Building Intelligent Information Systems Software Thomas D. Feigenbaum,2015-12-07 Building Intelligent Information Systems Software shows scientists and engineers how to build applications that model complex information, data, and knowledge without the need for coding. Traditional

software development takes time and leads to inflexible, complicated applications that almost, but don't exactly, meet the intended needs. Requirements can change, sometimes mid-development, and adapting existing systems can be difficult. Individual solutions can be incompatible, leading to information silos and inefficiency throughout an organization. This book offers a solution – the Information Unit Model, an innovative architecture for translating domain knowledge into applications. By encapsulating the complexities of computing, the Unit Model allows engineers to focus on business or experimental needs. Author Tom Feigenbaum, inventor of the Unit Modeler, demonstrates this innovative software architecture for rapid application design and development. His approach promotes repurposing pre-existing tools and libraries, and collaborating across the cloud, to promote information sharing and efficient development practices. Each concept is illustrated with examples including file management, data management, and 3D visualization. Turn your domain knowledge into applications without heavy coding Design and develop information systems applications in a fraction of the time of traditional methods Leverage previously-built components to jump start new projects Includes access to a trial version of the Information Unit Modeler tool for rapid application development

Developing and Validating Test Items Thomas M. Haladyna, Michael C. Rodriguez, 2013-07-18
Since test items are the building blocks of any test, learning how to develop and validate test items has always been critical to the teaching-learning process. As they grow in importance and use, testing programs increasingly supplement the use of selected-response (multiple-choice) items with constructed-response formats. This trend is expected to continue. As a result, a new item writing book is needed, one that provides comprehensive coverage of both types of items and of the validity theory underlying them. This book is an outgrowth of the author's previous book, *Developing and*

Validating Multiple-Choice Test Items, 3e (Haladyna, 2004). That book achieved distinction as the leading source of guidance on creating and validating selected-response test items. Like its predecessor, the content of this new book is based on both an extensive review of the literature and on its author's long experience in the testing field. It is very timely in this era of burgeoning testing programs, especially when these items are delivered in a computer-based environment. Key features include ... Comprehensive and Flexible – No other book so thoroughly covers the field of test item development and its various applications. Focus on Validity – Validity, the most important consideration in testing, is stressed throughout and is based on the Standards for Educational and Psychological Testing, currently under revision by AERA, APA, and NCME Illustrative Examples – The book presents various selected and constructed response formats and uses many examples to illustrate correct and incorrect ways of writing items. Strategies for training item writers and developing large numbers of items using algorithms and other item-generating methods are also presented. Based on Theory and Research – A comprehensive review and synthesis of existing research runs throughout the book and complements the expertise of its authors.

The Creator's Three Dimensional Strategic Plan and Purpose for Humanity Winston Lucien Daniels, 2010-02 The Creator's Three Dimensional Strategic Plan And Purpose For Humanity. The author of this book is very excited to share his joy of a life-changing discovery he made with everyone who will pick up this book. He is glad to tell everyone that the seal has been broken off from what Jesus said in Luke 13: 32. And he said unto them, Go ye, and tell that fox, Behold, I cast out

devils, and I do cures to day and to morrow, and the third day I shall be perfected. This is the conclusion of the matter: There is a first day Church that enjoys the Lord's presence and a second day Church that knows His burden removing yoke destroying power that does great exploits in this world. However, there is a 3RD DAY CHURCH that walks in the weight of His glory and splendour that is well able to bring order and decency, peace and joy in the Holy Ghost in a crazy world. This is the Church that walks in His perfect will, whose desire has become His desire; therefore, the whole universe is cooperating with this dynamic church. This is the Church that will bring about a sudden shift in the affairs of humanity. This is that GIANT that everyone was talking about She is the glorious Church that has been made ready to do kingdom business and to occupy all influential places in this world until He comes back again. It is not a Church that is passively waiting for His coming! And He (Jesus) called His ten servants (3rd Day Church well equipped Servants), and delivered them ten pounds, and said unto them, Occupy (make business) until I come (Luke 19:13). We have received a Kingdom that cannot be shaken by anything bad that is happening in this world. This Kingdom is eagerly waiting for the saints to possess it. It is an unseen reality, just like Goshen has been to Israelites, which was and is a place where there is nothing missing and nothing broken. High-Stakes Testing R. Murray Thomas, 2005-03-23 The federal government's No Child Left Behind Act has thrust high-stakes testing - its goals, methods, and consequences - into the educational limelight. The four-fold purpose of this book is to: describe the nature of high-stakes testing; identify types of collateral damage that have attended the testing programs; analyze methods different groups of people have chosen for coping with the damage and suggest lessons to be learned from the high-stakes-testing experience. The six groups of people whose coping strategies are inspected include: politicians and their staffs; educational administrators and their staffs; parents and the public; test makers and test administrators; teachers and students. Importantly, the author avoids aligning himself with the test-bashing rhetoric of those who oppose high-stakes testing, especially the No Child Left Behind Act. Key features of this outstanding new book include: illustrative cases. The book offers more than 350 cases of collateral damage from high-stakes testing--and people's coping strategies--as reported in newspapers over the 2002-2004 period. background

perspectives. Part I examines the influence of high-stakes testing on: 1) what schools teach; 2) how student progress is evaluated; 3) how achievement standards are set; and 4) how test results are used. participant responses. Part II, which is the heart of the book, devotes a separate chapter to the coping strategies of each of the major participants in the high-stakes testing movement: politicians and their staffs, educational administrators and their staffs, parents and the public, test-makers and test-givers, teachers, and students. summary chapter. The last chapter (Lessons to Learn) offers suggestions for minimizing collateral damage by adopting alternative approaches not used in the creation of our current high-stakes testing programs, particularly the federal government's No Child Left Behind Act. This book is appropriate for any of the following audiences: students taking evaluation or administration courses in schools of education, inservice administrators and teachers, policy makers, and those members of the general public who are concerned about the fate of schooling in America.
