Sea of Thunder Evan Thomas,2006-11-07 Evan Thomas takes us inside the naval war of 1941-1945 in the South Pacific in a way that blends the best of military and cultural history and riveting narrative drama. He follows four men throughout: Admiral William (Bull) Halsey, the macho, gallant, racist American fleet commander; Admiral Takeo Kurita, the Japanese battleship commander charged with making what was, in essence, a suicidal fleet attack against the American invasion of the Philippines; Admiral Matome Ugaki, a self-styled samurai who was the commander of all kamikazes and himself the last kamikaze of the war; and Commander Ernest Evans, a Cherokee Indian and Annapolis graduate who led his destroyer on the last great charge in the last great naval battle in history. Sea of Thunder climaxes with the Battle of Leyte Gulf, the biggest naval battle ever fought, over four bloody and harrowing days in October 1944. We see Halsey make an epic blunder just as he reaches for true glory; we see the Japanese navy literally sailing in circles, torn between the desire to die heroically and the exhausted, unacceptable realization that death is futile; we sail with Commander Evans and the men of the USS Johnston into the jaws of the Japanese fleet and exult and suffer with them as they torpedo a cruiser, bluff and confuse the enemy -- and then, their ship sunk, endure fifty horrific hours in shark-infested water. Thomas, a journalist and historian, traveled to Japan, where he interviewed veterans of the Imperial Japanese Navy who survived the Battle of Leyte Gulf and friends and family of the two Japanese admirals. From new documents and interviews, he was able to piece together and answer mysteries about the Battle of Leyte Gulf that have puzzled historians for decades. He writes with a knowing feel for the clash of cultures. Sea of Thunder is a taut, fast-paced, suspenseful narrative of the last great naval war, an important contribution to the history of the Second World War.

The Great Sea War: The Story Of Naval Action In World War II E. B. Potter,Fleet-Admiral Chester W. Nimitz,2015-11-06 A brilliant, concise and, perhaps, best single volume history of the Second World War at Sea. Written by veteran historian E. B. Potter during his time as resident historian at the United States Naval Academy this history is filled with action and analysis. As the conflict raged from the Pacific to the North Sea the author takes the action in each theater for the purposes of clarity but masterfully links the actions and events together to preserve the historical integrity of the work. A classic of Naval History.

The Great Sea David Abulafia,2011-06-01 Connecting Europe, Asia, and Africa, the Mediterranean Sea has been for millennia the place where religions, economies, and political systems met, clashed, influenced and absorbed one another. In this brilliant and expansive book, David Abulafia offers a fresh perspective by focusing on the sea itself: its practical importance for transport and sustenance; its dynamic role in the rise and fall of empires; and the remarkable cast of characters-sailors, merchants, migrants, pirates, pilgrims-who have crossed and re-crossed it. Ranging from prehistory to the 21st century, The Great Sea is above all a history of human interaction. Interweaving major political and naval developments with the ebb and flow of trade, Abulafia explores how commercial competition in the Mediterranean created both rivalries and partnerships, with merchants acting as intermediaries between cultures, trading goods that were as exotic on one side of the sea as they were commonplace on the other. He stresses the remarkable ability of Mediterranean cultures to uphold the civilizing ideal of convivencia, living together. Now available in paperback, The Great Sea is the definitive account of perhaps the

most vibrant theater of human interaction in history.

Neglected Skies Angus Britts, 2017-10-15 *Neglected Skies* uses a reconsideration of the clash between the British Eastern Fleet and the Imperial Japanese Navy's First Air Fleet in the Indian Ocean in April 1942 to draw a larger conclusion about declining British military power in the era. In this book, Angus Britts explores the end of British naval supremacy from an operational perspective. By primarily analyzing the evolution of British naval aviation during the interwar period, as well as the challenges that the peacetime Royal Navy was forced to confront, a picture emerges of a battle fleet that entered the war in September 1939 unready for combat. By examining the development of Japan's first-strike carrier battle group, the Kido Butai, Britts charts both the rise of Japan as a wartime power as well as the demise of the Royal Navy. Japan, by concentrating their six largest aircraft-carriers into a single strike force with state-of-the-art aircraft, had taken a quantum leap forward in warfighting at sea. Simultaneously, British forces found themselves outmatched in this Eastern theatre and Britts makes the case, by looking at a set of key battles, that this is where the global supremacy of Britain's naval power ended.

