### **Artificial Intelligence and Literary Creativity** Selmer Bringsjord, David

Ferrucci, 1999-09-01 Is human creativity a wall that AI can never scale? Many people are happy to admit that experts in many domains can be matched by either knowledge-based or sub-symbolic systems, but even some AI researchers harbor the hope that when it comes to feats of sheer brilliance, mind over machine is an unalterable fact. In this book, the authors push AI toward a time when machines can autonomously write not just humdrum stories of the sort seen for years in AI, but first-rate fiction thought to be the province of human genius. It reports on five years of effort devoted to building a story generator--the BRUTUS.1 system. This book was written for three general reasons. The first theoretical reason for investing time, money, and talent in the quest for a truly creative machine is to work toward an answer to the question of whether we ourselves are machines. The second theoretical reason is to silence those who believe that logic is forever closed off from the emotional world of creativity. The practical rationale for this endeavor, and the third reason, is that machines able to work alongside humans in arenas calling for creativity will have incalculable worth.

### **Thomas Keneally's Career and the Literary Machine** Paul Sharrad, 2019-08-30

Booker Prize winner and Living National Treasure, Thomas Keneally still divides critical opinion: he is both a morally challenging stylist and a commercial hack, a wise commentator on society and a garrulous leprechaun. Such judgements are located in the cultural politics of Australia but also linked to ideas about what a literary career should look like. 'Thomas Keneally's Career and the Literary Machine' charts Keneally's

production and reception across his three major markets, noting clashes between national interests and international reach, continuity of themes and variety of topics, settings and genres, the writer's interests and the publishers' push to create a brand, celebrity fame and literary reputation, and the tussle around fiction, history, allegory and the middlebrow. Keneally is seen as playing a long game across several events rather than honing one specialist skill, a strategy that has sustained for more than 50 years his ambition to earn a living from writing.

**Electric Animal** Akira Mizuta Lippit, 2000-05-01 Differentiation from animals helped to establish the notion of a human being, but the disappearance of animals now threatens that identity. This is the argument underlying *Electric Animal*, a probing exploration of the figure of the animal in modern culture. Akira Mizuta Lippit shows us the animal as a crucial figure in the definition of modernity—essential to developments in the natural sciences and technology, radical transformations in modern philosophy and literature, and the advent of psychoanalysis and the cinema. Moving beyond the dialectical framework that has traditionally bound animal and human being, *Electric Animal* raises a series of questions regarding the idea of animality in Western thought. Can animals communicate? Do they have consciousness? Are they aware of death? By tracing questions such as these through a wide range of texts by writers ranging from Friedrich Nietzsche to Jacques Derrida, Sigmund Freud to Vicki Hearne, Lewis Carroll to Franz Kafka, and Sergei Eisenstein to Gilles Deleuze, Lippit arrives at a remarkable thesis, revealing an

extraordinary logical consensus in Western thought: animals do not have language and hence cannot die. The animal has, accordingly, haunted thought as a form of spectral and undead being. Lippit demonstrates how, in the late nineteenth century, this phantasmic concept of animal being reached the proportions of an epistemological crisis, engendering the disciplines and media of psychoanalysis, modern literature, and cinema, among others. Against the prohibitive logic of Western philosophy, these fields opened a space for rethinking animality. Technology, usually thought of in opposition to nature, came to serve as the repository for an unmournable animality—a kind of vast wildlife museum. A highly original work that charts new territory in current debates over language and mortality, subjectivity and technology, *Electric Animal* brings to light fundamental questions about the status of representation—of the animal and of ourselves—in the age of biomechanical reproduction.

**Literature, Technology, and Modernity, 1860-2000** Nicholas Daly, 2004-02-12  
Industrial modernity takes it as self-evident that there is a difference between people and machines, but the corollary of this has been a recurring fantasy about the erasure of that difference. The central scenario in this fantasy is the crash, sometimes literal, sometimes metaphorical. Nicholas Daly considers the way human/machine encounters have been imagined from the 1860s on, arguing that such scenes dramatize the modernization of subjectivity. This book will be of interest to scholars of modernism, literature and film.

