P-51 Mustang Martin W. Bowman, 2022-03-31 Today, the Mustang is a living legend and is remembered as probably the finest long-range single-seat piston-engined fighter ever built. Here, in words and images, the esteemed aviation historian Martin Bowman tells the story of an aircraft that continues to provoke enthusiastic praise. We look at the Mustang's involvement in the Second World War and the Korean War, as well as other conflicts and engagements. This new addition to the Images of War series serves as a tribute to an aircraft with a particularly impressive wartime record, the legacy of which is still felt today.

P-51 Mustang Cory Graff, 2015-09-10 Celebrate 75 years of the iconic World War II warbird that helped win the war and flew into the heart of American life. From D-Day to the Battle of the Bulge, through reconnaissance missions and combat, fighting flying bombs and Me 262 Stormbird jets, P-51 Mustang pilots saw it all during World War II. P-51 Mustang celebrates the 75th anniversary of the most iconic American warbird written by Cory Graff, lead curator at the Flying Heritage Collection--one of the world's most important collections and sites for warbird restoration. The entire story of this plane is here, starting with the astonishing fact that the P-51 Mustang was built in less than 120 days. This first version was hardly a world-beater, and it took the addition of a Rolls-Royce-designed Merlin to make the Mustang a legend. These nimble and versatile fighters were able to escort Allied heavy bombers all the way to Berlin and back. In the Pacific, their long-

range ability was pushed to its limit, with pilots flying 1,500-mile, eight-or-more-hour missions over water to attack Tokyo. On the home front, Graff profiles the impact manufacturing Mustangs had on workers in Los Angeles and Dallas. The United States wasn't finished with the P-51 Mustang after World War II. It was used in the Korean War and, afterwards, as a symbol and icon of American ingenuity. Graff explores the post-World War II history of this iconic plane, making this a book that every single World War II, history, and aviation enthusiast will want to buy.

Photograph 51 Anna Ziegler, 2021-08-26 Ziegler's thoughtful, empathetic play brings home with bitter comedy the unlovely male-domination of this world in the 1950s ... glorious. Independent London 1953. Scientists are on the verge of discovering what they call the secret of life: the DNA double helix. Providing the key is driven young physicist Rosalind Franklin. But if the double helix was the breakthrough of the 20th century, then what kept Franklin out of the history books? A play about ambition, isolation, and the race for greatness. *Photograph 51* premiered in the UK in London's West End in 2015 in a production which starred Nicole Kidman, where it won the WhatsOnStage Award for Best New Play. Published for the first time in Methuen Drama's Modern Classics series, this edition features a brand-new introduction by Mandy Greenfield.

The Panorama Stephan Oettermann, 1997 The significance of panorama painting in the nineteenth century is frequently cited in contemporary debates about visuality and the emergence of the modern spectator. Stephan Oettermann's *The Panorama* is the first major historical study to appear in English of the rich phenomenon of the panorama, one of the most influential forms of visual entertainment in the nineteenth century. In this richly illustrated book Oettermann gives readers a concrete sense of the structural and experiential reality of the panorama, and the many forms it took throughout Europe and North America--a crucial task given that very few of the

original nineteenth-century panoramas survive. At the same time, he outlines the many ways in which these remarkable and often immense 360-degree images were part of a larger transformation of the status of the observer and of popular culture. Thus, the panorama is treated not only as a new kind of image but also as an architectural and informational component of the new urban spaces and media networks.

Salerno Anon,2014-08-15 Illustrated with 18 maps and 24 Illustrations EARLY IN SEPTEMBER

1943, British and American armies invaded southern Italy, striking at the heart of a major Axis nation and breaching Hitler's Fortress Europe. Behind the invasion lay long months of hard-won Allied victories. The Axis was cleared out of Africa in May, when British and American armies annihilated the German and Italian forces cornered in Tunisia. Sicily, the stepping stone from Africa to Europe, was next conquered in a 38-day battle, and on 17 August the last of its German garrison fled across the Strait of Messina to the Italian mainland. On 3 September the British Eighth Army crossed the Strait in pursuit and drove up the Calabrian Peninsula. Coordinated with the Eighth Army's attack, Allied landings at Salerno by the United States Fifth Army and at Taranto by the British 1 Airborne Division were made on 9 September. In the Salerno landings, strong American forces were fighting on the continent of Europe for the first time since 1918. Even before the beginnings of the Sicilian operations, the staffs of Allied land, naval, and air forces had been planning an invasion of Italy. Once established on the Italian mainland, we might hope to secure complete naval and aerial domination of the Mediterranean and to obtain strategic ports and airfields for future operations against continental Europe. If we could knock Italy out of the war, we would force the Germans to retreat north of the Alps or to use in Italy armies which might be fighting on the Russian front. Under the command of Lt. Gen. Mark W. Clark, the Fifth Army, a great Allied force composed of the British 10 Corps and the United States VI Corps, carried out the first large scale invasion of the European mainland and secured a firm base for future operations in Italy. Salerno: The American Operations from the Beaches to the Volturno is an account of the American forces who landed on the beaches in the Gulf of Salerno.

Revisiting Austria Gundolf Graml,2020-04-09 Following the transformations and conflicts of the first half of the twentieth century, Austria's emergence as an independent democracy heralded a new era of stability and prosperity for the nation. Among the new developments was mass tourism to the nation's cities, spa towns, and wilderness areas, a phenomenon that would prove immensely influential on the development of a postwar identity. Revisiting Austria incorporates films, marketing materials, literature, and first-person accounts to explore the ways in which tourism has shaped both international and domestic perceptions of Austrian identity even as it has failed to confront the nation's often violent and troubled history.

The Song Machine: Inside the Hit Factory John Seabrook,2015-10-05 An utterly satisfying examination of the business of popular music. —Nathaniel Rich, The Atlantic There's a reason today's ubiquitous pop hits are so hard to ignore—they're designed that way. The Song Machine goes behind the scenes to offer an insider's look at the global hit factories manufacturing the songs that have everyone hooked. Full of vivid, unexpected characters—alongside industry heavy-hitters like Katy Perry, Rihanna, Max Martin, and Ester Dean—this fascinating journey into the strange world of pop music reveals how a new approach to crafting smash hits is transforming marketing, technology, and even listeners' brains. You'll never think about music the same way again. A Wall Street Journal Best Business Book

The Patapsco River Valley Henry K. Sharp,2001 The Patapsco Valley, located in a woodland setting between Baltimore and Washington, witnessed the establishment of numerous foundries,

iron mills, and textile factories from the late 18th century until well after the Civil War. The author draws upon 19th-century diaries, newspapers, and journals to chronicle the growth and development of these early industries, and their destruction in the terrible flood of July 1868.