Arms, Armies and Fortifications in the Hundred Years War Anne Curry, Michael Hughes, 1999 'Careful, original and wide-ranging study of many different aspects of late medieval military history.' HISTORY The Hundred Years War embraced warfare in all aspects, from the grand set pieces of Crecy and Agincourt to the pillaged lands of the dispossessed population. What makes this book different from previous studies emphasising the great battles is its use of less familiar evidence, such as administrative records and landscape archaeology, to gain a truer picture of the realities of medieval warfare. From a general review of battle tactics, the book turns to examine (at points enlisting computer analysis) a number of issues: the composition of the English army, the management of affairs in Aquitaine, the response in England at large to the war and the consequent propaganda and hardship, and the impact of warfare on local communities. Close study of surviving artefacts - weapons, fortifications - also allows realistic assessments of military and naval experiences. Iron Dawn Richard Snow, 2016-11 From acclaimed popular historian Richard Snow, the thrilling story of the naval battle that not only changed the course of the Civil War but the future of all sea power. No single sea battle has triggered more far-reaching consequences than the one fought in the harbor at Hampton Roads, Virginia, in March 1862. The Confederacy, with no fleet of its own, built a sloped iron fort containing ten heavy guns on the hull of a captured Union frigate named the Merrimack. The North got word of the project when it was already well along, and, in desperation, secretly commissioned an eccentric inventor named John Ericsson to build the Monitor, a revolutionary iron warship--at the time, the single most complicated machine ever made. Abraham Lincoln himself was closely involved with the ship's design. Rushed through to completion in just one hundred days, it mounted two lethal guns housed in a shot-proof revolving turret. The new warship hurried south from Brooklyn (and nearly sank twice on the voyage), only to find the Merrimack had smokily destroyed half the Union fleet that morning and would be back to finish the job the next day. When she returned, the Monitor was there. She fought the Merrimack to a thunderous, blazing standstill and saved the Union cause. As soon as word of the clamorous battle spread, Great Britain--the foremost sea power of the day--ceased construction of all wooden warships. A thousand-year-old tradition ended, and the path to the naval future opened.--From dust jacket.

Jutland Nicholas Jellicoe, 2016-03-30 "A compelling, dramatic account of the Royal Navy's last great sea battle." –Robert K. Massie, Pulitzer Prize-winning and New York Times bestselling author of *Dreadnought* More than a century later, historians still argue about this controversial and misunderstood World War I naval battle off the coast of Denmark. It was the twentieth century's first engagement of dreadnoughts—and while it left Britain in control of the North Sea, both sides claimed victory and decades of disputes followed, revolving around senior commanders Admiral Sir John Jellicoe and Vice Admiral Sir David Beatty. This book not only retells the story of the battle from both a British and German perspective based on the latest research, but also helps clarify the context of Germany's inevitable naval clash and the aftermath after the smoke had cleared.

Decision at Sea Craig L. Symonds, 2006-10-23 From thunderous broadsides traded between wooden sailing ships on Lake Erie, to the carrier battles of World War II, to the devastating high-tech action in the Persian Gulf, here is a gripping history of five key battles that defined the evolution of naval warfare--and the course of the American nation. Acclaimed military historian Craig Symonds offers spellbinding narratives of crucial engagements, showing how each battle reveals the transformation of technology and weaponry from one war to the next; how these in turn transformed naval combat; and how each event marked a milestone in American history. – Oliver Hazard Perry's heroic victory at Lake Erie, one of the last great battles of the Age of Sail, which secured the Northwestern frontier for the United States – The brutal Civil War duel between the ironclads Monitor and Virginia, which sounded the death knell for wooden-hulled warships and doomed the Confederacy's hope of besting the Union navy – Commodore Dewey's stunning triumph at Manila Bay in 1898, where the U.S. displayed its new navy of steel-hulled ships firing explosive shells and wrested an empire from a fading European power – The hairsbreadth American victory at Midway, where aircraft carriers launched planes against enemies 200 miles away--

and where the tide of World War II turned in the space of a few furious minutes – Operation Praying Mantis in the Persian Gulf, where computers, ship-fired missiles, and smart bombs not only changed the nature of warfare at sea, but also marked a new era, and a new responsibility, for the United States. Symonds records these encounters in detail so vivid that readers can hear the wind in the rigging and feel the pounding of the guns. Yet he places every battle in a wide perspective, revealing their significance to America's development as it grew from a new Republic on the edge of a threatening frontier to a global superpower. *Decision at Sea* is a powerful and illuminating look at pivotal moments in the history of the Navy and of the United States. It is also a compelling study of the unchanging demands of leadership at sea, where commanders must make rapid decisions in the heat of battle with lives--and the fate of nations--hanging in the balance.
