Rotordynamics of Turbomachinery John M. Vance,1991-01-16 Describes the rotordynamic considerations that are important to the successful design or troubleshooting of a turbomachine. Shows how bearing design, fluid seals, and rotor geometry affect rotordynamic behavior (vibration, shaft whirling, bearing loads, and critical speeds), and describes two successful computational methods for rotordynamic analysis in terms that can be understood by practicing engineers. Gives descriptive accounts of the state of the art in several areas of the field and presents important mathematical or computational concepts, describing equations and formulas in physical terms for better understanding. Also offers tips for troubleshooting unstable machines and provides practical interpretations of vibration measurements.

The Sustainability of Agro-Food and Natural Resource Systems in the Mediterranean Basin Antonella Vastola,2015-04-24 This book is focused on the challenges to implement sustainability in diverse contexts such as agribusiness, natural resource systems and new technologies. The experiences made by the researchers of the School of Agricultural, Forestry, Food and Environmental Science (SAFE) of the University of Basilicata offer a wide and multidisciplinary approach to the identification and testing of different solutions tailored to the economic, social and environmental characteristics of the region and the surrounding areas. Basilicata's productive system is mainly based on activities related to the agricultural sector and exploitation of natural resources but it has seen, in recent years, an industrial development driven by the discovery of oil fields. SAFE research took up the challenge posed by market competition to create value through the sustainable use of renewable and non-renewable resources of the territory. Moreover, due to its unique geographical

position in the middle of the Mediterranean basin, Basilicata is an excellent “open sky” laboratory for testing sustainable solutions adaptable to other Mediterranean areas. This collection of multidisciplinary case studies and research experiences from SAFE researchers and their scientific partners is a stimulating contribution to the debate on the development of sustainable techniques, methods and applications for the Mediterranean regions.

Guidelines for Risk Based Process Safety CCPS (Center for Chemical Process Safety),2011-11-30
Guidelines for Risk Based Process Safety provides guidelines for industries that manufacture, consume, or handle chemicals, by focusing on new ways to design, correct, or improve process safety management practices. This new framework for thinking about process safety builds upon the original process safety management ideas published in the early 1990s, integrates industry lessons learned over the intervening years, utilizes applicable total quality principles (i.e., plan, do, check, act), and organizes it in a way that will be useful to all organizations - even those with relatively lower hazard activities - throughout the life-cycle of a company.

Buyology Martin Lindstrom,2010-02-02 NEW YORK TIMES BESTSELLER • “A fascinating look at how consumers perceive logos, ads, commercials, brands, and products.”—Time How much do we know about why we buy? What truly influences our decisions in today’s message-cluttered world? In

Buyology, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can “cool” brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? Buyology is a fascinating and shocking journey into the mind of today's consumer that will captivate anyone who's been seduced—or turned off—by marketers' relentless attempts to win our loyalty, our money, and our minds.

International Business in the Information and Digital Age Rob van Tulder, Alain Verbeke, Lucia Piscitello, 2018-11-16 The information and digital age is shaped by a small number of multinational enterprises from a limited number of countries. This volume covers the latest insight from the International Business discipline on prevailing trends in business model evolution. It also discusses critical issues of regulation in the new information and digital space.

The Book of Wonder Lord Dunsany, 2022-01-11 The Book of Wonder (1912) is a short story collection by Lord Dunsany. Published at the height of his career, The Book of Wonder would influence such writers as J. R. R. Tolkien, Ursula K. Le Guin, and H. P. Lovecraft. Recognized as a pioneering

author of fantasy and science fiction, Dunsany is a man whose work, in the words of Lovecraft, remains “unexcelled in the sorcery of crystalline singing prose, and supreme in the creation of a gorgeous and languorous world of incandescently exotic vision.” The Book of Wonder, Dunsany’s fifth collection of stories, contains fourteen of his finest tales of fantasy and adventure. In “The Hoard of the Gibbelins,” originally published in London weekly The Sketch, is the story of Alderic, a Knight of the Order of the City. Courageous and strong, he ventures to the island realm of the Gibbelins, where a horde of treasure is rumored to be held at the base of a treacherous castle. In “Chu-Bu and Sheemish,” two idols held in the same ancient temple compete for the adoration of their worshippers. As Chu-Bu and Sheemish attempt more and more astounding miracles, they risk striking fear in the hearts of their superstitious people. Humorous and inventive, Dunsany’s tales of high fantasy continue to delight over a century after they first appeared in print. With a beautifully designed cover and professionally typeset manuscript, this edition of Lord Dunsany’s The Book of Wonder is a classic of Irish fantasy fiction reimagined for modern readers.

