Wells, is an early science fiction novel which describes an invasion of England by aliens from Mars. It is one of the earliest and best-known depictions of an alien invasion of Earth, and has influenced many others, as well as spawning several films, radio dramas, comic book adaptations, and a television series based on the story. The 1938 radio broadcast caused public outcry against the episode, as many listeners believed that an actual Martian invasion was in progress, a notable example of mass hysteria.

The War of the Worlds H G Wells, 2020-09-10 From the father of science fiction, H. G. Spooked! Gail Jarrow, 2018-08-07 A Washington Post Best Children's Book This book for young readers explores in riveting detail the false panic created by the famous War of the Worlds radio broadcast from 1938—as well as the repercussions of fake news today. On the night of October 30, 1938, thousands of Americans panicked when they believed that Martians had invaded Earth. What appeared to be breaking news about an alien invasion was in fact a radio drama based on H. G. Wells's War of the Worlds, performed by Orson Welles and his Mercury Theatre players. Some listeners became angry once they realized they had been tricked, and the reaction to the broadcast sparked a national discussion about fake news, propaganda, and the role of radio. In this compelling nonfiction chapter book, Gail Jarrow explores the production of the broadcast, the aftermath, and the concept of fake news in the media.

World Set Free H. G. Wells, 2024-02-10 THE WORLD SET FREE was written in 1913 and published early in 1914, and it is the latest of a series of three fantasias of possibility, stories which all turn on the possible developments in the future of some contemporary force or group of forces. The World Set Free was written under the immediate shadow of the Great War. Every intelligent person in the world felt that disaster was impending and knew no way of averting it, but few of us realised in the earlier half of 1914 how near the crash was to us. The reader will be amused to find that here it is put off until the year 1956. He may naturally want to know the reason for what will seem now a quite extraordinary delay. As a prophet, the author must confess he has always been inclined to be rather a slow prophet. The war aeroplane in the world of reality, for example, beat the forecast in Anticipations by about twenty years or so. I suppose a desire not to shock the sceptical reader's sense of use and wont and perhaps a less creditable disposition to hedge, have something to do with this dating forward of one's main events, but in the particular case of The World Set Free there was, I think, another motive in holding the Great War back, and that was to allow the chemist to get well forward with his discovery of the release of atomic energy. 1956 or for that matter 2056 may be none too late for that crowning revolution in human potentialities. And apart from this procrastination of over forty years, the guess at the opening phase of the war was fairly lucky; the forecast of an alliance of the Central Empires, the opening campaign through the Netherlands, and the despatch of the British Expeditionary Force were all justified before the book had been published six months. And the opening section of Chapter the Second remains now, after the reality has happened, a fairly adequate diagnosis of the essentials of the matter. One happy hit (in Chapter the Second, Section 2), on which the writer may congratulate himself, is the forecast that under modern conditions it would be quite impossible for any great

general to emerge to supremacy and concentrate the enthusiasm of the armies of either side. There could be no Alexanders or Napoleons. And we soon heard the scientific corps muttering, 'These old fools,' exactly as it is here foretold. These, however, are small details, and the misses in the story far outnumber the hits. It is the main thesis which is still of interest now; the thesis that because of the development of scientific knowledge, separate sovereign states and separate sovereign empires are no longer possible in the world, that to attempt to keep on with the old system is to heap disaster upon disaster for mankind and perhaps to destroy our race altogether. The remaining interest of this book now is the sustained validity of this thesis and the discussion of the possible ending of war on the earth.

The War of the Worlds H. G. Wells, 2022-08-15 Originally published in December 1897, 'The War of the Worlds' is an early thrilling science fiction novel by H.G. Wells, an English writer. The novel begins with humans watching the skies closely, fascinated with the worlds beyond Earth's atmosphere. As astronomers and scientists hone in on some bizarre occurrences on Mars, their observations soon become terrifying—humans are not the only intelligent beings, and those other beings are also curious about humans. Alien spacecraft start crashing into England and as Martians emerge from the ships, they begin intimidating the Earth and bringing destruction with every step. Cities are burned, families are torn apart, and human military power proves weak in the face of an unknown enemy. This story is about surviving in the face of destruction, the human desire to protect one's home and loved ones, and a fascinating glance at how a harmful alien invasion could play out on Earth.

The War of the Worlds (Classic Reprint) H. G. Wells, 2015-07-13 Excerpt from The War of the Worlds No one would have believed, in the last years of the nineteenth century, that human affairs were being watched keenly and closely by intelligences greater than man's and yet as mortal as his own; that as men busied themselves about their affairs they were scrutinized and studied, perhaps almost as narrowly as a man with a microscope might scrutinize the transient creatures that swarm and multiply in a drop of water. With infinite complacency men went to and fro over this globe about their little affairs, serene in their assurance of their empire over matter. It is possible that the infusoria under the microscope do the same. No one gave a thought to the older worlds of space as sources of human danger, or thought of them only to dismiss the idea of life upon them as impossible or improbable. It is curious to recall some of the mental habits of those departed days. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. A Critical Edition of the War of the Worlds Herbert George Wells, 1993 What is first believed to be falling stars or harmless meteorites turns out to be cylindrical Martian ships filled with nightmarish, tentacled invaders and their robotic war machines. When curious Englishers come to inspect the massive containers imbedded in the still-smoking countryside, metallic appendages emerge from the pits to kill every living thing in their path with strange heat rays. Then as the surrounding townships slowly devolve into chaos, the Martians begin constructing giant tripod war machines to track down and kill--or capture-- as many of the human inferior animals as possible. The nameless narrator, trapped in a house almost completely crushed by the impact of a starship, watches in horror as the seemingly unstoppable Martians build their mechanical armies, kill hundreds with poisonous gas-- and begin snacking on captured humans!
