describes a topic discovered by three winners of the Nobel Prize in Chemistry in 2000: Alan J. Heeger, University of California at Santa Barbara, Alan G. MacDiarmid at the University of Pennsylvania, and Hideki Shirakawa at the University of Tsukuba. Since then, the unique properties of conducting polymers have led to promising applications in functional materials and technologies. The book first briefly summarizes the main concepts of conducting polymers before introducing micro/nanostructured conducting polymers dealing with their synthesis, structural characterizations, formation mechanisms, physical and chemical properties, and potential applications in nanomaterials and nanotechnology. The book is intended for researchers in the related fields of chemistry, physics, materials, nanomaterials and nanodevices. Meixiang Wan is a

professor at the Institute of Chemistry, Chinese Academy of Sciences, Beijing.

Control Alt Achieve Eric Curts, 2020-05-10 Transform Your Classroom with Tech Tools You Already Know With *Control Alt Achieve*, educational-technology wizard Eric Curts offers you the keys to revolutionizing classroom learning with the Google tools you already use. Dazzle your students by transforming Google Docs into blackout poetry, fire up creative possibilities by using Google Slides for comic strips, and make math more accessible--and fun--by turning to Google Drawings as an unlikely ally. With Eric as your guide to the technological horizons of Google tools, the possibilities are endless. With the step-by-step and easy-to-follow directions in *Control Alt Achieve*, you'll learn how to use common digital tools in unexpected ways. D-Day Invasion iMinds, 2014-05-14 The story behind D-Day begins in 1939 when Nazi Germany, led by Adolf Hitler, attacked

Poland and ignited World War Two. The following year, the Germans occupied France and Western Europe and launched a vicious air war against Britain. In 1941, they invaded the Soviet Union. Seemingly unstoppable, the Nazis now held virtually all of Europe. They imposed a ruthless system of control and unleashed the horror of the Holocaust. However, by 1943, the tide had begun to turn in favor of the Allies, the forces opposed to Germany. In the east, despite huge losses, the Soviets began to force the Germans back.

Molecularly Imprinted Materials Mingdi Yan, 2004-11-30

Providing an up-to-date overview of the field, this reference presents extensive discussions on a wide range of approaches for molecular imprinting written by pioneering experts on the subject. *Molecularly Imprinted Materials: Science and Technology* offers experimental protocols that exemplify specific techniques, as well as detailed surveys on molecular imprinting research and applications. Provides a comprehensive tutorial for those who wish to learn basic techniques and make new contributions to the field, as well as in-depth discussions, guidelines, and experimental protocols to help beginners gain a jump-start in the field of molecular imprinting. The book examines the recent evolution of the technology, offering step-by-step instruction on methods to design and optimize molecularly imprinted polymers and suggestions, recommendations, and troubleshooting strategies for alternative approaches and improvements discussed in the text. about the editors... HOW TO WORK WITH COLORS ,

Code Generation with Templates Jeroen Arnoldus, Mark van den Brand, A. Serebrenik, J.J. Bruneekreef, 2012-05-22 Templates are used to generate all kinds of text, including computer code. The last decade, the use of templates gained a lot of popularity due to the increase of dynamic web applications. Templates are a tool for programmers, and implementations of template engines are most times based on practical experience rather than based on a theoretical background. This book reveals the mathematical background of templates and shows interesting findings for improving the practical use of templates. First, a framework to determine the necessary computational power for the template metalanguage is presented. The template metalanguage does not need to be Turing-complete to be useful. A non-Turing-complete metalanguage enforces separation of concerns between the view and model. Second, syntactical correctness of all languages of the templates and generated code is ensured. This includes the syntactical correctness of the template metalanguage and the output language. Third, case studies show that the achieved goals are applicable in practice. It is even shown that syntactical correctness helps to prevent cross-site scripting attacks in web applications. The target audience of this book is twofold. The first group exists of researcher interested in the mathematical background of templates. The second group exists of users of templates. This includes designers of template engines on one side and programmers and web designers using templates on the other side

Edupreneur: How To Monetise Your Expertise and Profitably Educate Your Market Sarah Cordiner, 2017-09 Education is the new currency. Regardless of what business or industry you are in; if you

wish to sell what you have to others, your commercial survival depends on you becoming the EDUPRENEUR. Consumers are tired of sales pitches and promises, and instead are seeking information and knowledge. By giving it to them you get to demonstrate your capability and expertise as much as they get to experience it - making you choice number 1 for their needs. Edupreneurs strategically share their expertise in a way that provides unprecedented global reach, immeasurable impact on the lives of others, and unlimited income potential. Every single person on Earth has an abundant and unique set of skills, experiences, and knowledge that could be turned into commercially profitable products and services. In this book, Sarah Cordiner will take you through the fundamentals of monetising your expertise and profitably sharing what you know with the world. Whether you are an absolute beginner in creating and selling information and education-based products and services, or are up-levelling to a serious education-based business operation; this book will help you get there. Inside this book: How to commercialise your skills, knowledge, and expertise and start profiting from what is already in your head. How to create your own unique 'funnel of service', so that you no longer need to 'sell', and instead have your customers coming eagerly to you for your advice and expertise. A deep dive into the 10 stages of designing and building a highly successful information or education-based business so that you maximise your impact and income. How to price your informational and educational products and services; including courses, consulting, workshops and more. Where and how to sell your educational products for maximum exposure and sales - particularly online courses. The critical elements of an online education based business. What online tools, apps and products you need and how they all fit together for maximum profitability, scalability, and automation. How to use your expertise to become a well-known leader in your industry.
