The Text in the Machine Toby Burrows, 1999-04-09 The first comprehensive guide to explore the growing field of electronic information, *The Text in the Machine: Electronic Texts in the Humanities* will help you create and use electronic texts. This book explains the processes involved in developing computerized books on library Web sites, CD-ROMs, or your own Web site. With the information provided by *The Text in the Machine*, you'll be able to successfully transfer written words to a digitized form and increase access to any kind of information. Keeping the perspectives of scholars, students, librarians, users, and publishers in mind, this book outlines the necessary steps for electronic conversion in a comprehensive manner. *The Text in the Machine* addresses many variables that need to be taken into consideration to help you digitize texts, such as: defining types of markup, markup systems, and their uses identifying characteristics of the written text, such as its linguistic and physical nature, before choosing a markup scheme ensuring accuracy in electronic texts by keying in information up to three times and choosing software that is compatible with the markup systems you are using examining the best file formats for scanning written texts and converting them to digital form explaining the delivery systems available for electronic texts, such as CD-ROMs, the Internet, magnetic tape, and the variety of software that will interpret these interfaces designing the structure of electronic texts with linear presentation, segmented text, or image files to increase readability and accessibility Containing lists of suggested readings and examples of electronic text Web sites, this book provides you with the opportunity to see how other libraries and scholars are creating and publishing digital texts. From *The Text in the Machine*, you'll receive the

knowledge to make this medium of information accessible and beneficial to patrons and scholars around the world.

The Digital Humanities Eileen Gardiner, Ronald G. Musto, 2015-06-25 The Digital Humanities is a comprehensive introduction and practical guide to how humanists use the digital to conduct research, organize materials, analyze, and publish findings. It summarizes the turn toward the digital that is reinventing every aspect of the humanities among scholars, libraries, publishers, administrators, and the public. Beginning with some definitions and a brief historical survey of the humanities, the book examines how humanists work, what they study, and how humanists and their research have been impacted by the digital and how, in turn, they shape it. It surveys digital humanities tools and their functions, the digital humanists' environments, and the outcomes and reception of their work. The book pays particular attention to both theoretical underpinnings and practical considerations for embarking on digital humanities projects. It places the digital humanities firmly within the historical traditions of the humanities and in the contexts of current academic and scholarly life.

Software Architectures for Product Families Frank van der Linden, 2003-06-29 This book contains the proceedings of a third workshop on the theme of Software Architecture for Product Families. The first two workshops were organised by the ESPRIT project ARES, and were called "Development and Evolution of Software Architectures for Product Families". Proceedings of the first workshop, held in November 1996, were only published electronically at: "<http://www.dit.upm.es/~ares/>". Proceedings of the second workshop, held in February 1998, were published as Springer LNCS 1429. The ARES project was finished in

February 1999. Several partners continued - operation in a larger consortium, ITEA project 99005, ESAPS. As such it is part of the European Eureka ! 2023 programme. The third workshop was organised as part of the ESAPS project. In order to make the theme of the workshop more generic we decided to rename it "International Workshop on Software Architectures for Product Families". As with the earlier two workshops we managed to bring together people working in the so- ware architecture of product families and in software product-line engineering. Submitted papers were grouped in five sessions. Moreover, we introduced two s- sions, one on configuration management and one on evolution, because we felt that d- cussion was needed on these topics, but there were no submitted papers for these subjects. Finally, we introduced a surveys session, giving an overview of the present situation in Europe, focussed on ESAPS, and in the USA, focussed on the SEI Product Line Systems Program.

Handbook of Research on Advances in Digital Technologies to Promote Rehabilitation and Community Participation Simões de Almeida, Raquel, Simões-Silva, Vítor, Trigueiro, Maria João, 2023-12-07 Digital technologies hold immense potential to transform the field of rehabilitation and enable greater community participation for individuals with disabilities. In the Handbook of Research on Advances in Digital Technologies to Promote Rehabilitation and Community Participation, a comprehensive exploration of these cutting-edge

technologies and their impact is presented, and it delves into various digital solutions, such as virtual reality, tele-rehabilitation, mobile apps, rehabilitation platforms, and more. The book sheds light on the applications to promote rehabilitation and enhance community involvement. It provides a profound understanding of how these technologies can facilitate remote rehabilitation, foster self-management of illnesses, support independent living, and enhance communication and social participation. Furthermore, it emphasizes the accessibility of information and resources that digital technologies provide, unlocking new possibilities for individuals with disabilities. However, this research goes beyond mere exploration and also examines the challenges and opportunities associated with these digital advancements. The ethical considerations that arise in the utilization of these technologies are addressed, emphasizing the need for responsible and considerate implementation.

Using CAT Tools in Freelance Translation Paulina Pietrzak, Michal Kornacki, 2020-11-30
This book explores the impact of applying computer-assisted (CAT) tools in freelance translation toward better understanding translators' strategies, preferences, and challenges in using new technologies and identifying areas of enhancement in translator training. The volume offers a brief overview of the latest developments in technology in translation, examining such issues as the effect on the translation process and the dynamics of the translator-technology interaction. Drawing on data from a study with active translators in Poland, Pietrzak and Kornacki examine the underlying factors underpinning translators' lack of engagement with these tools, including such issues as prevailing pre-conceptions around technology and limited knowledge hindering the most efficacious use of these resources and the subsequent impact on translator identity. Taken together, the book brings together these insights to help pinpoint freelance translators' needs more effectively and adapt training programmes accordingly. The volume will be of interest to scholars in translation studies with an interest in process and technology as well as active translators.
