*Marketing the Moon* David Meerman Scott,Richard Jurek,2014-02-28 One of the most successful public relations campaigns in history, featuring heroic astronauts, press-savvy rocket scientists, enthusiastic reporters, deep-pocketed defense contractors, and Tang. In July 1969, ninety-four percent of American televisions were tuned to coverage of Apollo 11's mission to the moon. How did space exploration, once the purview of rocket scientists, reach a larger audience than My Three Sons? Why did a government program whose standard operating procedure had been secrecy turn its greatest achievement into a communal experience? In *Marketing the Moon*, David Meerman Scott and Richard Jurek tell the story of one of the most successful marketing and public relations campaigns in history: the selling of the Apollo program. Primed by science fiction, magazine articles, and appearances by Wernher von Braun on the "Tomorrowland" segments of the Disneyland prime time television show, Americans were a receptive audience for NASA's pioneering "brand journalism." Scott and Jurek describe sophisticated efforts by NASA and its many contractors to market the facts about space travel—through press releases, bylined articles, lavishly detailed background materials, and fully produced radio and television features—rather than push an agenda. American astronauts, who signed exclusive agreements with Life magazine, became the heroic and patriotic faces of the program. And there was some judicious product placement: Hasselblad was the "first camera on the moon"; Sony cassette recorders and supplies of Tang were on board the capsule; and astronauts were equipped with the Exer-Genie personal exerciser. Everyone wanted a place on the bandwagon. Generously illustrated with vintage photographs, artwork, and advertisements, many never published before, *Marketing the Moon* shows that when Neil Armstrong took that giant leap for mankind, it was a triumph not just for American engineering and rocketry but for American marketing and public relations.

**Composing for the Red Screen** Kevin Bartig,2013-04-04 Sound film captivated Sergey Prokofiev during the final two decades of his life: he considered composing for nearly two dozen pictures, eventually undertaking eight of them, all Soviet productions. Hollywood luminaries such as Gloria Swanson tempted him with commissions, and arguably more people heard his film music than his efforts in all other genres combined. Films for which Prokofiev composed, in particular those of Sergey Eisenstein, are now classics of world cinema. Drawing on newly available sources, *Composing for the Red Screen* examines - for the first time - the full extent of this prodigious cinematic career. Author Kevin Bartig examines how Prokofiev's film music derived from a self-imposed challenge: to compose serious music for a broad audience. The picture that emerges is of a composer seeking an individual film-music voice, shunning Hollywood models and objecting to his Soviet colleagues' ideologically expedient film songs. Looking at Prokofiev's film music as a whole - with well-known blockbusters like *Alexander Nevsky* considered alongside more obscure or aborted projects - reveals that there were multiple solutions to the challenge, each with varying degrees of success. Prokofiev carefully balanced his own populist agenda, the perceived aesthetic demands of the films themselves, and, later on, Soviet bureaucratic demands for accessibility.

**Foundation Silverlight 2 Animation** Jeff Paries,2009-01-23 See the power of Silverlight in action Learn the building blocks of animation in Silverlight 2 Includes over 180 example Silverlight projects Silverlight is a phenomenally powerful animation tool, but few people know how to unlock its potential. *Foundation Silverlight 2 Animation* gives you the keys to all of that power. It covers the basics of animation—that is, Silverlight's storyboards and animations, which are used to provide interactivity to Silverlight applications. You'll take an in-depth look at double, point, and color animations. You'll also learn the difference between linear, spline, and discrete keyframes, and how they affect your objects as they move. But it doesn't stop there.

You'll go well beyond those simple timeline-based animations and learn how to create purely code-based animations. You'll use vectors to make objects move and bounce off boundaries and each other. You'll explore particle systems, kinematics, and collisions. You'll also learn how to use trigonometry to animate objects and simulate 3D motion in a 2D environment. The essential trigonometry required to create complex motion is simplified and explained through a series of fascinating and fun examples that can be incorporated into your own applications, games, and experiments. Whether you're already familiar with Silverlight and you want to learn how to open it up, a Flash developer interested in expanding your skill set, or a web developer looking to take the next step into rich interactive application development, this book will bring you up to speed on Silverlight 2 and show you what it can do. From techniques for creating frame-based animations to learning how to simulate 3D in a 2D environment, there is something here to satisfy anyone's appetite for animation and interactivity.

**Saul Bass** Jan-Christopher Horak,2014-10-09 Food is a significant part of our daily lives and can be one of the most telling records of a time and place. Our meals -- from what we eat, to how we prepare it, to how we consume it -- illuminate our culture and history. As a result, cookbooks present a unique opportunity to analyze changing foodways and can yield surprising discoveries about society's tastes and priorities. In Kentucky's Cookbook Heritage, John van Willigen explores the state's history through its changing food culture, beginning with Lettice Bryan's The Kentucky Housewife (originally published in 1839). Considered one of the earliest regional cookbooks, The Kentucky Housewife includes pre--Civil War recipes intended for use by a household staff instead of an individual cook, along with instructions for serving the family. Van Willigen also shares the story of the original Aunt Jemima -- the advertising persona of Nancy Green, born in Montgomery County, Kentucky -- who was one of many African American voices in Kentucky culinary history. Kentucky's Cookbook Heritage is a journey through the history of the commonwealth, showcasing the shifting priorities and innovations of the times. Analyzing the historical importance of a wide range of publications, from the nonprofit and charity cookbooks that flourished at the end of the twentieth century to the contemporary cookbook that emphasizes local ingredients, van Willigen provides a valuable perspective on the state's social history.

**Paris to the Moon** Adam Gopnik, 2001-12-18 Paris. The name alone conjures images of chestnut-lined boulevards, sidewalk cafés, breathtaking façades around every corner--in short, an exquisite romanticism that has captured the American imagination for as long as there have been Americans. In 1995, Adam Gopnik, his wife, and their infant son left the familiar comforts and hassles of New York City for the urbane glamour of the City of Light. Gopnik is a longtime New Yorker writer, and the magazine has sent its writers to Paris for decades--but his was above all a personal pilgrimage to the place that had for so long been the undisputed capital of everything cultural and beautiful. It was also the opportunity to raise a child who would know what it was to romp in the Luxembourg Gardens, to enjoy a croque monsieur in a Left Bank café--a child (and perhaps a father, too) who would have a grasp of that Parisian sense of style we Americans find so elusive. So, in the grand tradition of the American abroad, Gopnik walked the paths of the Tuileries, enjoyed philosophical discussions at his local bistro, wrote as violet twilight fell on the arrondissements. Of course, as readers of Gopnik's beloved and award-winning Paris Journals in The New Yorker know, there was also the matter of raising a child and carrying on with day-to-day, not-so-fabled life. Evenings with French intellectuals preceded middle-of-the-night baby feedings; afternoons were filled with trips to the Musée d'Orsay and pinball games; weekday leftovers were eaten while three-star chefs debated a culinary crisis. As Gopnik describes in this funny and tender book, the dual processes of navigating a foreign city and becoming a parent are not completely dissimilar journeys--both hold new routines, new languages, a new set of rules by which everyday life is lived. With singular wit and insight, Gopnik weaves the magical with the mundane in a wholly delightful, often hilarious look at what it was to be an American family man in Paris at the end of the twentieth century. We went to Paris for a sentimental reeducation--I did anyway--even though the sentiments we were instructed in were not the ones we were expecting to learn, which I believe is why they call it an education.
