Blood from a Stone Richard Hammer,Yaron Svoray,2015-06-23 The search for the Life Diamonds--the subject of the compelling documentary produced by the History Channel. They were known as Life Diamonds--rough uncut diamonds of high quality bought by Jews in Eastern Europe to use as passports to safety. After 1939 and the Nazi blitzkrieg, after the extermination camps began belching black smoke into the skies and the railroad station at Auschwitz II-Birkenau became the busiest train station in the world, they became Death Diamonds. Blood from a Stone is the amazing story of forty of those diamonds, of their journey across continents and oceans, from the mines of South Africa to the diamond centers in Antwerp and Amsterdam, to the Jews of Eastern Europe, to the Death Camps. . . and to the two American soldiers who liberated them from the SS, finally, and buried them in a forest in Alsace on the border between France and Germany. It is the story of the curse believed to lie over the fabulous wealth of these stones, bringing death and disaster to all who touched them. It is the story of Yaron Svoray, who spent more than a decade in search of one small foxhole somewhere in a thousand square miles of forest...and of his unbelievable success. Blood from a Stone is a unique story, a story unlike any to come out of World War II. Blood from a Stone will more than over a dozen exclusive photos from the two-hour History Channel documentary.

The Heartless Stone Tom Zoellner,2007-06-12 An American Library Association Notable Book When he proposed to his girlfriend, Tom Zoellner gave what is expected of every American man--a diamond engagement ring. But when the relationship broke apart, he was left with a used diamond that began to haunt him. His obsession carried him around the globe; from the blood diamond rings of Africa; to the sweltering polishing factories of India; to mines above the Arctic Circle; to illegal diggings in Brazil; to the London headquarters of De Beers, the secretive global colossus that has dominated the industry for more than a century and permanently carved the phrase A diamond is forever on the psyche. An adventure story in the tradition of Susan Orlean's The Orchid Thief, The Heartless Stone is a voyage into the cold heart of the world's most unyielding gem.

Albion's Seed David Hackett Fischer,1991-03-14 This fascinating book is the first volume in a projected cultural history of the United States, from the earliest English settlements to our own time. It is a history of American folkways as they have changed through time, and it argues a thesis about the importance for the United States of having been British in its cultural origins. While most people in the United States today have no British ancestors, they have assimilated regional cultures which were created by British colonists, even while preserving ethnic identities at the same time. In this sense, nearly all Americans are Albion's Seed, no matter what their ethnicity may be. The concluding section of this remarkable book explores the ways that regional cultures have continued to dominate national politics from 1789 to 1988, and still help to shape attitudes toward education, government, gender, and violence, on which differences between American regions are greater than between European nations.

Natural Resources, Neither Curse nor Destiny Daniel Lederman,William F Maloney,2006-10-23 'Natural Resources: Neither Course nor Destiny' brings together a variety of analytical perspectives, ranging from econometric analyses of economic growth to historical studies of successful development experiences in countries with abundant natural resources. The evidence suggests that natural resources are neither a curse nor destiny. Natural resources can actually spur economic development when combined with the accumulation of knowledge for economic innovation. Furthermore, natural resource abundance need not be the only determinant of the structure of trade in developing countries. In fact, the accumulation of knowledge, infrastructure, and the quality of governance all seem to determine not only what countries produce and export, but also how firms and workers produce any good.
