Carol Bacchi

One Last Spin Drew Rooke,2019-02-05 In a superb work of long-form investigative journalism, this is a confronting tale about the human cost of poker-machine addiction, of governments pandering to corporate interests, and of the insidious power of the industry's PR spin.

Responsible Government in South Australia, Volume 2 Robert Martin,2009

Australian Politcal Institutions Gwynneth Singleton,Don Aitkin,Brian Jinks,John Warhurst,2012-11-07 Australian Political Institutions 10e introduces students to the structure and organisation of the institutions and functions of government in Australia, with reference to contemporary issues and debates. A lot has changed in recent times in the Australian political environment. Finally there is a text that incorporates all these important changes. As an introduction to the principles of political science the text provides an analysis of key issues in the Australian political system in a clear and concise manner. This new tenth edition retains its core focus on the Australian political system but also includes expanded comparative analysis of the similarities and differences in the structure and operation of political institutions in other countries which students can use to consider the strengths and weaknesses of the Australian political system and whether it could be improved.

Losing Streak James Boyce,2017-03-14 A jaw-dropping account of how one company came to own every poker machine in Tasmania – and the cost to democracy, the public purse and problem gamblers and their families. The story begins with the toppling of a premier, and ends with David Walsh, the man behind MONA, taking an eccentric stand against pokie machines and the political status quo. It is a story of broken politics and back-room deals. It shows how giving one company the licence to all the poker machines in the most disadvantaged state in the country has led to several hundred million dollars of profits (mainly from problem gamblers) being diverted from public use, through a series of questionable and poorly understood deals. *Losing Streak* is a meticulous, compelling case study in governance failure, which has implications for pokies reform throughout Australia.

Global Gambling Sytze F. Kingma,2009-09-10 While most research has examined the legal, economic and psychological sides of gambling, this innovative collection offers a wide range of cultural perspectives on gambling organizations. Using both historical and present-day case studies from throughout the world, the authors seriously consider the rituals, symbols, the meanings, values, legitimations, relations (formal as well as informal), and the spaces and artifacts involved in the (re)production of gambling organizations. Contributors not only examine the global influence of commercial gambling, but also demonstrate how the local qualities of gambling organizations remain unique. This volume will be of interest to criminologists, sociologists, anthropologists, and all scholars of gambling.

Analysing Policy Carol Bacchi,2009-06-10 This book offers a novel approach to thinking about public policy and a distinctive methodology for analysing policy. It introduces a set of six questions that probe how ‘problems’ are represented in policies, followed by an injunction to apply the questions to one’s own policy proposals. This form of analysis, it suggests, is crucial to understanding how policy works, how we are governed, and how the practice of policy-making implicitly constitutes us as subjects. The book mounts a challenge to the problem-solving paradigm currently dominating the intellectual and policy landscape, a paradigm manifest in ‘evidence-based policy’. Arguing that such a paradigm denies the shaping that goes on in the process of problematisation, it offers a ‘what’s the problem represented to be?’ approach to policy analysis as a counter-discourse. In this view critical thinking involves putting ‘problems’ into question rather than learning how to ‘solve’ them. Bacchi’s approach to policy analysis offers exciting insights in a wide array of policy areas, including welfare, drugs/alcohol and gambling, criminal justice, health, education, immigration and population, media and research policy. Invaluable to those involved in policy studies and public administration, it will also appeal to students and academics in sociology, social work, anthropology, cultural studies and human geography.

Australian Beach Cultures Douglas Booth,2012-12-06 Australians are surrounded by beaches. But this enclosure is more than a geographical fact for the inhabitants of an island continent; the beach is an integral part of the cultural envelope. This work analyzes the history of the beach as an integral aspect of Australian culture.

Interactive Gambling Nerilee Hing,Sally Gainsbury,Alex Blaszczyński,Robert Wood,Dan Lubman,Alex Russell,2014 This report investigates how Australians are using interactive gambling services and the impact of such online gambling on non-online gambling and gambling related problems. Interactive gambling is a joint term capturing gaming and wagering on the Internet. A research study was conducted over three years and included a nationally representative telephone survey of 15,006 people, an online survey of 4,594 gamblers, interviews with 81 interactive gamblers, and data from gambling help services. This study provides a baseline of who, what, when, why and how people gamble, using interactive technology in Australia.

Researching Live Music Chris Anderton,Sergio Pisfil,2021-11-18 *Researching Live Music* offers an important contribution to the emergent field of live music studies. Featuring paradigmatic case studies, this book is split into four parts, first addressing perspectives associated with production, then promotion and consumption, and finally policy. The contributors to the book draw on a range of methodological and theoretical positions to provide a critical resource that casts new light on live music processes and shows how live music events have become central to raising and discussing broader social and cultural issues. Their case studies expand our knowledge of how live music events work and extend beyond the familiar contexts of the United States and United Kingdom to include examples drawn from Argentina, Australia, France, Jamaica, Japan, New Zealand, Switzerland, and Poland. *Researching Live Music* is the first comprehensive review of the different ways in which live music can be studied as an interdisciplinary field, including innovative approaches to the study of historic and contemporary live music events. It represents a crucial reading for professionals, students, and researchers working in all aspects of live music.

*Sh*t Towns of Australia* Rick Furphy,Geoff Rissole,2019-11-19 From dusty desert sh*tholes to free-range bogan breeding grounds, to the bin-chicken playgrounds of our megacities, *Sh*t Towns of Australia* is a guide to the concrete, fibro and methamphetamine wastelands that we like to call home. From Coober Pedy to Canberra, from Ballarat to Broken Hill, from Logan to Launceston, *Sh*t Towns* takes us through the veritable f*ck-tonne of crappy towns and cities that make up the 'Lucky Country' - profiling all the best places not to visit or, heaven forbid, live. The sixty towns and cities reviewed in this volume have been carefully selected using an exacting set of scientific criteria developed at the prestigious University of Nimbin, combined with extensive field research, a desire to offend, and where possible a sense of humour.

Addiction by Design Natasha Dow Schüll,2014-05-11 Recent decades have seen a dramatic shift away from social forms of gambling played around roulette wheels and card tables to solitary gambling at electronic

terminals. Slot machines, revamped by ever more compelling digital and video technology, have unseated traditional casino games as the gambling industry's revenue mainstay. Addiction by Design takes readers into the intriguing world of machine gambling, an increasingly popular and absorbing form of play that blurs the line between human and machine, compulsion and control, risk and reward. Drawing on fifteen years of field research in Las Vegas, anthropologist Natasha Dow Schüll shows how the mechanical rhythm of electronic gambling pulls players into a trancelike state they call the machine zone, in which daily worries, social demands, and even bodily awareness fade away. Once in the zone, gambling addicts play not to win but simply to keep playing, for as long as possible--even at the cost of physical and economic exhaustion. In continuous machine play, gamblers seek to lose themselves while the gambling industry seeks profit. Schüll describes the strategic calculations behind game algorithms and machine ergonomics, casino architecture and ambience management, player tracking and cash access systems--all designed to meet the market's desire for maximum time on device. Her account moves from casino floors into gamblers' everyday lives, from gambling industry conventions and Gamblers Anonymous meetings to regulatory debates over whether addiction to gambling machines stems from the consumer, the product, or the interplay between the two. Addiction by Design is a compelling inquiry into the intensifying traffic between people and machines of chance, offering clues to some of the broader anxieties and predicaments of contemporary life. At stake in Schüll's account of the intensifying traffic between people and machines of chance is a blurring of the line between design and experience, profit and loss, control and compulsion.
