What If? Robert Balser,Cima Balser,2017-09-22 Bob, a professional animator from Hollywood, and his wife Cima, a would-be writer, decided to take a sabbatical to Europe in 1959. With limited funds and a copy of Arthur Frommers Europe on \$5 A Day, they hoped to stretch their adventure to six months. Forty years later, they were still on sabbatical. In this memoir, they draw upon postcards and diary entries to share how they lived out their lives as expatriates in Europe during the second half of the twentieth century, living the dream of a free-spirited life that so many can only long for. Numerous pictures help illustrate the story. They enjoy French onion soup at the Eiffel tower, experience the culture shock of using bidets in water closets, gorge on croissants, try getting used to two-hour lunches, and enjoy meeting fascinating and eccentric people along the way. Take a step back in time with Bob and Cima as they do the unexpected, and dare to ask, What If?

The Biggest Book of Games for One Ever! Robert Allen,2005 A pack of playing cards usually suggests friends gathered around a card table. But what can you do when you have a deck of cards, a wish to play, and nobody to play with? Author Robert Allen has the answer in this unusual book that presents rules and variations for 100 different fascinating and challenging solitaire card games--but there's still more! You'll also find approximately 400 coin games, matchstick puzzles, logic puzzles, crosswords, and memory games. The solitaire games include Roll-Call, Pyramid, Canfield, Grandfather Clock, and Flower Garden, to name just a few. Some games--both solitaire and non-card games--take only a few minutes to play, while others can go on for much longer. Each game is described with detailed diagrams, easy-to-follow rules, and the game's object clearly defined. Here's a book to help readers make an hour or two of solitude pass rapidly and entertainingly!

Birds of British Columbia, Volume 3 Wayne Campbell,Neil K. Dawe,Ian McTaggart-Cowan,John M. Cooper,Gary W. Kaiser,Michael C.E. McNall,G. E. John Smith,2007-10-01 British Columbia has one of the richest assemblages of bird species in the world. The four volumes of *The Birds of British Columbia* provide unprecedented coverage of this region's birds, presenting a wealth of information on the ornithological history, habitat, breeding habits, migratory movements, seasonality, and distribution patterns of each of the 472 species of birds. This third volume, covering the first half of the passerines, builds on the authoritative format of the previous bestselling volumes. It contains 89 species, including common ones such as swallows, jays, crows, wrens, thrushes, and starlings. The text is supported by hundreds of full-colour pictures, including unique habitat photographs, detailed distribution maps, and beautiful illustrations of the birds, their nests, eggs, and young. *The Birds of British Columbia* is a complete reference work for bird-watchers, ornithologists, and naturalists who want in-depth information on the province's regularly occurring and rare birds.

Floor Plan Manual Oliver Heckmann, Friederike Schneider, 2012-12-13 This housing construction design manual documents and analyzes some 130 international residential structures from the last fifty years. From the standardized floor plans of the 1960s to the more individual concepts of the 1980s and the changed requirements and housing types of recent years, example structures by famous and lesser known architects from throughout the world showcase the tremendous variety of possible designs. The categorization of projects from a town planning perspective is supplemented by the detailed typological description of the relevant housing types. Every project is presented with its typical floor plans to a scale of 1:200; sections, site plans, and photographs illuminate each building's structure and situation. In addition to incorporating some forty new projects, this new edition now contains figure-ground diagrams that highlight the most salient features of the floor plans, making them even easier to compare.

Multi-Unit Housing in Urban Cities Katy Chey, 2017-11-06 This book investigates the development of multi-unit housing typologies that were predominant in a particular city from the 1800s to present day. It emphasises the importance of understanding the direct connection between housing and dwelling in the context of a city, and the manner in which the city is an instructional indication of how a housing typology is embodied. The case studies presented offer an insight into why a certain housing type flourished in a specific city and the variety span across cities in the world where distinct housing types have prevailed. It also pursues how housing types developed, evolved, and helped define the city, looks into how dwellers inhabited their dwellings, and analyses how the housing typologies correlates in a contemporary context. The typologies studied are back-to-backs in Birmingham; tenements in London; Haussmann Apartment in Paris; tenements in New York; tong lau in Hong Kong; perimeter block, linear block, and block-edge in Berlin; perimeter block and solitaire in Amsterdam; space-enclosing structure in Beijing; micro house in Tokyo, and high-rise in Toronto.
