An Apartment on Uranus Paul B. Preciado, 2020-01-28 A "dissident of the gender-sex binary system" reflects on gender transitioning and political and cultural transitions in technoscientific capitalism. Uranus, the frozen giant, is the coldest planet in the solar system as well as a deity in Greek mythology. It is also the inspiration for uranism, a concept coined by the writer Karl Heinrich Ulrich in 1864 to define the "third sex" and the rights of those who "love differently." Following Ulrich, Paul B. Preciado dreams of an apartment on Uranus

where he might live beyond existing power, gender and racial strictures invented by modernity. "My trans condition is a new form of uranism," he writes. "I am not a man. I am not a woman. I am not heterosexual. I am not homosexual. I am not bisexual. I am a dissident of the gender-sex binary system. I am the multiplicity of the cosmos trapped in a binary political and epistemological system, shouting in front of you. I am a uranist confined inside the limits of technoscientific capitalism." This book recounts Preciado's transformation from Beatriz into Paul B., but it is not only an account of gender transitioning. Preciado also considers political, cultural, and sexual transition, reflecting on issues that range from the rise of neo-fascism in Europe to the technological appropriation of the uterus, from the harassment of trans children to the role museums might play in the cultural revolution to come. *An Apartment on Uranus* is a bold, transgressive, and necessary book.

Flower essences are liquid, energetic remedies derived from living flowers. They bring the natural dynamic energy of the plant directly into the human electro-system, where they work to bring about movement toward health and balance. Because of their energetic and living quality, they work directly and deeply in the emotional system, assisting in the release of early wounds and trauma. These suppressed imprints are considered to be a main causes of many types of diseases or imbalances today. Flower essences are a perfect complement to many of today's health practices. They enhance the effects of energy work, physical therapy, acupuncture, psychotherapy, cranial-sacral work, massage, aroma therapy and many other forms of healing and treatment. Flower essences are safe, natural, and non-toxic. Continuing the work of Edward Bach, *Stars of the Meadow* looks deeply into the relationship between health and the human personality. David Dalton takes us on a thorough and soulful

exploration of how to use more than forty medicinal herbs as flower essences, portraying each flower in a way that is both substantive and inspired. Each description is organized to present a picture of how the flower essence affects the adult personality as it has been formed through life, and describes its direct clinical effects on children and animals. Dalton also connects different types of flowers--based on the number and arrangement of petals as well as associated colors and qualities--to the system of human chakras, or energy centers. This innovative approach allows the reader to discover new ways to employ flower essences to focus on specific areas of one's being, from the most physical to the highest levels, allowing a kind of flexibility rarely found in any single system of healing. *Stars of the Meadow* is a valuable guide not only for those who are new to flower essences, but also for seasoned herbalists who wish to deepen their knowledge of this effective method of healing body, mind, and soul.

The International Space Station Robert C. Dempsey,2017 Looks at the operations of the International Space Station from the perspective of the Houston flight control team, under the leadership of NASA's flight directors, who authored the book. The book provides insight into the vast amount of time and energy that these teams devote to the development, planning and integration of a mission before it is executed. The passion and attention to detail of the flight control team members, who are

always ready to step up when things do not go well, is a hallmark of NASA human spaceflight operations. With tremendous support from the ISS program office and engineering community, the flight control team has made the International Space Station and the programs before it a success.

Jupiter Meets Uranus Anne Whitaker, 2009-04 Jupiter and Uranus meet every 14 years. When they do, revolution and innovation join forces with restless exploration and the quest for knowledge. The result is always exciting, educational and unpredictable. Or is it? Anne Whitaker, never one to take anything at its face value, decided late in 1996 that she would observe the effects of this approaching planetary event and investigate whether it lived up to its reputation according to the textbooks. Her method was straightforward: watch world events around the time of the conjunction, and during the rest of 1997; find some volunteers with the 5 Aquarius 55 Hot Spot highlighted by in their natal horoscope; collect their stories during the year of the conjunction; and determine whether the Jupiter-Uranus effect could be detected in their lives. As Ken Gillman writes in the foreword, This is a study of real-life astrology. Nine of the original 17 volunteers stayed with the study throughout. Their disrupted, exciting, turbulent life stories form the core of this vivid exploration of the interface between planetary activity and human life, during a period in which the startling announcement of the birth of Dolly the Sheep in February 1997 indicated that advances

in cloning and genetic engineering were taking us on a voyage never before undertaken by humanity. This highly original book, written in a pacy and accessible style, will be of particular interest to research- minded students. It will also appeal to astrologers looking for specific evidence that the personal and collective lives of humankind respond in the same core way to the great music of the spheres, played throughout space and time by the planets in their cycles.

Earth in Human Hands David Grinspoon,2016-12-06 NASA Astrobiologist and renowned scientist Dr. David Grinspoon brings readers an optimistic message about humanity's future in the face of climate change. For the first time in Earth's history, our planet is experiencing a confluence of rapidly accelerating changes prompted by one species: humans. Climate change is only the most visible of the modifications we've made--up until this point, inadvertently--to the planet. And our current behavior threatens not only our own future but that of countless other creatures. By comparing Earth's story to those of other planets, astrobiologist David Grinspoon shows what a strange and novel development it is for a species to evolve to build machines, and ultimately, global societies with world-shaping influence. Without minimizing the challenges of the next century, Grinspoon suggests that our present moment is not only one of peril, but also great potential, especially when viewed from a 10,000-year perspective. Our species has surmounted the threat of extinction before, thanks to our innate ingenuity and ability to adapt, and there's every reason to believe we can do so again. Our challenge now is to awaken to our role as a force of planetary change, and to grow into this task. We must become graceful planetary engineers, conscious shapers of our environment and caretakers of Earth's biosphere. This is a perspective that begs us to ask not just what future do we want to avoid, but what do we seek to build? What kind of world do we want? Are humans the worst thing or the best thing to ever

happen to our planet? Today we stand at a pivotal juncture, and the answer will depend on the choices we make.