**Language Machines** Jeffrey Masten, Peter Stallybrass, Nancy J. Vickers, 2016-03-23

Language Machines questions any easily progressive model of technological change, demonstrating the persistence rather than the obsolescence of language technologies over time, the continuous and complicated overlap of pens, presses, screens and voice. In these essays new technologies do not simply replace, but rather draw upon, absorb, displace and resituate earlier technologies.

**American Literature in Transition, 2000-2010** Rachel Greenwald

Smith, 2017-12-28 *American Literature in Transition, 2000-2010* illuminates the dynamic transformations that occurred in American literary culture during the first decade of the twenty-first century. The volume is the first major critical collection to address the literature of the 2000s, a decade that saw dramatic changes in digital technology, economics, world affairs, and environmental awareness. Beginning with an introduction that takes stock of the period's major historical, cultural, and literary movements, the volume features accessible essays on a wide range of topics, including genre fiction, the treatment of social networking in literature, climate change fiction, the ascendancy of Amazon and online booksellers, 9/11 literature, finance and literature, and the rise of prestige television. Mapping the literary culture of a decade of promise and threat, *American Literature in Transition, 2000-2010* provides an invaluable resource on twenty-first century American literature for general readers, students, and scholars alike.

*Machine Dreams* Jayne Anne Phillips, 2011-11-09 In her highly acclaimed debut novel, the bestselling author of *Shelter* introduces the Hampsons, an ordinary, small-town American family profoundly affected by the extraordinary events of history. Here is a stunning chronicle that begins with the Depression and ends with the Vietnam War,

revealed in the thoughts, dreams, and memories of each family member. Mitch struggles to earn a living as Jeans becomes the main breadwinner, working to complete college and raise the family. While the couple fight to keep their marriage intact, their daughter Danner and son Billy forge a sibling bond of uncommon strength. When Billy goes off to Vietnam, Danner becomes the sole bond linking her family, whose dissolution mirrors the fractured state of America in the 1960s. Deeply felt and vividly imagined, this lyrical novel is among the wisest of a generation to grapple with a war that maimed us all (*The Village Voice*), by a master of contemporary fiction.

*The Literature Machine* Italo Calvino, 1989

*Rereading the Machine in the Garden* Eric Erbacher, Nicole Maruo-Schröder, Florian Sedlmeier, 2014-11-06 The volume reexamines the trope of the intrusive machine and the regenerative pastoral garden, laid out fifty years ago by Leo Marx in *The Machine in the Garden*, one of the founding texts of American Studies. Contributions explore the lasting influence of the trope in American culture and the arts, rereading it as a dialectics where nature is as much technologized as technology is naturalized. They trace this dialectic trope in filmic and literary representations of industrial, bureaucratic, and digital gardens; they explore its function in the aftermath of the civil war, the rural electrification during the New Deal, in landscape art, and in ethnic literatures; and they discuss the historical premises and lasting influence of Leo Marx's seminal study.

**Utopian Literature and Science** Patrick Parrinder, 2015-08-11 Scientific progress is usually seen as a precondition of modern utopias, but science and utopia are frequently at odds. Ranging from Galileo's observations with the telescope to current ideas of the post-

human and the human-animal boundary, this study brings a fresh perspective to the paradoxes of utopian thinking since Plato.

Scripts, Grooves, and Writing Machines Lisa Gitelman, 1999 The phonograph and the typewriter may be things of the past, but this book will resonate with readers who are engaged daily with computer networks, hypertexts, and the forms that mass media will take in the new century.--BOOK JACKET.

