

The Dead Marshes 1

Colin Duriez

Environmental Humanities and Theologies Rod Giblett, 2018-06-13 Many ways of thinking about and living with 'the environment' have their roots in the Bible and the Christian cultural tradition. Environmental Humanities and Theologies shows that some of these ways are problematic. It also provides alternative ways that value both materiality and spirituality. Beginning with an environmentally friendly reading of the biblical story of creation, Environmental Humanities and Theologies goes on to discuss in succeeding chapters the environmental theology of wetlands, dragons and watery monsters (including crocodiles and alligators) in the Bible and literature. It then gives a critical reading of the environmental theology of the biblical book of Psalms. Theological concepts are found in the works of English writers of detective and devotional stories and novels, American nature writers and European Jewish writers (as succeeding chapters show). Environmental Humanities and Theologies concludes with an appreciation for Australian Aboriginal spirituality in the swamp serpent. It argues for the sacrality of marsh monsters and swamp serpents as figures of reverence and respect for living bio- and psycho-symbiotic livelihoods in bioregions of the living earth in the Symbiocene. This is the hoped-for age superseding the Anthropocene. Environmental Humanities and Theologies is aimed at those who have little or no knowledge of how theology underlies much thinking and writing about 'the environment' and who are looking for ways of thinking about, being and living with the earth that respect and value both spirituality and materiality. It is a new text nurturing sacrality for the Symbiocene.

Of Men and Marshes Paul Errington, 2012-10-15 Standing with such environmental classics as Loren Eiseley's *The Immense Journey*, his friend and mentor Aldo Leopold's *A Sand County Almanac*, and Joseph Wood Krutch's *The Voice of the Desert*, Paul Errington's *Of Men and Marshes* remains an evocative reminder of the great beauty and intrinsic value of the glacial marshland. Prescient and stirring, steeped in insights from Errington's biological fieldwork, his experiences as a hunter and trapper, and his days exploring the marshes of his rural South Dakota childhood, this vibrant work of nature writing reveals his deep knowledge of the marshland environments he championed. Examining the marsh from a dynamic range of perspectives, Errington begins by inviting us to consider how immense spans of time, coupled with profound geological events, shaped the unique marshland ecosystems of the Midwest. He then follows this wetland environment across seasons and over the years, creating a compelling portrait of a natural place too little appreciated and too often destroyed. Reminding us of the intricate relationships between the marsh and the animals who call it home, Errington records his experiences with hundreds of wetland creatures. He follows minks and muskrats, snapping turtles and white pelicans, red foxes and blue-winged teals—all the while underscoring our responsibility to preserve this remarkable and fragile environment and challenging us to change the way we think about and value marshlands. This classic of twentieth-century nature writing, a landmark work that is still a joy to read, offers a stirring portrait of the Midwest's endangered glacial marshland ecosystems by one of the most influential biologists of his day. A cautionary book whose advice has not been heeded, a must-read of American environmental literature, *Of Men*

and Marshes should inspire a new generation of conservationists.

Human Impacts on Salt Marshes Brian R. Silliman, Edwin D. Grosholz, Mark D. Biosystematics and Ecology of Canadian Staphylinidae (Coleoptera) II Jan Klimaszewski, Robert Anderson, 2012-04-26 New taxonomic, distribution and habitat data are presented for Canadian species of the family Staphylinidae (Coleoptera). Distributional records are presented mostly from New Brunswick, Ontario and Yukon Territory. For New Brunswick, 186 new provincial records, 11 new records for Canada, and 10 new records of adventive species are provided. For Ontario, 47 new provincial records and 25 new Canadian records are provided, and 5 species are described as new to science. For Yukon Territory, 20 new territorial records and 1 new Canadian record are provided and 9 species are described as new to science. A total of 253 new provincial/territorial records, 37 new Canadian records, and 14 species new to science are treated in this volume. Lectotypes are designated for several species and seven synonyms are proposed. All new species and many species representing new distributional records are illustrated by color habitus images and black and white images of the genital structures. This volume on Canadian rove beetle biodiversity contributes new taxonomic research and important baseline data, and significantly updates the known staphylinid

faunas of New Brunswick, Ontario, Yukon Territory, and Canada.

A Guide to Middle Earth Colin Duriez, 2004-12-09 This absorbing insight into the mind behind Middle-earth will introduce or remind readers of the abundance that exists in Tolkien's thought and imagination. Interweaving sections explore The Lord of the Rings and its history; the key themes, concepts and images in Tolkien's work; the people and places in his life, and his other writings. At the heart of the book is an indispensable A-Z of middle-earth, with detailed entries on Beings, Places, Things and Events.

Marsh Dwellers of the Euphrates Delta S. M. Salim, 2021-01-07 Dr Salim, of Bagdad University, spent two years amongst the remarkable tribal peoples who inhabit the great marshes of the lower Euphrates. He describes their social and economic organization and discusses on the one hand the process by which people with bedouin traditions and values have adapted themselves to different and difficult conditions, and on the other the effects upon them of submission to the central government and the modernisation of their modes of life that has resulted from it. His account offers a fascinating study of people living in an unusual environment, and will be of value to the anthropologist and ethnologist for its precise ethnography. At the same time, as one of the few detailed studies of the changes now being wrought on such a large scale by modern economic and political forces, it has real importance for the general student of contemporary Middle Eastern affairs.

Mud, Blood and Poppycock Gordon Corrigan, 2012-12-20 The true story of how Britain won the First World War. The popular view of the First World War remains that of BLACKADDER: incompetent generals sending brave soldiers to their deaths. Alan Clark quoted a German general's remark that the British soldiers were 'lions led by donkeys'. But he made it up. Indeed, many established 'facts' about 1914-18 turn out to be myths woven in the 1960s by young historians on the make. Gordon Corrigan's brilliant, witty history reveals how out of touch we have become with the soldiers of 1914-18. They simply would not recognize the way their generation is depicted on TV or in Pat Barker's novels. Laced with dry humour, this will overturn everything you thought you knew about Britain and the First World War. Gordon Corrigan reveals how the British embraced technology, and developed the weapons and tactics to break through the enemy trenches.
