Speech Prosody in Speech Synthesis: Modeling and generation of prosody for high quality and flexible speech synthesis Keikichi Hirose,Jianhua Tao,2015-02-25 The volume addresses issues concerning prosody generation in speech synthesis, including prosody modeling, how we can convey para- and non-linguistic information in speech synthesis, and prosody control in speech synthesis (including prosody conversions). A high level of quality has already been achieved in speech synthesis by using selection-based methods with segments of human speech. Although the method enables synthetic speech with various voice qualities and speaking styles, it requires large speech corpora with targeted quality and style. Accordingly, speech conversion techniques are now of growing interest among researchers. HMM/GMM-based methods are widely used, but entail several major problems when viewed from the prosody perspective; prosodic features cover a wider time span than segmental features and their frame-by-frame processing is not always appropriate. The book offers a good overview of state-of-the-art studies on prosody in speech synthesis.

Marian maternity in late-medieval England Mary Beth Long,2023-10-03 Marian maternity in late-medieval England takes advantage of the fifteenth century's intense interest in the Virgin Mary, the best-documented mother of the medieval period, to examine the constructions and performances of maternity in vernacular religious texts. By bringing together texts and authors that are not often discussed in tandem, this study offers a rich examination of the multiple factors at play as Marian material circulated among experienced devotional readers. Taking a close look at the private devotional reading of late-medieval patrons, the book shows how texts including Chaucer's poetry, Margery Kempe's Boke, and legends of female saints are saturated with indirect references to and imitations of the Virgin. Marian maternity in late-medieval England employs a matricentric feminist approach to discern how readers' devotional literacies inform their understanding and imitation of the Virgin's maternal practice. Attending to internal cues in the texts, to manuscript contexts, and to the evidence and content of readers' multiple literacies, the author examines Marian maternity as both theological concept and imitable practice. The result is a book that explains late-medieval perceptions of Mary's maternity and sets them against readers' devotional, emotional and relational circumstances.

Tell This Silence Patti Duncan,2009-05 Tell This Silence by Patti Duncan explores multiple meanings of speech and silence in Asian American women's writings in order to explore relationships among race, gender, sexuality, and national identity. Duncan argues that contemporary definitions of U.S. feminism must be expanded to recognize the ways in which Asian American women have resisted and continue to challenge the various forms of oppression in their lives. There has not yet been adequate discussion of the multiple meanings of silence and speech, especially in relation to activism and social-justice movements in the U.S. In particular, the very notion of silence continues to invoke assumptions of passivity, submissiveness, and avoidance, while speech is equated with action and empowerment. However, as the writers discussed in Tell This Silence suggest, silence too has multiple meanings especially in contexts like the U.S., where speech has never been a guaranteed right for all citizens. Duncan argues that writers such as Maxine Hong Kingston, Mitsuye Yamada, Joy Kogawa, Theresa Hak Kyung Cha, Nora Okja Keller, and Anchee Min deploy silence as a means of resistance. Juxtaposing their "unofficial narratives" against other histories—official U.S. histories that have excluded them and American feminist narratives that have stereotyped them or distorted their participation—they argue for recognition of their cultural participation and offer analyses of the intersections among gender, race, nation, and sexuality. Tell This Silence offers innovative ways to consider Asian American gender politics, feminism, and issues of immigration and language. This exciting new study will be of interest to literary theorists and scholars in women's, American, and Asian American studies.