Pirates of Pensacola Keith Thomson, 2005-04 The Cooke and Hood families have been at each other's throats since the Spanish Main days. The latest chapter in their piratic rivalry takes place in 2004, when an old treasure map turns up. None of this seems to matter to Morgan Cooke, a cowardly, landlubbing accountant entirely ignorant of his heritage until his estranged father, Isaac, in need of crewmen, kidnaps him and thrusts him into the fray. When Morgan wakes up on a boat in the middle of the Caribbean, he learns that piracy still flourishes, albeit with far more discretion than in the old days--pirates disguise their fast boats as shrimpers or tugs--but with no less bloodshed. Judging even a shot at riches vastly preferable to a return to his lonely, fluorescent-lit work station existence, Morgan pierces his ear, dons the eye patch and peg leg, and set sail for glorious adventure.

Encyclopedia of Geoarchaeology Allan S. Gilbert, 2016-08-15 Geoarchaeology is the archaeological subfield that focuses on archaeological information retrieval and problem solving utilizing the methods of geological investigation. Archaeological recovery and analysis are already geoarchaeological in the most fundamental sense because buried remains are contained within and removed from an essentially geological context. Yet geoarchaeological research goes beyond this simple relationship and attempts to build collaborative links between specialists in archaeology and the earth sciences to produce new knowledge about past human behavior using the technical information and methods of the geosciences. The principal goals of geoarchaeology lie in understanding the relationships between humans and their environment. These goals include (1) how cultures adjust to their ecosystem through time, (2) what earth science factors were related to the evolutionary emergence of humankind, and (3) which methodological tools involving analysis of sediments and landforms, documentation and explanation of change in buried materials, and measurement of time will allow access to new aspects of the past. This encyclopedia defines terms, introduces problems, describes techniques, and discusses theory and strategy, all in a format designed to make specialized details accessible to the public as well as practitioners. It covers subjects in environmental archaeology, dating, materials analysis, and paleoecology, all of which represent different sources of specialist knowledge that must be shared in order to reconstruct, analyze, and explain the record of the human past. It will not specifically cover sites, civilizations, and ancient cultures, etc., that are better described in other encyclopedias of world archaeology. The Editor Allan S. Gilbert is Professor of Anthropology at Fordham University in the Bronx, New York. He holds a B.A. from Rutgers University, and his M.A., M.Phil., and Ph.D. were earned at Columbia University. His areas of research interest include the Near East (late prehistory and early historic

periods) as well as the Middle Atlantic region of the U.S. (historical archaeology). His specializations are in archaeozoology of the Near East and geoarchaeology, especially mineralogy and compositional analysis of pottery and building materials. Publications have covered a range of subjects, including ancient pastoralism, faunal quantification, skeletal microanatomy, brick geochemistry, and two co-edited volumes on the marine geology and geoarchaeology of the Black Sea basin.

Integrity.... When No One's Looking Marvin Soskil, 2022-05-04 We all have freedom of choice. Nobody is telling you what you must do. It is your conscience that you have to live with! As we look around us these days, do you notice how the world has changed? We went from better to worse, worse to horrific and we're heading from horrific to dread? We can have the power to control situations, only if we raise the levels of our own consciousness and get back to basics. Remember when we wore white shirts and black ties for assembly? When your parents told you to do something you didn't ask why, you just did it? When No One is Looking is about bringing Integrity back into our lives and being more conscious of decisions we make and actions we take which can make this a better world. The most influential tool we have in your entire arsenal is your integrity. - Zig Zigler Only a person with integrity has the ability to command a long time respect and admiration, young or old, rich or poor. It doesn't matter what you have now, you can live with integrity and elegance and you can take utmost pride in that. That is because integrity is something you decide to have. It is a principle you chose to live by. Each of us will someday, be judged by our standard of life, not by the standard of living; by our measure of giving, not by our measure of wealth; by our simple goodness, not by seeming greatness - William Arthur Ward