**Poetry & Barthes** Calum Gardner, 2018 What kinds of pleasure do we take from writing and reading? What authority has the writer over a text? What are the limits of language's ability to communicate ideas and emotions? Moreover, what are the political limitations of these questions? The work of the French cultural critic and theorist Roland Barthes (1915-80) poses these questions, and has become influential in doing so, but the precise nature of that influence is often taken for granted. This is nowhere more true than in poetry, where Barthes' concerns about pleasure and origin are assumed to be relevant, but this has seldom been closely examined. This innovative study traces the engagement with Barthes by poets writing in English, beginning in the early 1970s with one of Barthes' earliest Anglophone poet readers, Scottish poet-theorist Veronica Forrest-Thomson (1947-75). It goes on to examine the American poets who published in *L=A=N=G=U=A=G=E* and other small but influential journals of the period, and other writers who engaged with Barthes later, considering his writings' relevance to love and grief and their treatment in poetry. Finally, it surveys those writers who rejected Barthes' theory, and explores why this was. The first study to bring Barthes and poetry into such close contact, this important book illuminates both subjects with a deep contemplation of

Barthes' work and a range of experimental poetics.

**Machine** Susan Steinberg, 2019-08-20 A haunting story of guilt and blame in the wake of a drowning, the first novel by the author of *Spectacle* Susan Steinberg's first novel, *Machine*, is a dazzling and innovative leap forward for a writer whose most recent book, *Spectacle*, gained her a rapturous following. *Machine* revolves around a group of teenagers—both locals and wealthy out-of-towners—during a single summer at the shore. Steinberg captures the pressures and demands of this world in a voice that effortlessly slides from collective to singular, as one girl recounts a night on which another girl drowned. Hoping to assuage her guilt and evade a similar fate, she pieces together the details of this tragedy, as well as the breakdown of her own family, and learns that no one, not even she, is blameless. A daring stylist, Steinberg contrasts semicolon-studded sentences with short lines that race down the page. This restless approach gains focus and power through a sharply drawn narrative that ferociously interrogates gender, class, privilege, and the disintegration of identity in the shadow of trauma. *Machine* is the kind of novel—relentless and bold—that only Susan Steinberg could have written.

*Fiction 2000* George Edgar Slusser, T. A. Shippey, 1992 Will novels and stories be relevant in the next millennium, when the boundaries between illusion and reality, and observer and observed, may dissipate in a whirl of images, signals and data? This essay collection divines the prospects of fiction in the information age by examining cyberpunk literature. A movement less than a decade old, cyberpunk is driven by deep concerns about society, ethics, and new technology and has been defined as the literature of the first generation of science-fiction writers actually to live in a science-fiction world. These

essays were first presented at the 1989 annual J. Lloyd Eaton Conference on Science Fiction and Fantasy Literature, the field's most prestigious international gathering. They address concerns common not only to cyberpunk and traditional science-fiction scholars, critics, and writers but to their counterparts outside the genre as well. Interdisciplinary in perspective, the essays consider the origins of cyberpunk, the appropriation of its conventions by the mass media, the literature's paradoxical retrogressive/iconoclastic nature, cyberpunk's affinities to and deviations from both traditional science fiction and postmodernist literature, the parameters and components of the cyberpunk canon, and the movement's future course. Some essays are theoretical, but all are grounded in works familiar to serious science-fiction readers: *Neuromancer*, *Frontera*, *Deserted Cities of the Heart*, *Islands in the Net*, *Great Sky River*, the *Mirrorshades* anthology, and others; cyberpunk TV and cinema like the Max Headroom programs, *Blade Runner*, and *Tron*; and precursory literature, including *Frankenstein*, *Le Roman de l'avenir*, *Ralph 124C 41 +*, and *A Clockwork Orange*. Useful for its views on a volatile science-fiction subgenre, *Fiction 2000* is also valuable for what it tells us about the fate of mainstream literature.

**Machinic Modernism** B. Monaco, 2008-10-23 How can the concepts of Deleuze and Guattari be used to unearth the 'metaphysics' of modernist literature? This intersection of philosophy and key literary works uses their radical concepts to draw a dynamic map of modernism that explores the confrontation of each writer with the non-human machine age of the early twentieth-century.

**Track Changes** Matthew G. Kirschenbaum, 2016-05-02 Writing in the digital age has been as messy as the inky rags in Gutenberg's shop or the molten lead of a Linotype

machine. Matthew Kirschenbaum examines how creative authorship came to coexist with the computer revolution. Who were the early adopters, and what made others anxious? Was word processing just a better typewriter, or something more?
